Aeitto HSJ1908

Aeitto HSJ1908 Cold Press Juicer Machine User Manual

Model: HSJ1908

1. INTRODUCTION

Thank you for choosing the Aeitto HSJ1908 Cold Press Juicer Machine. This manual provides essential information for safe operation, maintenance, and optimal performance of your juicer. Please read it thoroughly before first use and retain it for future reference.

2. IMPORTANT SAFETY INSTRUCTIONS

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and personal injury.

- Read all instructions before use.
- Do not immerse the motor base in water or other liquids.
- Unplug from outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Avoid contact with moving parts.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been dropped or damaged in any manner.
- The juicer machine will automatically stop working when the hopper cover is opened, ensuring your safety and preventing children from being injured by accidentally opening the machine.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or

instruction concerning use of the appliance by a person responsible for their safety.

- Do not use attachments not recommended or sold by the manufacturer.
- Do not use outdoors.
- Do not let cord hang over edge of table or counter or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Always ensure the juicer is properly assembled before operation.

1

Safety Design

It will **stop** automatically when the cover is **opened**

2

Anti-drip Design

Keep the table clean

3

One-Button Operation

Easy to operate & Reverse Function
prevent clogging

Image: This image highlights three key safety and operational features: the automatic stop mechanism when the hopper cover is opened, the anti-drip spout to maintain cleanliness, and the simple one-button control with a reverse function to prevent clogging.

3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your Aeito Cold Press Juicer.

- Feed Chute (4.9 inch extra large)
- Hopper Cover
- Pre-cutting Blade
- Multi-Stage Auger
- Filter Screen

- Juice Outlet with Anti-drip Cap
- Pulp Outlet
- Motor Base with Control Dial (OFF/ON/REV)
- Juice Cup
- Pulp Container
- Cleaning Brush

Image: This image details the internal mechanism of the juicer, specifically the pre-cutting blades that automatically chop fruits and vegetables, and the multi-stage auger designed for efficient cold pressing.

4. ASSEMBLY AND INITIAL SETUP

Follow these steps to assemble your juicer before first use.

1. Place the motor base on a stable, flat surface.
2. Align the filter screen with the motor base and gently press down until it clicks into place.
3. Insert the multi-stage auger into the center of the filter screen.
4. Place the hopper cover onto the assembly, ensuring it is securely locked. The juicer will not operate if the cover is not correctly installed.
5. Position the juice cup under the juice outlet and the pulp container under the pulp outlet.

6. Plug the power cord into a grounded electrical outlet.

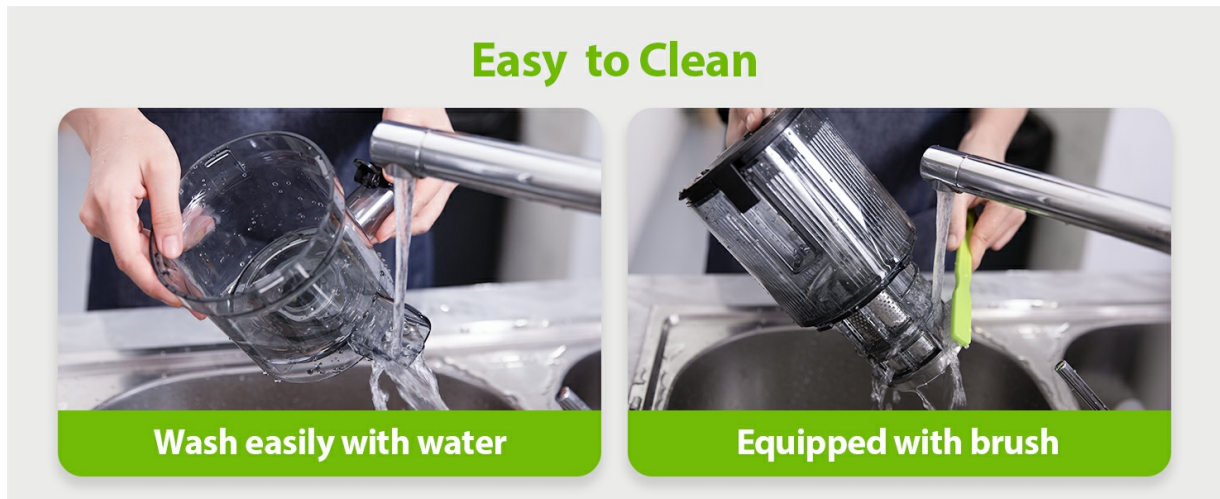

Image: This visual guide illustrates the simple four-step assembly process for the juicer, from placing the main components onto the base to securing the hopper cover.

5. OPERATING INSTRUCTIONS

Preparation

- Wash all fruits and vegetables thoroughly.
- For best results, ensure fruits and vegetables are fresh.
- The 4.9-inch large feed chute accommodates whole fruits and vegetables like apples, oranges, and celery without extensive pre-cutting. For very fibrous or hard items, it is recommended to cut them into smaller pieces to prevent clogging and ensure optimal juice extraction.

Juicing Process

1. Ensure the juicer is properly assembled and the juice cup and pulp container are in place.
2. Turn the control dial to the 'ON' position.
3. Slowly feed fruits and vegetables into the feed chute. The built-in blades will pre-cut items before cold pressing.
4. Do not force ingredients into the chute. Allow the juicer to process at its own pace.
5. If clogging occurs, turn the dial to the 'REV' (Reverse) position for a few seconds to clear the blockage, then return to 'ON'.
6. Once juicing is complete, turn the control dial to the 'OFF' position and unplug the appliance.

4.9 INCH Extra Large Feed Chute

No Cutting, Less Oxidation

Image: This image highlights the large 4.9-inch feed chute, illustrating how it can accommodate whole or large pieces of fruits and vegetables, significantly reducing preparation time.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures the longevity and hygienic operation of your juicer. The hopper and screen integrated design makes disassembly and cleaning straightforward.

1. Unplug the juicer from the power outlet before cleaning.
2. Disassemble all removable parts: hopper cover, auger, filter screen, juice outlet, juice cup, and pulp container.
3. Rinse all removable parts under running water immediately after use to prevent pulp from drying and sticking.
4. Use the provided cleaning brush to remove any stubborn pulp from the filter screen and other components.
5. Wash parts with warm, soapy water. Rinse thoroughly.
6. **Important:** The motor base is **NOT** dishwasher safe. Wipe the motor base with a damp cloth. Do not immerse it in water.
7. Allow all parts to dry completely before reassembling or storing.
8. Store the juicer in a clean, dry place.

Easy to Assemble

Image: This image illustrates the simple cleaning process: rinsing parts with water and using the provided brush to remove pulp, emphasizing the juicer's easy-to-clean design.

7. TROUBLESHOOTING GUIDE

Refer to this guide for common issues and their solutions.

Problem	Possible Cause	Solution
Juicer does not turn on.	Power cord not plugged in. Hopper cover not securely locked.	Ensure the power cord is firmly plugged into a working outlet. Reassemble the hopper cover, ensuring it clicks into place.
Juicer stops during operation.	Overload protection activated. Hopper cover opened.	Turn off the juicer, unplug it, and remove any blockage. Wait 10-15 minutes for the motor to cool before restarting. Ensure the hopper cover remains closed during operation.
Low juice yield or excessive pulp.	Ingredients are too hard or fibrous. Feeding ingredients too quickly.	Cut hard or fibrous ingredients into smaller pieces. Feed ingredients slowly, allowing the juicer to process them thoroughly.
Excessive vibration or noise.	Improper assembly. Hard ingredients causing strain.	Disassemble and reassemble all parts, ensuring they are correctly aligned and locked. Cut hard ingredients into smaller pieces.
Juice leaks from the base.	Parts not assembled correctly.	Disassemble and reassemble all parts, ensuring seals are properly seated and components are locked.

Image: This image demonstrates the juicer's high efficiency, showing a glass full of pure juice and a separate container with very dry pulp, indicating maximum extraction.

8. PRODUCT SPECIFICATIONS

- **Brand:** Aeitto
- **Model Name:** HSJ1908
- **Color:** Black
- **Special Features:** Pre-Cutting Blade, No Clogging, High Juice Yield, Easy to Use
- **Product Dimensions:** 8"D x 7"W x 16"H
- **Item Weight:** 8.89 pounds
- **Is Dishwasher Safe:** No
- **Feed Chute Size:** 4.9 inches
- **Speed:** 50 RPM (Slow Cold Press)

Compact Size

Fits for kitchen & small spaces

Image: This image displays the juicer's compact dimensions (16.38 inches high, 7.19 inches wide/deep), illustrating its suitability for various kitchen spaces.
