Hurom H70FT-BEC06

Hurom H70FT Nouveau Slow Juicer Instruction Manual

Model: H70FT-BEC06

Product Overview

The Hurom H70FT Slow Juicer is an advanced electric cold press juicer designed to extract juice from a variety of fruits and vegetables while preserving their natural nutrients. Its innovative design focuses on ease of use, efficient operation, and simplified cleaning.

- **Natural Nutrient Preservation:** Utilizes a slow cold-pressing method to ensure maximum retention of vitamins, enzymes, and minerals.
- **User-Friendly Design:** Features quick assembly and disassembly for convenient operation and maintenance.
- **Smart Hopper:** Equipped with a large, intelligent hopper that allows for whole fruits and vegetables to be inserted without pre-cutting, including those with skin and seeds.
- **Elegant Integration:** Designed with a sleek and compact form factor that complements any kitchen aesthetic.
- **BPA-Free Construction:** All components are manufactured from BPA-free materials, ensuring safety and purity of your juice.

Product Specifications

Brand	Hurom

Model Number	H70FT-BEC06
Color	Titanium Grey
Product Dimensions (L x W x H)	17.4 x 21.6 x 44.1 cm (6.85 x 8.5 x 17.36 inches)
Capacity	1.8 Liters
Power	150 Watts
Voltage	220 Volts
Material	Acrylonitrile Butadiene Styrene (ABS)
Item Weight	5.5 Kilograms (12.1 lbs)
Special Feature	Easy to Clean
Blade Material	Acrylonitrile Butadiene Styrene

Setup and Assembly

The Hurom H70FT is designed for quick and straightforward assembly. Before first use, ensure all packaging materials are removed and components are clean.

Assembly Steps:

1. Place the motor base on a stable, flat surface.
2. Align the juicing chamber with the motor base and rotate until it locks securely into place.
3. Insert the auger (screw) into the juicing chamber, ensuring it sits firmly at the bottom.
4. Place the inner filter and micro filter (if applicable for your model) over the auger.
5. Attach the hopper assembly to the top of the juicing chamber, aligning the marks and rotating until it clicks into position.
6. Ensure the pulp and juice outlets are properly aligned with their respective containers.

Operating Instructions

Operating the Hurom H70FT is designed to be intuitive. Follow these steps for optimal juicing results.

Juicing Process:

1. Ensure the juicer is correctly assembled and the power cord is plugged into a grounded outlet.
2. Place juice and pulp collection containers under their respective spouts.
3. Turn on the juicer using the power switch.
4. Prepare your ingredients. Thanks to the smart hopper, most fruits and vegetables can be inserted whole or in large pieces. For very fibrous ingredients or those with hard pits, it is recommended to remove pits and cut into smaller pieces if necessary to prevent clogging.
5. Slowly feed ingredients into the hopper. The automatic feeding system will guide them towards the auger. Avoid forcing large quantities at once.
6. Allow the juicer to process the ingredients completely. Juice will flow from the juice spout, and pulp will be expelled from the pulp outlet.
7. Once juicing is complete, turn off the juicer and unplug it from the power outlet.

Maintenance and Cleaning

Regular cleaning is essential to maintain the performance and longevity of your Hurom H70FT Slow Juicer. The design allows for simplified cleaning.

Cleaning Steps:

1. Unplug the juicer from the power outlet before disassembling.
2. Disassemble the juicing chamber, auger, filters, and hopper.
3. Rinse all removable parts under running water immediately after use to prevent pulp from drying and sticking.
4. Use the provided cleaning brush to remove any stubborn pulp residue from the filters and other components.
5. Wash the parts with warm, soapy water. While some parts may be dishwasher safe, hand washing is recommended for optimal care and to extend product life. Avoid water temperatures exceeding 60°C (140°F).
6. Dry all parts thoroughly before reassembling or storing.
7. Wipe the motor base with a damp cloth.**Do not submerge the motor base in water.**

Troubleshooting

This section provides solutions to common issues you might encounter with your Hurom H70FT Slow Juicer.

Common Issues and Solutions:

- **Juicer does not turn on:**
    - Ensure the power cord is securely plugged into a working electrical outlet.

- Verify that all parts are correctly assembled and locked into place. The juicer has safety features that prevent operation if not assembled properly.

- **Low juice yield or excessive pulp:**
  - Ensure ingredients are fresh and suitable for juicing. Overripe or very soft fruits may yield less juice.
  - Check if the filters are clean and not clogged with pulp.
  - Avoid overloading the juicer. Feed ingredients slowly and allow the auger to process them fully.

- **Juicer stops during operation:**
  - The juicer may have overheated due to continuous operation or processing very hard ingredients. Turn off the juicer, unplug it, and let it cool down for at least 30 minutes before resuming.
  - Check for blockages. Disassemble and clear any lodged food particles.

- **Loud noise or vibration:**
  - Ensure all components are correctly assembled and securely locked.
  - Check for any foreign objects or hard seeds that might be causing obstruction.

If you encounter issues not listed here or if the problem persists, please refer to the official Hurom support channels or contact customer service for assistance.

Warranty and Support

The Hurom H70FT Slow Juicer comes with a comprehensive warranty to ensure your peace of mind.

Warranty Information:

This product is covered by a **15-year warranty** for the motor and other parts. Please note that consumables such as silicone parts and juice/pulp containers are typically excluded from this warranty. For specific warranty terms and conditions, please refer to the warranty card included with your product or visit the official Hurom Europe website.

Additional Information

Benefits of Slow Juicing:

Slow juicing, also known as cold press juicing, minimizes heat generation during the extraction process. This helps to preserve the delicate enzymes, vitamins, and minerals found in fruits and vegetables, resulting in a more nutritious and flavorful juice compared to traditional high-speed centrifugal juicers.

Image: A hand pouring freshly extracted green juice into a glass, surrounded by a vibrant assortment of fruits and vegetables, highlighting the nutritional benefits.

Smart Hopper Technology:

The H70FT's intelligent hopper is designed to simplify your juicing preparation. Its large opening and automatic feeding mechanism allow you to insert whole or large pieces of produce, significantly reducing the need for pre-cutting. This feature saves time and makes the juicing process more convenient.
