## 2. Storage Management

Regularly manage your tablet's storage to maintain optimal performance. Delete unnecessary files, uninstall unused apps, and utilize the 2TB TF card expansion for large media files.

## 3. Software Updates

Keep your Android 15 operating system updated to the latest version to benefit from new features, security patches, and performance improvements. Go to **Settings > System > System update** to check for updates.

## 4. Cleaning Instructions

Use a soft, lint-free cloth to clean the screen and body of the tablet. Avoid using harsh chemicals or abrasive materials that could damage the device.

## TROUBLESHOOTING

If you encounter any issues with your Tabwee W90 Tablet, please refer to the following common solutions:

Problem	Possible Solution
Tablet does not power on.	Ensure the battery is charged. Connect the tablet to the charger for at least 30 minutes before attempting to power on again.
Wi-Fi connection issues.	Restart your Wi-Fi router. Go to Settings > Network & internet > Wi-Fi, turn Wi-Fi off and then on again. Forget the network and reconnect.
Apps are slow or crashing.	Close background apps. Clear app cache (Settings > Apps > [App Name] > Storage > Clear cache). Ensure sufficient free storage space.
Screen is unresponsive.	Perform a forced restart by holding the Power button for about 10-15 seconds until the device restarts.
SIM card not detected.	Ensure the SIM card is correctly inserted into the tray. Restart the tablet. Verify that your SIM card is active with your carrier.

If the problem persists, please contact customer support for further assistance.
