REEIO Wireless CarPlayBox Adapter User Manual

MODEL: 382FC3F8-73C8-4D50-8966-F53133A0624A

1. Introduction

The REEIO Wireless CarPlayBox Adapter is designed to convert your vehicle's existing wired CarPlay system into a wireless connection. This device also integrates popular streaming services like Netflix and YouTube, and supports TF card media playback, enhancing your in-car entertainment experience. It aims to provide a tidy, wireless, and feature-rich interface for compatible vehicles.

*Convert your wired CarPlay to a wireless connection,
get away from mess wires*

2. Product Features

- **Wireless CarPlay & Android Auto:** Converts wired CarPlay to wireless, and supports wireless Android Auto for compatible devices.
- **Integrated Streaming:** Built-in Netflix and YouTube applications for direct video streaming on your car's display.
- **TF Card Support:** Allows playback of pre-downloaded audio or video content via a TF card, supporting up to 512GB.
- **High-Speed Performance:** Equipped with a high-speed Bluetooth chip for stable and fast connectivity.
- **Plug and Play:** Simple installation with automatic reconnection to previously paired devices.
- **Retains Original Controls:** Maintains functionality of your vehicle's steering wheel controls, knob controls, and voice assistant features.

3. Package Contents

Please verify that all items are present in the package:

- REEIO CarPlay AI Box
- User Manual
- Type A-C USB Cable
- Type C-C USB Cable

Image: Contents included in the REEIO Wireless CarPlayBox package.

4. Setup Instructions

Follow these steps to set up your REEIO Wireless CarPlayBox Adapter:

1. **Connect the Adapter:** Plug the REEIO adapter into your car's USB port that supports wired CarPlay. Use the appropriate USB cable (Type A-C or Type C-C) provided.
2. **Activate WiFi and Bluetooth:** On your smartphone, ensure both WiFi and Bluetooth are enabled.
3. **Pair with Bluetooth:** On your car's display, navigate to the Bluetooth settings. Search for the device name (e.g., "Cxzconcerter-xxxx") and select it to pair. Confirm the pairing code if prompted.
4. **Automatic Connection:** Once paired, the adapter will automatically connect to your phone when you start the car.

5. Operating Instructions

5.1 Using Wireless CarPlay / Android Auto

After successful setup, your smartphone should automatically connect wirelessly to your car's display, providing access to CarPlay or Android Auto features. You can use voice assistants, navigation, music, and phone calls directly through your car's interface.

5.2 Streaming Netflix and YouTube

The adapter has built-in Netflix and YouTube applications. To use them:

1. **Connect to a Network:** Access the network settings within the Android system of the adapter on your car's screen. Search for your phone's hotspot and connect to it. Ensure CarPlay/Android Auto is disconnected before connecting to the network.
2. **Launch Applications:** Select the Netflix or YouTube icon from the car's display to launch the application.
3. **Playback:** Browse and play content. Video smoothness depends on your mobile network connection.

Built-in Netflix, YouTube, you can stream online audio and video from Netflix and YouTube

5.3 TF Card Media Playback

Insert a TF card (up to 512GB) containing audio or video files into the designated slot on the adapter. The system will detect the card, allowing you to access and play your pre-downloaded media.

5.4 Vehicle Control Integration

The REEIO adapter is designed to work seamlessly with your car's existing controls, including steering wheel buttons, central console knob controls, and voice assistant commands (e.g., Siri).

Delivers an unparalleled driving experience for you

You can use voice assistants, voice navigation, music,
phone calls, and so on

7. Troubleshooting

- **No Connection:** Ensure your car has original wired CarPlay functionality. Check that the USB cable is securely connected and that your phone's Bluetooth and WiFi are enabled. Try restarting both your phone and the car's infotainment system.
- **Slow Performance/Lag:** Ensure a strong mobile network signal for streaming services. If using a TF card, ensure the card is not corrupted and has sufficient read/write speed.
- **Netflix/YouTube Not Working:** Verify that your phone's hotspot is active and the adapter is successfully connected to it. Disconnect CarPlay/Android Auto before attempting to connect to the hotspot.

- **Automatic Reconnection Failure:** Ensure the adapter is powered on and your phone's Bluetooth is active. Sometimes, manually selecting the adapter from your phone's Bluetooth settings can re-establish the connection.

8. Specifications
