SETUP

1. Charging the Batteries

Before initial use, fully charge both 1500mAh batteries using the provided Type-C charging cable. A full charge typically takes 2 hours with a 1A+ charger. Each battery provides 4-6 hours of operation depending on the voltage used.

PORTABLE TATTOO BATTERY X2

4V-12V

Output Voltage

2h (1A+ charger)

Charging Time

DC 5V/1A

Input Voltage

4-6h(8V)

Operating Time

62g

2. Attaching the Battery to the Pen

Align the battery pack with the top of the tattoo pen. Gently twist to secure the battery to the pen. Ensure a firm connection for stable power delivery.

Image: Close-up of the wireless battery being connected to the tattoo pen, showing the RCA connection.

3. Inserting a Cartridge Needle

Select the desired sterilized cartridge needle. Carefully push the needle into the front opening of the tattoo pen until it clicks securely into place. Ensure the needle is fully seated to prevent movement during operation.

- 1205RL*5PCS
- 1207RL*5PCS
- 1209RS*5PCS
- 1207RM*5PCS

OPERATING INSTRUCTIONS

1. Power On/Off and Voltage Adjustment

Press and hold the power button on the battery pack to turn the pen on or off. Use the '+' and '-' buttons to adjust the voltage. The pen features 9 adjustable voltage levels, ranging from 4V to 12V. The current voltage will be displayed on the battery screen.

Image: Specifications of the tattoo pen, including working voltage (5-12V), stroke length (3.5mm), and speed (8V 10000RPM).

2. Practice Usage

For beginners, it is highly recommended to practice on the provided thickened practice skin before tattooing on human skin. This allows you to familiarize yourself with the pen's operation, needle depth, and ink flow. Use the included color inks for practice.

11 INK BOTTLES

Meeting every color requirement
for vibrant creations

MAINTENANCE

1. Cleaning the Tattoo Pen

After each use, disconnect the battery and carefully wipe down the exterior of the tattoo pen with a sterile wipe or a cloth dampened with a suitable disinfectant solution. Ensure no liquids enter the internal components. Do not submerge the pen in water or cleaning solutions.

2. Needle Disposal

Always dispose of used cartridge needles in a designated sharps container immediately after use. Needles are single-use and sterilized with EO gas for safety; never reuse them.

3. Battery Care

Store batteries in a cool, dry place away from direct sunlight. Avoid overcharging or completely draining the batteries to prolong their lifespan. If not used for an extended period, charge them periodically to maintain battery health.

TROUBLESHOOTING

- Pen Not Turning On:** Ensure the battery is fully charged and securely attached. Check if the power button is pressed and held correctly.
- Needle Not Moving:** Verify that the cartridge needle is properly inserted and clicked into place. Check the voltage setting; increase if necessary.
- Battery Not Charging:** Confirm the Type-C cable is correctly connected to both the battery and a working power source. Try a different charging cable or adapter if available.
- Excessive Vibration/Noise:** Ensure all components are securely assembled. If the issue persists, contact customer support.

SPECIFICATIONS

Feature	Specification
Model	Wireless Tattoo Pen Kit (ASIN: B0F249Y6WZ)
Brand	POSEIDON
Battery Capacity	2 x 1500mAh Lithium Polymer
Output Voltage	4V-12V (9 adjustable levels)
Charging Time	Approx. 2 hours (with 1A+ charger)
