AIPER Seagull 800b

AIPER Seagull 800B Cordless Robotic Pool Vacuum User Manual

Model: Seagull 800B

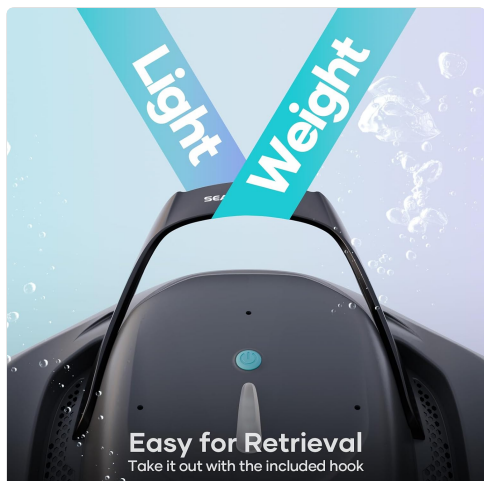

1. INTRODUCTION

This user manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your AIPER Seagull 800B Cordless Robotic Pool Vacuum. Please read this manual thoroughly before first use and retain it for future reference.

The AIPER Seagull 800B is designed for cleaning above-ground flat pools up to 860 sq. ft., offering powerful suction and a 90-minute battery life with self-parking technology.

2. PRODUCT OVERVIEW

2.1 Package Contents

The package includes: 1x Seagull 800B Robotic Pool Vacuum, 1x Charger, 1x User Manual, 1x Retrieval Hook, 2x Brushes,

and 2x Spare Wheels. Ensure all components are present upon unboxing.

2.2 Key Features

- **Cordless Design:** Offers unrestricted movement within the pool.
- **Self-Parking Technology:** Automatically parks near the pool wall when battery is low for easy retrieval.
- **90-Minute Battery Life:** Provides ample cleaning time for pools up to 860 sq. ft.
- **Powerful Suction:** Effectively captures debris, leaves, and fine particles.
- **Built-in Chemical Dispenser:** Aids in balancing and purifying pool water.
- **One-Click Operation:** Simple activation for immediate use.
- **Lightweight:** Weighs only 7.5 lbs for easy handling and draining.

The AIPER Seagull 800B features a sleek, compact design with an integrated handle for easy portability. The top panel includes a power button and LED indicators for battery status.

3. SETUP

3.1 Initial Charging

Before first use, fully charge the robotic pool vacuum. The charging port is located on the underside of the unit. Connect the provided charger and allow approximately 2.5 hours for a full charge. The LED indicator lights will show charging progress.

The LED indicator on the top of the unit provides real-time battery status. During charging, the lights will progressively illuminate. A full charge is indicated when all lights are solid blue.

3.2 Brush Installation

Ensure the brushes are correctly installed on the underside of the unit. They click into place easily. These passive brushes aid in sweeping debris towards the suction inlets.

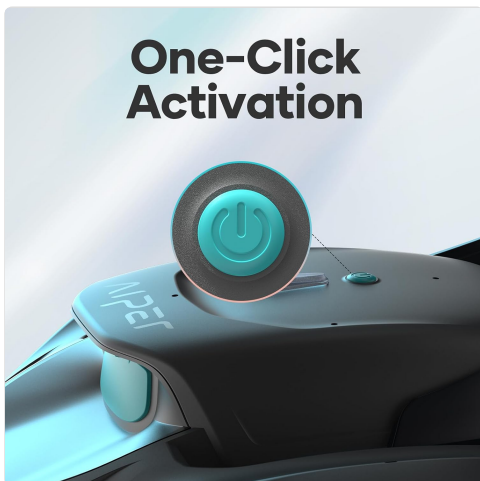

The underside of the vacuum features dual suction inlets and integrated brushes designed to efficiently capture dirt and debris from the pool floor.

4. OPERATING INSTRUCTIONS

4.1 Starting the Cleaning Cycle

1. Ensure the unit is fully charged.
2. Press the power button on the top of the unit until it beeps and the LED lights illuminate.
3. Gently submerge the vacuum into the pool. It will begin its cleaning cycle automatically.

The vacuum is activated with a single press of the power button. Once submerged, it will navigate the pool floor, collecting debris.

4.2 Self-Parking Feature

When the battery is low, the Seagull 800B will automatically navigate to the nearest pool wall and park itself. This makes retrieval simple and convenient, eliminating the need to chase the unit around the pool.

The self-parking technology ensures the robotic cleaner is easily accessible when its cleaning cycle is complete or the battery is depleted.

4.3 Retrieval

Use the provided retrieval hook to lift the vacuum from the pool. The unit is lightweight (7.5 lbs) and drains water quickly (within 15 seconds) for easy removal.

The included retrieval hook attaches to a standard pool pole, allowing for effortless lifting of the vacuum from the water without needing to enter the pool.

4.4 Chemical Dispenser Usage

The Seagull 800B includes a built-in chemical dispenser. Open the designated compartment, insert appropriate pool chemicals (e.g., chlorine tablets), and close securely. The vacuum will distribute the chemicals as it cleans, helping to balance and purify your pool water.

This video demonstrates the features of the AIPER Seagull 800B, including its cordless operation and ability to clean the pool floor. It highlights the convenience of the device for maintaining pool cleanliness.

5. MAINTENANCE

5.1 Cleaning the Filter Basket

It is crucial to clean the filter basket after each use to maintain optimal performance. To access the filter, unlatch the top cover of the unit. Remove the filter and rinse it thoroughly with a garden hose to remove all collected debris and fine

particles. Also, rinse the main debris compartment.

This video shows the process of opening the vacuum and cleaning the filter basket. It emphasizes the ease of maintenance by simply rinsing the filter and the main compartment with a hose.

5.2 Storage

After cleaning, ensure the unit is completely dry before storing. Store the vacuum in a cool, dry place away from direct sunlight and extreme temperatures. For long-term storage, fully charge the battery before storing and recharge every 3 months to prolong battery life.

6. TROUBLESHOOTING

6.1 Common Issues and Solutions

Problem	Possible Cause	Solution
Unit does not turn on.	Low battery; Power button not pressed correctly.	Fully charge the unit; Press and hold the power button until it beeps.
Reduced suction power.	Clogged filter basket; Debris in suction inlets.	Clean the filter basket and clear any obstructions from the suction inlets.
Unit stops prematurely.	Low battery; Unit stuck on an obstacle.	Recharge the unit; Remove any obstacles from the pool floor.
Unit flips upside down.	Uneven pool floor or large debris.	Ensure pool floor is relatively flat; remove large debris manually before operation.
