### 3. SETUP AND INSTALLATION

The Car Tablet is designed for easy installation without modifying your vehicle's existing console.

#### 3.1 Mounting the Display Unit

Choose between the dashboard mount or the suction cup mount based on your preference and vehicle's dashboard design.

1. **Dashboard Mount:** Attach the dashboard mount to the bottom of the display unit. Place the unit on your dashboard in a position that does not obstruct your view or interfere with airbags. Secure it firmly.
2. **Suction Cup Mount:** Attach the suction cup mount to the display unit. Clean the desired area on your windshield or dashboard. Press the suction cup firmly against the surface and engage the locking

mechanism.

## 4. OPERATING INSTRUCTIONS

### 4.1 Initial Setup and Language

Upon first power-on, follow the on-screen prompts to select your preferred language and time zone.

### 4.2 Connecting to Apple CarPlay / Android Auto

The Car Tablet supports both Apple CarPlay and Android Auto for seamless smartphone integration.

1. Ensure Bluetooth is enabled on your smartphone.
2. On the Car Tablet, navigate to the CarPlay or Android Auto icon.
3. Select your phone from the list of available devices to pair.
4. Follow any additional prompts on both your phone and the Car Tablet to complete the connection.
5. Once connected, your phone's compatible apps will appear on the Car Tablet display.

### 4.3 GPS Navigation

Utilize the integrated GPS for real-time navigation. When connected to CarPlay or Android Auto, you can use your phone's navigation apps directly on the Car Tablet display.

## 5. CONNECTIVITY

The Car Tablet offers multiple ways to connect to your vehicle's audio system and other devices.

### 5.1 Bluetooth

Pair your smartphone via Bluetooth to make calls, stream music, and enable CarPlay/Android Auto functionality wirelessly.

### 5.2 AUX Connection

Connect the provided AUX cable from the Car Tablet's AUX output to your vehicle's AUX input for direct audio transmission.

### 5.3 FM Transmitter

The built-in FM transmitter allows you to broadcast the Car Tablet's audio to your vehicle's FM radio. Select an unused FM frequency on the Car Tablet and tune your car radio to the same frequency.

## 6. CAMERA FUNCTIONS

---

The Car Tablet features integrated front and rear cameras for recording and parking assistance.

### 6.1 Dashcam Recording

The front camera records in 4K resolution, and the rear camera records in 1080p. Both cameras can record simultaneously. Recordings are stored on the inserted memory card (64GB included).

### 6.2 Loop Recording

The device supports loop recording, which automatically overwrites the oldest footage when the memory card is full, ensuring continuous recording without manual management.

## 9. MAINTENANCE

To ensure the longevity and optimal performance of your Car Tablet, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the display and exterior. For stubborn smudges, lightly dampen the cloth with water or a screen-safe cleaner. Avoid abrasive materials or harsh chemicals.
- **Temperature:** Avoid exposing the device to extreme temperatures. Do not leave it in direct sunlight for extended periods, especially in hot weather.
- **Storage:** If storing the device for a long period, disconnect it from power and store it in a cool, dry place.
- **Software Updates:** Periodically check for software updates to ensure optimal performance and access to new features.

## 10. TROUBLESHOOTING

If you encounter issues with your Car Tablet, refer to the following common problems and solutions:

- **Device does not power on:**

- Ensure the power cable is securely connected to both the device and the vehicle's cigarette lighter socket.
- Check if the vehicle's cigarette lighter socket is receiving power.

- **No audio output:**

- Verify the volume on both the Car Tablet and your vehicle's audio system is turned up.
- If using FM transmitter, ensure the Car Tablet and car radio are tuned to the same, clear frequency.
- If using AUX, ensure the AUX cable is properly connected to both devices and your car's audio input is set to AUX.
- If using Bluetooth, ensure your phone is properly paired and connected.

- **CarPlay/Android Auto not connecting:**

- Ensure Bluetooth and Wi-Fi are enabled on your smartphone.
- Restart both your smartphone and the Car Tablet.
- Check for any pending software updates on your smartphone or the Car Tablet.

- **Camera image is blurry or black:**

- Clean the camera lens.
- Ensure the camera cable is securely connected to the main unit.
