### 3. GETTING STARTED (SETUP)

#### 3.1 Inserting the Battery

1. Locate the battery compartment cover on the bottom of the camera.
2. Slide the cover latch to open the compartment.
3. Insert a charged Lithium-Ion battery into the compartment, ensuring the correct orientation (refer to the diagram inside the compartment).
4. Close the battery compartment cover until it clicks securely into place.

#### 3.2 Inserting the Memory Card

1. Open the battery compartment cover. The TF (Micro SD) card slot is usually located next to the battery.
2. Insert the 64GB TF card into the slot with the gold contacts facing the front of the camera, until it clicks into place.
3. Close the battery compartment cover.

### 3.3 Attaching the Camera Strap

1. Thread the ends of the camera strap through the strap lugs on both sides of the camera.
2. Secure the strap by passing the ends through the plastic buckles and adjusting the length for comfortable wear around your neck or wrist.

### 3.4 Attaching the Lens Hood

1. Align the lens hood with the front of the camera lens.
2. Twist the lens hood clockwise until it locks securely into place. The lens hood helps reduce glare and lens flare.

## 4. OPERATING THE CAMERA

### 4.1 Power On/Off

Press and hold the power button (usually located on the top of the camera) for a few seconds to turn the camera on or off.

### 4.2 Using the Flip Touchscreen

The 3-inch IPS HD touchscreen can be flipped out and rotated 180 degrees, making it ideal for selfies and vlogging. Navigate menus and settings by tapping or swiping on the screen.

### 4.3 Mode Dial

Rotate the mode dial on the top of the camera to select different shooting modes:

- **Photo Mode:** For capturing still images (up to 75MP).
- **Video Mode:** For recording high-quality videos (up to 4K).
- **Loop Recording:** Continuously records video, overwriting older footage.
- **Slow Motion:** Records video at a higher frame rate for slow-motion playback.
- **Time-Lapse:** Captures a series of photos over time to create a time-lapse video.
- **Scene Modes:** Pre-set modes for specific shooting conditions (e.g., Portrait, Landscape, Sports).

### 4.5 Flash Control

The camera has an external flash. To activate the flash, manually pop it up (if applicable) or select the flash mode from the settings menu (Auto, Fill-in, Red-eye Reduction, Off).

### 4.6 Filters and Effects

Explore various built-in filters and effects (e.g., Black & White, Sepia, Negative) to enhance your photos and videos. These can usually be accessed through the menu settings or a dedicated button.

### 5.3 USB-C Connection

Connect the camera to a computer using the provided Type-C USB cable to transfer files or charge the camera directly.

## 6. MAINTENANCE

### 6.1 Cleaning the Camera

- Use the included cleaning cloth to gently wipe the lens and touchscreen. Avoid using harsh chemicals or abrasive materials.
- For stubborn smudges on the lens, use a specialized lens cleaning solution and a microfiber cloth.
- Keep the camera body clean and free from dust and debris.

### 6.2 Battery Care

- Always use the provided dual charger and USB cable to charge the batteries.
- Store batteries in a cool, dry place when not in use.
- Avoid fully discharging the batteries frequently to prolong their lifespan.

## 7. TROUBLESHOOTING

If you encounter any issues with your Yatao YT01-RM Digital Camera, please refer to the following common solutions:

- **Camera not turning on:** Ensure the battery is fully charged and correctly inserted. Try using the spare battery.
- **Memory card error:** Ensure the TF card is correctly inserted. If the issue persists, try formatting the card (this will erase all data) or use a different TF card.
- **Poor image/video quality:** Check the selected resolution and quality settings. Ensure the lens is clean and free from smudges. Adjust lighting conditions or use the flash if necessary.
- **Autofocus issues:** Ensure there is sufficient light for the camera to focus. Try focusing on a high-contrast subject.
- **WiFi connection problems:** Ensure WiFi is enabled on the camera and your device. Restart both devices and try connecting again.
