## CIVO 8349

# CIVO Analog Men's Watch Model 8349 Instruction Manual

Model: 8349

## 1. PRODUCT OVERVIEW

The CIVO Analog Men's Watch Model 8349 is a classic stainless steel timepiece featuring a precise Japanese quartz movement, date display, and luminous hands for enhanced visibility. It is designed for daily wear with 3 ATM water resistance.

## 2. SETUP AND ADJUSTMENT

### 2.1 Initial Setup

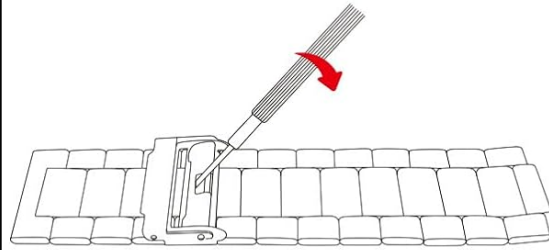

Before first use, ensure all protective films are removed from the watch face and band. The watch is powered by a pre-installed battery.

# Set It Once, Perfect for Life

NOTE: Please peel protective film from band before adjusting

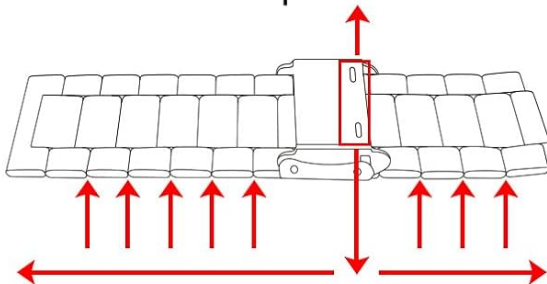

## Step 1

Pry up the clasp

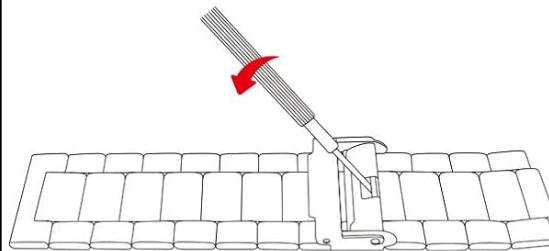

## Step 2

Move the clasp to the desired position

The clasps dent must match the dent on the band

## Step 3

Press down to secure the clasp

Image 2: Diagram illustrating the three steps for adjusting the watch band clasp for a customized fit.

## 2.2 Setting Time and Date

1. **To Set the Date:** Gently pull the crown (the knob on the side of the watch) out to the first click position. Rotate the crown clockwise or counter-clockwise until the desired date is displayed. Push the crown back in to secure the date.
2. **To Set the Time:** Pull the crown out to the second click position. Rotate the crown to move the hour and minute hands to the correct time. Push the crown back in to start the watch.

## 2.3 Adjusting the Stainless Steel Band

The stainless steel band is adjustable to fit various wrist sizes. A small tool is provided for this purpose. Follow these steps:

1. **Step 1: Pry up the clasp.** Use the provided tool to gently pry up the small lever on the clasp mechanism.
2. **Step 2: Move the clasp.** Slide the clasp along the band to the desired position. Ensure the

small dent on the clasp aligns with a corresponding dent on the band for a secure fit.

- Step 3: Secure the clasp.** Press the lever back down firmly until it clicks into place, securing the clasp at the new position.

If you encounter difficulty, it is recommended to seek assistance from a professional watch repair service.

### 3. OPERATING THE WATCH

---

Your CIVO watch is designed for reliable timekeeping and ease of use.

- **Time Display:** The watch features a classic analog display with hour, minute, and second hands.
- **Date Display:** A small window on the dial shows the current date.
- **Luminous Hands:** The watch hands are treated with a luminous material, allowing for visibility in low-light conditions after exposure to light.

#### 4. MAINTENANCE AND CARE

- **Water Resistance:** This watch has a 3 ATM (30 meters / 100 feet) water resistance rating. It is suitable for daily activities such as hand washing, splashes, and light rain. It is **not** suitable for swimming, diving, or showering. Avoid pressing the crown or buttons underwater.

- **Cleaning:** Wipe the watch regularly with a soft, dry cloth to remove dust and smudges. For the stainless steel band, a slightly damp cloth can be used, followed by immediate drying.
- **Avoid Chemicals:** Do not expose the watch to harsh chemicals, solvents, or detergents, as these can damage the finish and internal components.
- **Temperature Extremes:** Avoid exposing the watch to extreme temperatures (hot or cold) or sudden temperature changes, which can affect its accuracy and lifespan.
- **Magnetic Fields:** Keep the watch away from strong magnetic fields, as they can interfere with the quartz movement.

## 5. TROUBLESHOOTING

---

- **Watch Not Running:**
  - Check if the crown is fully pushed in.
  - The battery may need replacement. Consult a professional watch repair service.
- **Date Not Changing:**
  - Ensure the time is set correctly, especially past midnight for the date to advance.
  - Adjust the date manually as described in Section 2.2.
- **Inaccurate Time:**
  - Verify the time is set correctly.
  - Exposure to strong magnetic fields can affect accuracy.
  - The battery may be low.

## 6. SPECIFICATIONS

---

<b>Feature</b>	<b>Detail</b>
