Troubleshooting

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose connections or uneven assembly.	Ensure all screws and bolts are fully tightened. Check that the frame is assembled on a level surface.
Squeaking noises.	Loose hardware or friction between components.	Retighten all hardware. Apply a small amount of lubricant (e.g., silicone spray) to points of friction if necessary, avoiding fabric.
Parts do not fit together.	Incorrect orientation of parts or manufacturing defect.	Review the assembly instructions carefully to ensure correct part orientation. If parts are damaged or clearly misaligned, contact customer support.
Fabric cover is difficult to clean.	Stain type or improper cleaning method.	Ensure the removable cover is detached for washing. For stubborn stains, consult a professional fabric cleaner.
