Votamuta Vota-E

Votamuta Vota-E Shower Panel Instruction Manual

Model: Vota-E | Brand: Votamuta

PRODUCT OVERVIEW

The Votamuta Vota-E Shower Panel is a comprehensive shower system designed for modern bathrooms. It integrates multiple functions to enhance your showering experience, including various spray modes and a digital temperature display.

Key Features:

- **6-in-1 Shower System:** Features LED rainfall, waterfall shower head, body jets, mist sprays, handheld shower wand, and tub spout.
- **Durable Construction:** Made from 304 stainless steel for corrosion resistance and longevity.
- **Digital Temperature Display:** Integrated display shows water temperature to prevent scalding.
- **Dual Showerhead Modes:** Offers both rainfall and waterfall options for varied experiences.
- **Adjustable Body Jets:** High-pressure, angle-adjustable body jets and mist sprays for targeted massage.
- **Handheld Shower with Hose:** Includes a handheld shower with a 59-inch stainless steel hose for versatile use.
- **Integrated Tub Spout:** Convenient for filling bathtubs or buckets.

SAFETY INFORMATION

Please read all instructions carefully before installation and use. Failure to follow these instructions may result in property damage, personal injury, or death. Retain this manual for future reference.

- Ensure all local plumbing and building codes are met during installation.
- Turn off the main water supply before beginning any installation or maintenance.
- Use appropriate personal protective equipment (PPE) such as gloves and eye protection during installation.
- If you are unsure about any part of the installation, consult a qualified plumber.
- Do not use harsh chemicals or abrasive cleaners on the shower panel, as this may damage the finish.

- Regularly check for leaks and address them promptly to prevent water damage.

PACKAGE CONTENTS

Verify that all components are present and undamaged before proceeding with installation.

- Shower Panel Body
- Shower Head (integrated)
- 59-inch Stainless Steel Shower Hose
- Handheld Shower
- Handheld Shower Holder
- Brass Mixing Valve (integrated)
- Shower Diverter Valve (integrated)
- Water Temperature Display (integrated)
- All Mounting Components (screws, anchors, brackets, gaskets)

INSTALLATION GUIDE

Professional installation is recommended. Ensure the main water supply is turned off before starting.

Tools Required:

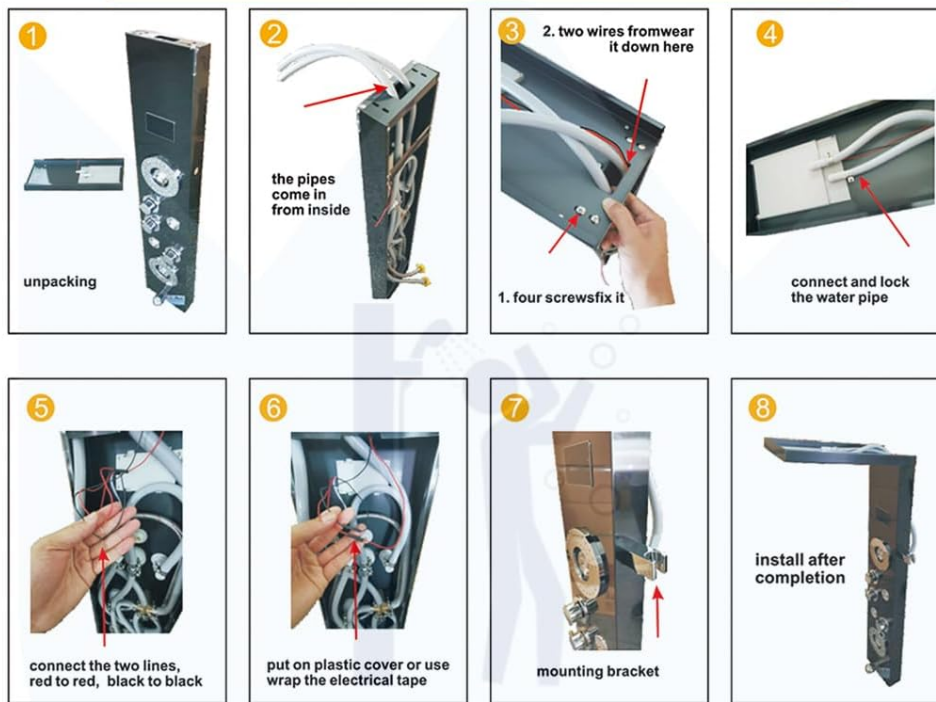

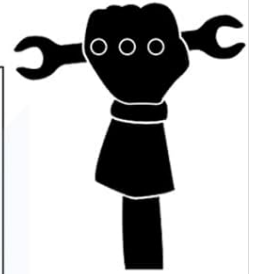

- Drill
- Drill bits (appropriate for wall material)
- Screwdriver (Phillips head)
- Adjustable wrench
- Measuring tape
- Pencil or marker
- Teflon tape (plumber's tape)

- Hammer

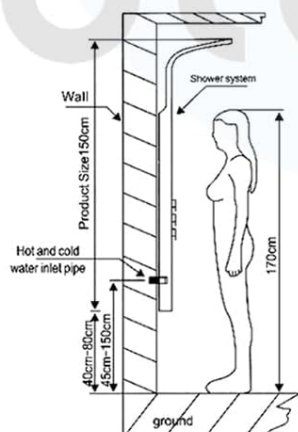

Step-by-Step Installation:

1. **Unpack and Inspect:** Carefully remove all components from the packaging. Inspect for any damage.
2. **Prepare the Wall:** Determine the desired mounting height. Mark the positions for the mounting brackets on the wall. Ensure the marks are level and align with the panel's mounting points.
3. **Drill Holes:** Drill pilot holes at the marked locations. Insert wall anchors if necessary for your wall type.
4. **Attach Mounting Brackets:** Securely fasten the mounting brackets to the wall using the provided screws.
5. **Connect Water Lines:** Apply Teflon tape to the threads of the hot and cold water supply lines. Connect the flexible hoses from the shower panel to the wall's hot and cold water outlets. Ensure a tight, leak-free connection.
6. **Secure the Panel:** Carefully hang the shower panel onto the installed mounting brackets. Ensure it is stable and flush against the wall.
7. **Connect Handheld Shower:** Attach the handheld shower hose to the designated outlet on the shower panel. Connect the handheld shower head to the other end of the hose.
8. **Test for Leaks:** Slowly turn on the main water supply and check all connections for leaks. Address any leaks immediately.

OPERATING INSTRUCTIONS

Familiarize yourself with the controls to fully utilize your Votamuta Vota-E Shower Panel.

Controls:

- **Water Control Knob:** Located at the bottom center of the panel. Turn to adjust water flow and temperature.
- **Diverter Knob:** Located above the water control knob. Rotate to switch between shower functions (rainfall, waterfall, body jets, handheld shower, tub spout).

- **Digital Screen:** Displays real-time water temperature. This screen is powered by water flow and does not require batteries.

Using Shower Functions:

1. **Turn On Water:** Rotate the water control knob to start the water flow. Adjust to your desired temperature.
2. **Select Function:** Rotate the diverter knob to select your preferred shower function:
 - **Rainfall Shower:** Provides a gentle, rain-like spray from the top shower head.
 - **Waterfall Shower:** Delivers a broad, cascading water flow from the top shower head.
 - **Body Jets:** Activates the adjustable jets for a targeted massage.
 - **Handheld Shower:** Directs water to the handheld wand for flexible use.
 - **Tub Spout:** Releases water from the bottom spout, ideal for filling a tub.
3. **Adjust Temperature:** Use the water control knob to fine-tune the water temperature. The digital display will show the current temperature.

MAINTENANCE AND CARE

Proper maintenance ensures the longevity and optimal performance of your shower panel.

- **Cleaning:** Clean the stainless steel surface with a soft cloth and mild soap or a non-abrasive cleaner specifically designed for stainless steel. Rinse thoroughly and dry to prevent water spots.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, scouring pads, ammonia-based cleaners, or bleach, as these can damage the finish and internal components.
- **Nozzle Cleaning:** Periodically clean the silicone nozzles on the shower heads and body jets by gently rubbing them to dislodge any mineral buildup.
- **Water Temperature Display:** The digital display is water-flow powered. If it stops working, check for blockages in the water flow or consult the troubleshooting section.

TROUBLESHOOTING

Refer to this section for common issues and their solutions.

Problem	Possible Cause	Solution
No water flow or low pressure.	Main water supply off, clogged nozzles, kinked hose, or low household water pressure.	Check main water supply. Clean shower head and jet nozzles. Ensure hoses are not kinked. Consult a plumber if household water pressure is consistently low.
Water leaks from connections.	Loose connections, worn gaskets, or insufficient Teflon tape.	Tighten all connections. Replace worn gaskets. Reapply Teflon tape to threaded connections.
Digital temperature display not working.	Insufficient water flow to power the generator, or debris in the generator.	Ensure adequate water flow. If the issue persists, the internal generator may be blocked or faulty. Professional inspection may be required.
No hot or cold water.	Incorrect hot/cold water line connection, or issue with household water heater/supply.	Verify hot and cold water lines are connected correctly. Check household water heater and supply.

If you encounter problems not listed here or if solutions do not resolve the issue, please contact Votamuta customer support.

Answered questions about this manual

Can I cap off the tub spout on the Votamuta Vota-E Shower Panel, and is there a cover plate available?

The Votamuta Vota-E Shower Panel features an integrated tub spout as one of its 6-in-1 functions. While the manual does not explicitly provide a "capping kit," you can technically disable the spout by following...
