Setup and Assembly Instructions

Assembly is designed to be straightforward. It is recommended to have two people for easier and quicker assembly. All necessary tools are included.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a soft, clean surface. Identify each component using the parts list.
2. **Assemble Frame:** Connect the side rails to the end rails using the provided bolts and Allen wrench. Ensure all connections are snug but do not overtighten until the frame is fully assembled.
3. **Install Center Support:** Attach the center support beam to the designated points on the end rails. This beam provides crucial central stability.

4. **Place Slats:** Lay the wooden slats across the frame, ensuring they are evenly spaced and secured according to the instructions. The slats are designed for noise-free support.
5. **Final Tightening:** Once all parts are in place, go back and securely tighten all bolts and screws.

Operating Instructions

Your SunnyFurn platform bed is designed to support a mattress directly, eliminating the need for a box spring. Simply place your Super King size mattress directly onto the wooden slats.

- **Mattress Placement:** Carefully place your Super King mattress onto the assembled slat system. Ensure it is centered and sits flush within the frame.
- **Weight Distribution:** Distribute weight evenly across the bed surface. Avoid concentrating heavy loads in one small area.
- **Floor-Standing Design:** The low-profile, floor-standing design prevents dust accumulation underneath and

provides a stable foundation.

Maintenance

Proper care will extend the life and appearance of your bed frame.

- **Cleaning:** Wipe the wood surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, which can damage the Walnut Wood finish.
- **Hardware Check:** Periodically (every 3-6 months) inspect all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Avoid Moisture:** Protect the bed frame from excessive moisture and direct sunlight to prevent warping or fading of the wood.

Troubleshooting

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose hardware connections.	Check and tighten all bolts and screws. Ensure the frame is on a level surface.
Squeaking noises.	Loose connections or friction between parts.	Re-tighten all hardware. Ensure slats are properly seated and not rubbing against the frame. The design incorporates noise-free features, so check for any misalignments.
Mattress sags in the middle.	Improper slat placement or damaged slats/center support.	Verify that all wooden slats are correctly installed and evenly spaced. Inspect the center support beam for any damage. Ensure the mattress is compatible with a slat foundation.
