Lavinda LA-X3-W

Lavinda UV LED Nail Lamp (Model LA-X3-W) Instruction Manual

Model: LA-X3-W | Brand: Lavinda

INTRODUCTION

The Lavinda 48W UV LED Nail Lamp is designed for efficient and safe curing of gel nail polishes. This manual provides essential information for the proper setup, operation, and maintenance of your device to ensure optimal performance and longevity.

Key features include:

- **Dual Light Source:** Equipped with 33 high-efficiency beads (365nm + 405nm) for fast and even curing.
- **Smart Sensor:** Automatic activation when hands are inserted, and deactivation when removed.
- **Multiple Timer Settings:** Includes 10s, 30s, 60s, and a 90s low heat mode for sensitive nails.
- **Detachable Magnetic Base:** Facilitates easy cleaning and accommodates both manicures and pedicures.
- **Wide Compatibility:** Cures all gel nail polish brands, including Base Coat, Top Coat, Color Gel, Hard Gels, Poly Gels, Builder, Acrylic, and Sculpture gel. (Not suitable for regular nail polish).

SETUP

1. **Unpack the Device:** Carefully remove the nail lamp and all accessories from the packaging.
2. **Connect Power:** Insert the power adapter into the DC input port at the back of the nail lamp. Plug the other end of the adapter into a suitable electrical outlet.
3. **Prepare the Base:** Ensure the magnetic base is securely attached to the main unit. If performing a pedicure, the base can be detached for easier placement.

OPERATING INSTRUCTIONS

Timer Settings

The lamp offers four preset timer options for different curing needs:

- **10s:** Short curing time, suitable for thin coats or flash curing.
- **30s:** Standard curing time for many gel polishes.
- **60s:** Longer curing time for thicker coats or darker colors.
- **90s (Low Heat Mode):** Recommended for sensitive nails to minimize heat spikes. To activate, long-press the 90s button. Long-press again to deactivate.

Press the desired timer button to start the curing cycle. The lamp will automatically turn off once the selected time has elapsed.

Smart Sensor Operation

The lamp features an infrared auto-sensing function for convenience:

- When your hand is inserted into the lamp, the lights will automatically turn on.
- When your hand is removed, the lights will automatically turn off.

This feature works independently of the timer settings, providing continuous light as long as your hand is detected.

MAINTENANCE

Cleaning the Detachable Base

The magnetic detachable base allows for easy cleaning and sanitation, which is crucial for hygiene, especially when switching between manicures and pedicures.

1. **Detach the Base:** Gently pull the magnetic base downwards to separate it from the main unit.
2. **Clean:** Use a soft cloth dampened with a mild disinfectant or alcohol to wipe down the interior of the lamp and the detachable base. Ensure no liquid enters the electrical components.

3. **Reattach:** Once clean and dry, align the base with the main unit and allow the magnets to snap it back into place.

Detachable Base

Suitable for both hands and feet

TROUBLESHOOTING

If you encounter any issues with your Lavinda UV LED Nail Lamp, please refer to the following common solutions:

- **Lamp Not Turning On:**

- Ensure the power adapter is securely plugged into both the lamp and the electrical outlet.
- Verify the electrical outlet is functional by testing it with another device.

- **Gel Not Curing Properly:**

- Ensure you are using gel polish, as this lamp is not designed for regular nail polish.
- Check that the correct timer setting is selected for the type and thickness of your gel. Thicker coats or darker colors may require longer curing times (e.g., 60s or 90s low heat).

- Make sure your hand is fully inserted into the lamp, allowing all nails to be exposed to the UV/LED light.
- Verify that the reflective metal mirror base is clean and properly installed to maximize light exposure.

• **Heat Spike Sensation:**

- If you experience a burning sensation, immediately remove your hand from the lamp.
- Use the 90s Low Heat Mode for sensitive nails or when applying thicker layers of gel.

If these steps do not resolve the issue, please contact Lavinda customer service for further assistance.

SPECIFICATIONS

Model Number	LA-X3-W
Power	48W
Light Source	33 UV/LED Beads (365nm + 405nm)
Timer Settings	10s, 30s, 60s, 90s (Low Heat Mode)
