MAINTENANCE

Proper care will extend the life and appearance of your bed frame.

- **Cleaning Fabric:** For general cleaning, gently vacuum the upholstered headboard and frame to remove dust. For spills, blot immediately with a clean, dry cloth. For stubborn stains, consult a professional upholstery cleaner or use a mild fabric cleaner according to its instructions. Test any cleaning solution on an inconspicuous area first.
- **Frame Care:** Wipe down the metal and wood components with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Hardware Check:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they are tight. Retighten if necessary to maintain stability and prevent squeaks.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading. Position your bed frame away from direct, intense sunlight if possible.

TROUBLESHOOTING

If you encounter any issues with your iPormis Full Platform Bed Frame, refer to the following common problems and solutions:

- **Squeaking Noises:**
 - Ensure all bolts and screws are securely tightened. Loose connections are a common cause of squeaks.
 - Verify that the EVA mute pads are correctly positioned between the slats and the frame.
 - Check if the mattress is properly seated on the slats and not causing friction with the frame.
- **Instability or Wobbling:**
 - Re-check all assembly connections, ensuring every bolt and screw is tight.
 - Ensure the bed frame is on a level surface. Adjust furniture glides or place shims under legs if the floor is uneven.
 - Confirm that all support legs are making firm contact with the floor.
