FLITI swv-3108

FLITI Brighter Solar Fence Lights User Manual

Model: swv-3108

Introduction

Thank you for choosing FLITI Brighter Solar Fence Lights. These outdoor solar lights are designed to provide efficient and versatile illumination for your backyard, railing, wall, steps, or patio. Featuring three adjustable color temperatures and a durable, waterproof design, these lights offer a convenient and eco-friendly lighting solution.

Setup and Installation

The FLITI Solar Fence Lights are designed for easy installation without the need for complex wiring. Please follow these steps for optimal performance:

1. **Initial Charge:** Before first use, ensure the product is fully charged. Place the lights in direct sunlight for at least 6-8 hours.
2. **Choose Location:** Select a mounting location that receives ample direct sunlight throughout the day to ensure the solar panel can charge effectively. Avoid areas under eaves, trees, or other obstructions that might cast shadows. Also, avoid placing near other strong light sources (e.g., streetlights) as this may interfere with the dusk-to-dawn sensor.
3. **Mounting:**
    - Drill two holes in the desired wall or fence surface.
    - Insert wall plugs (if mounting on masonry) and screws, leaving a small portion of the screw head exposed.
    - Install the base buckle onto the screws.
    - Slide the solar light onto the base buckle until it is securely attached.

Operating Instructions

The FLITI Solar Fence Lights feature a simple operation with multiple lighting modes and automatic functionality.

Light Mode Selection:

Each light offers three distinct color temperatures. Locate the mode selection button, typically on the underside or back of the light, to cycle through the options:

- **Mode 1: Warm White (3000K)** - Provides a cozy and inviting ambiance.
- **Mode 2: Neutral White (4000K)** - Offers a balanced and natural light.
- **Mode 3: Cool White (6000K)** - Delivers a bright and crisp illumination.

The lights include an intelligent memory function, retaining your last selected mode for convenience.

Automatic Dusk-to-Dawn Operation:

The integrated solar panel charges the internal battery during the day. At dusk, the lights will automatically turn on, and at dawn, they will turn off to begin recharging. A full charge can provide over 10 hours of illumination.

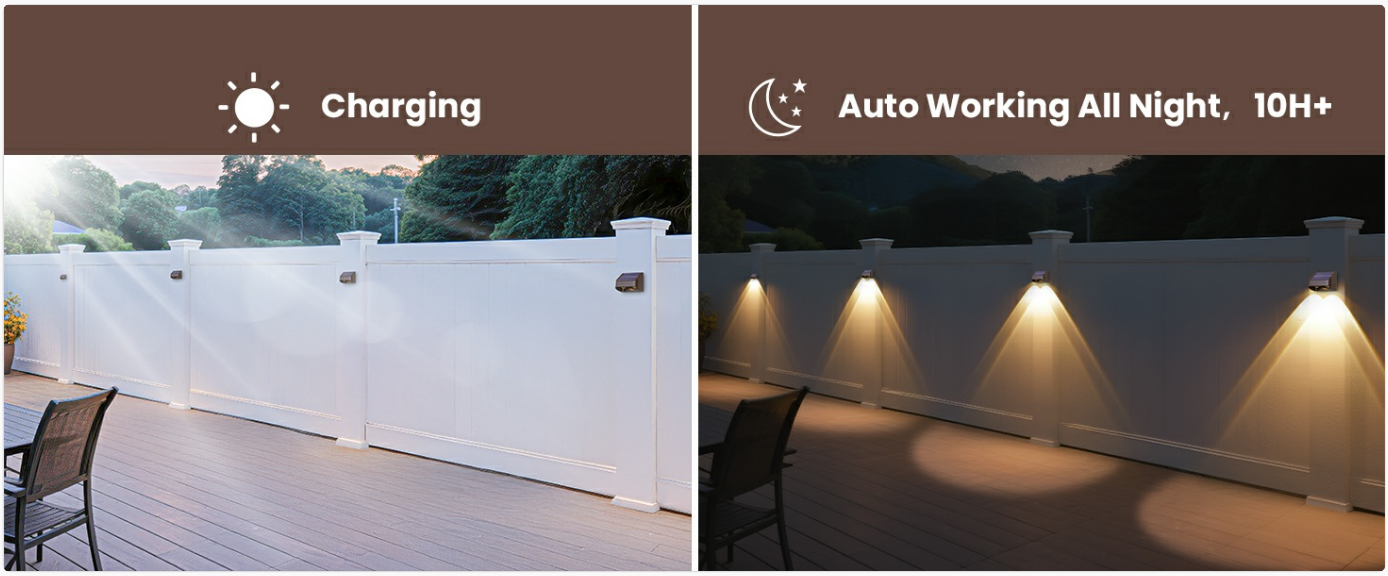

Image: Demonstrates the automatic charging during the day and continuous operation for over 10 hours at night.

Maintenance

To ensure the longevity and optimal performance of your FLITI Solar Fence Lights, consider the following maintenance tips:

- **Clean Solar Panels:** Regularly wipe the solar panels with a soft, damp cloth to remove dust, dirt, or debris. A clean panel ensures maximum sunlight absorption and charging efficiency.
- **Clear Obstructions:** Periodically check that no new obstructions (e.g., growing branches, leaves) are shading the solar panel during the day.
- **Weather Resistance:** The lights are IP65 waterproof, designed to withstand rain, snow, and various outdoor conditions. However, extreme weather events may temporarily affect performance.
- **Battery Life:** The integrated battery is designed for long-term use. If you notice a significant decrease in illumination time, ensure the lights are receiving adequate direct sunlight for charging.

Image: Demonstrates the IP65 waterproof rating, showing the lights enduring rain and thunder, indicating suitability for all weather conditions.

Troubleshooting

If your FLITI Solar Fence Lights are not performing as expected, please refer to the following common issues and solutions:

Problem	Possible Cause	Solution
Light does not turn on at night.	• Insufficient sunlight for charging. • Solar panel is dirty or obstructed. • Light sensor is detecting ambient light.	• Relocate the light to an area with direct sunlight for 6-8 hours daily. • Clean the solar panel surface. • Ensure the light is not placed near other strong light sources (e.g., streetlights, porch lights).
Light duration is shorter than expected.	• Inadequate charging due to cloudy weather or insufficient sunlight. • Battery capacity reduced over time.	• Ensure optimal sun exposure. Performance may vary with seasonal sunlight. • Consider replacing the battery if it's significantly old (check product specifications for battery type).
Light appears dim.	• Insufficient charge. • Dirty lens or LED cover.	• Allow for a full day of direct sunlight charging. • Clean the light's lens and LED cover.

Product Specifications

Feature	Detail
Brand	FLITI
Model Number	swv-3108
Color	Brown
Power Source	Solar Powered
Light Source	LED

Feature	Detail
Lighting Modes	3 (Warm White 3000K, Neutral White 4000K, Cool White 6000K)
Brightness	30 lumens
Battery Capacity	1200mAh (internal)
Water Resistance Level	IP65 Waterproof
Material	Durable weather-resistant ABS
Dimensions (L x W x H)	Approx. 4.59" x 3.22" x 2.25"
Mounting Type	Wall Mount (with screws)
Special Features	Intelligent Memory, Upgraded Focusing Lens, High Energy Conversion Solar Panels
