# DARAN Portable Power Station User Manual

Model: NEO

[Setup](#) [Operation](#) [Maintenance](#) [Troubleshooting](#) [Specifications](#) [Warranty & Support](#)

## INTRODUCTION

This manual provides essential information for the safe and efficient operation of your DARAN Portable Power Station. Please read it thoroughly before use and retain it for future reference. This power station is designed to provide reliable power for various applications, including outdoor activities, RV use, and emergency home backup.

## 1. SETUP

### 1.1 Package Contents

Verify that all items are present in the package:

- 1 × NEOS Power Station
- 1 × AC Charging Cable
- 1 × User Manual

### 1.2 Initial Charging

Before first use, it is recommended to fully charge the power station. The unit supports multiple charging methods:

- **AC Wall Outlet:** Connect the provided AC charging cable to the power station's AC input port and then to a standard wall outlet. The unit can recharge to 80% in approximately 2 hours.
- **Solar Panel (Optional):** Connect a compatible solar panel (not included) to the DC input port. The power station supports solar input for charging.
- **Car Charger (Optional):** The unit can be charged via a car charging cable (not included) through the DC input port.

Figure 1: Front view of the DARAN Portable Power Station NEO, showing the display and various output ports.

# Power up Anywhere

Speedy recharge always!

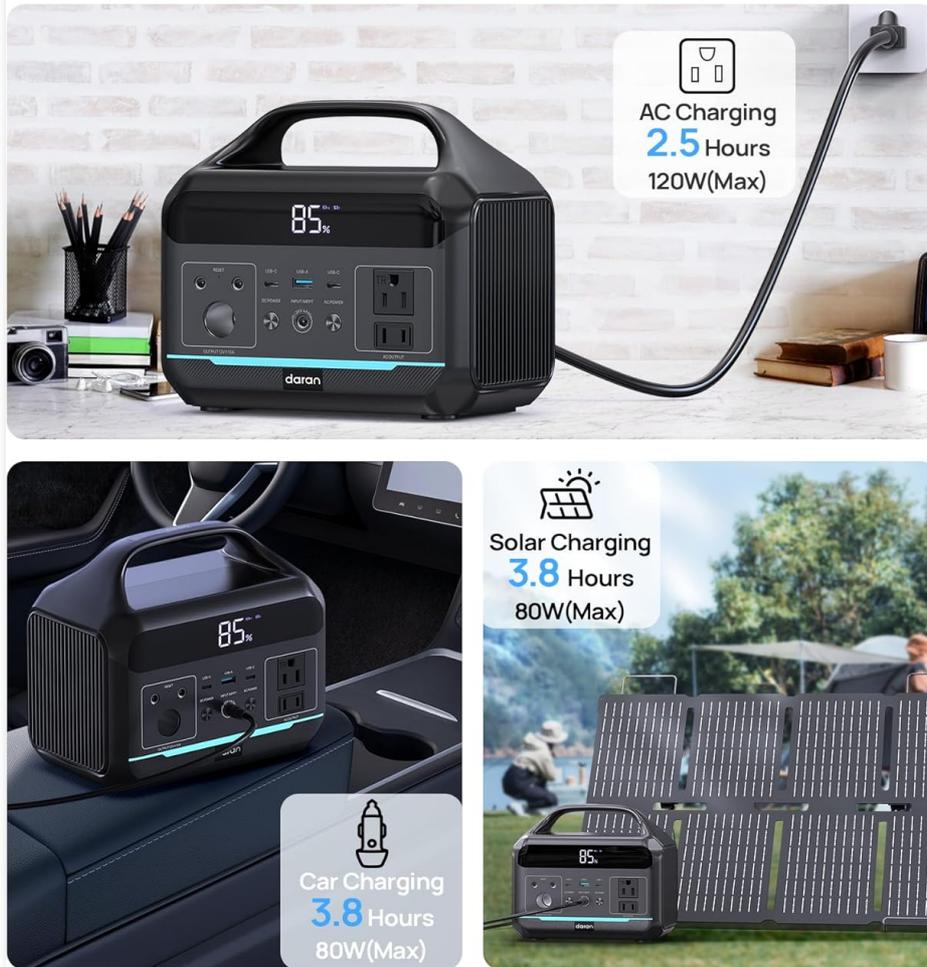

Figure 2: Illustration of the various charging methods for the power station, including AC wall charging, solar charging, and car charging.

## 2. OPERATION

### 2.1 Powering On/Off

To power on the unit, press and hold the main power button. The digital display will illuminate, showing the battery status and output information. To power off, press and hold the main power button again.

### 2.2 Output Ports

The DARAN Portable Power Station features multiple output ports to power various devices:

- **AC Outlets (x2):** Provides 600W continuous power (1200W surge). Suitable for appliances like car refrigerators and CPAP machines.
- **USB-C PD60W (x1):** For fast charging compatible USB-C devices.
- **USB-A (x2):** Provides 18W output for charging smartphones, tablets, and other USB-powered devices.
- **DC Output:** For devices requiring DC power.

**Note:** Ensure that the total power consumption of connected devices does not exceed 600W to prevent overload.

# 8-in-1 Power Station

Great Option for Camping

Type-C x2  
(30W/100W)

USB-A x1  
(18W)

Figure 3: The power station connected to various devices, demonstrating its multi-port functionality for camping and outdoor use.

## 2.3 Integrated LED Light

The power station includes an integrated LED light with multiple modes:

- **Normal Illumination:** Provides steady light for general use.
- **SOS Mode:** Activates a flashing SOS signal for emergency situations.

To activate the LED light, press the dedicated LED button. Press again to cycle through modes or turn off.

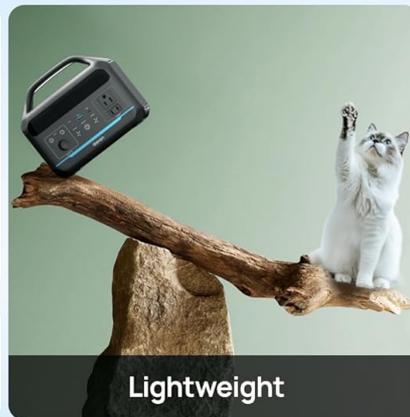

# Seamless Home Backup Power and Outdoor Experience

Quiet

Lightweight

Figure 4: The power station providing illumination via its integrated LED light during an outdoor evening setting.

## 3. MAINTENANCE

### 3.1 Battery Care

The power station uses a LiFePO4 battery, known for its long lifespan and safety. It is designed for 3500+ charge cycles, maintaining approximately 80% of its original capacity after this period.

- For optimal battery health, avoid completely draining the battery frequently.
- Store the unit in a cool, dry place away from direct sunlight and extreme temperatures.
- If storing for extended periods, charge the battery to approximately 50-80% every 3-6 months.

Figure 5: An internal view illustration highlighting the LiFePO4 battery technology and its long cycle life.

### 3.2 Cleaning

Use a soft, dry cloth to clean the exterior of the power station. Do not use abrasive cleaners or immerse the unit in water.

## 4. TROUBLESHOOTING

### 4.1 Common Issues

- **Unit Not Turning On:**  
Ensure the battery is charged. Connect to an AC outlet for at least 30 minutes to see if it powers on.
- **AC Output Not Working:**  
If the battery level is below 10%, the AC port will automatically turn off to prevent battery damage. DC/USB ports will remain available. Check if the connected device exceeds the 600W output limit.
- **Slow Charging:**  
Ensure the charging cable is securely connected. If using solar, verify the solar panel is in direct sunlight and correctly oriented. Check the input wattage displayed on the screen.
- **Overload Protection:**  
The unit has built-in overload protection. If an overload occurs, the unit may shut down. Disconnect the overloaded device, wait a few minutes, and then restart the power station.

### 4.2 Contact Support

If you encounter issues not covered in this section, or if troubleshooting steps do not resolve the problem, please contact DARAN customer service for assistance. Refer to the "Warranty & Support" section for contact information.

## 6. WARRANTY & SUPPORT

### 6.1 Warranty Information

For detailed warranty terms and conditions, please refer to the warranty card included with your product or visit the official DARAN website. The warranty typically covers manufacturing defects and malfunctions under normal use.

### 6.2 Customer Support

If you have any questions, require technical assistance, or need to report an issue, please contact DARAN customer service. Contact information can typically be found on the product packaging, the official DARAN website, or within the included documentation.

When contacting support, please have your product model number (NEO) and purchase date available.
