SETUP

Initial Charging

Before first use, fully charge your earbuds and charging case. Connect the provided USB-C cable to the charging case and a compatible USB power source. The LED digital display on the case will indicate the charging status and remaining

power.

Bluetooth Pairing

The M51-WHITE earbuds feature one-step pairing for convenience.

- 1. First-Time Connection:** When connecting to Bluetooth for the first time, ensure both headphones are taken out of the charging box simultaneously. After approximately 5 seconds, if one headphone's light does not flash, both headphones are connected. You can then turn on Bluetooth on your phone and find the Bluetooth name "M51" to connect. If both earphone lights are flashing, indicating they are not paired, place them back into the charging box. After about 3 seconds, take them out again. If after 5 seconds one light does not flash, they are paired. If not, wait a little longer to see if a match occurs.
- 2. Subsequent Connections:** Once initially paired, the earbuds will automatically connect to your last paired device when you open the charging case lid.
- 3. Troubleshooting Pairing:** If the two headsets are connected to Bluetooth without pairing, you may only connect to one of your headphones and not the other. In this situation, cancel your Bluetooth connection, turn Bluetooth off, then put both earphones back into the charging box. Take them out again and follow the first-time connection steps.
- 4. Language Setting:** If the earbuds are not in English when you first use them, double-click them when they are not connected to your phone to switch to English.

How to use the headset for the first time:

1. When connecting to Bluetooth for the first time, be sure to take out the two headphones charging box, two headphones together, about 5 seconds after the two headphones lights, one of the headphones lights do not flash, then the two headphones are connected. This way you can turn on your phone Bluetooth and find the Bluetooth name connection of your headset. If you take out two earphones, the lights of both earphones have been flashing, indicating that the two earphones are not paired, there is no need to hurry here, you can put the two earphones back into the charging box cover.

After about 3 seconds, then take out again and put together, after 5 seconds or so, one of the headset lights does not flash is paired, if 5 seconds later or not paired, then wait a little longer to see if there is a match, generally this operation can be paired successfully.

2. If two headsets are connected to Bluetooth without pairing, then it may only connect to one of your headphones and the other without sound. At this time, you can cancel your Bluetooth connection, Bluetooth off, and then put the two earphones back into the charging box, and then take out the charging box again according to the first use, and follow the first step.

3. As long as there is no problem when connecting Bluetooth for the first time, when you use the Bluetooth headset later, there is no problem with single use and both use.

4. If the earbuds are not in English when you first use them, double-click them when they are not connected to your phone to switch to English.

OPERATING INSTRUCTIONS

Wearing the Earbuds

The M51-WHITE earbuds are designed for an ergonomic and comfortable fit, especially for side sleepers. Their mini, invisible, and lightweight design (3.0g per earbud) ensures they hug your ear's inner curve for a stable and comfortable experience.

Directional transmission Protecting privacy

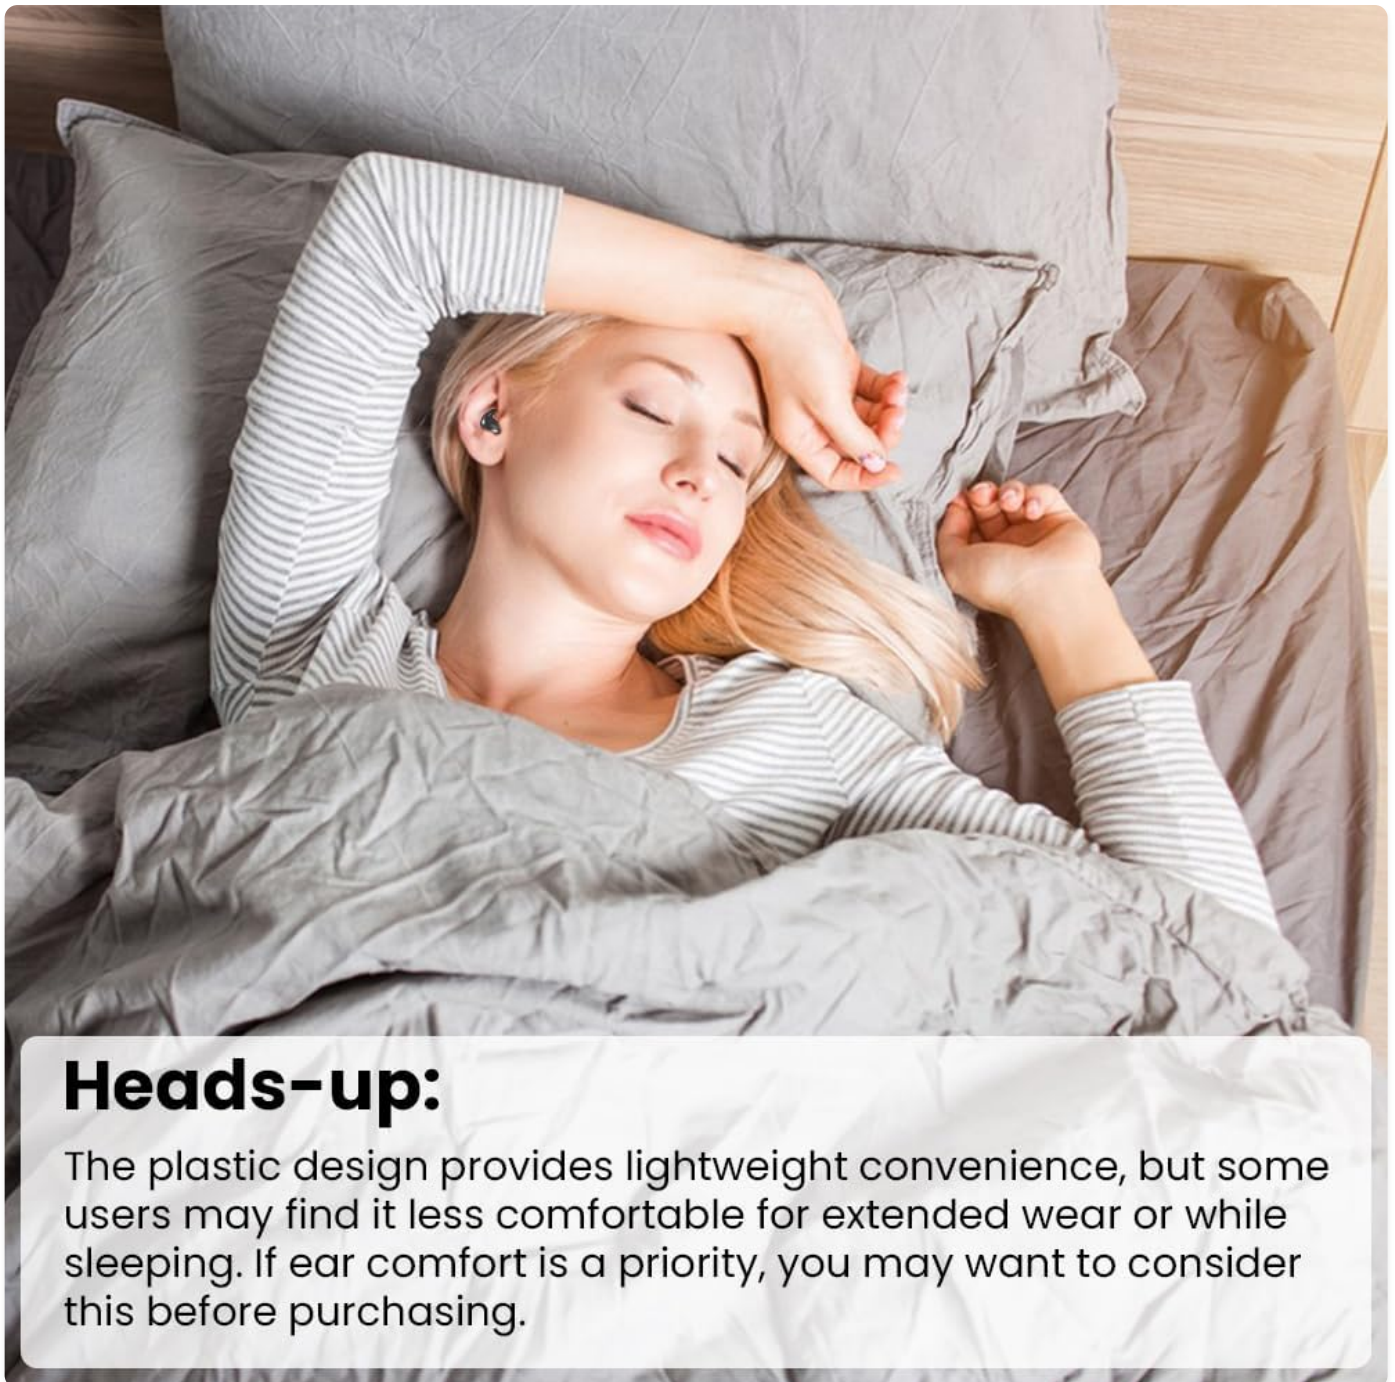

TRANSMISSION

Important Note on Comfort:

The plastic design provides lightweight convenience, but some users may find it less comfortable for extended wear or while sleeping. If ear comfort is a priority, you may want to consider this before purchasing.

Heads-up:

The plastic design provides lightweight convenience, but some users may find it less comfortable for extended wear or while sleeping. If ear comfort is a priority, you may want to consider this before purchasing.

BATTERY LIFE AND CHARGING

The M51-WHITE earbuds offer extended battery life for prolonged use:

- **Earbud Playtime:** 5-7 hours on a single charge.
- **Total Playtime with Charging Case:** Up to 58 hours.

The charging case supports Type-C fast charging for added convenience. The LED digital display on the case allows you to easily monitor the charging status and remaining power of both the case and the individual earbuds.

MAINTENANCE

To ensure the longevity and optimal performance of your Piluyaa M51-WHITE Sleep Earbuds, follow these maintenance guidelines:

- **Cleaning:** Regularly wipe the earbuds and charging case with a soft, dry, lint-free cloth. Avoid using harsh chemicals, cleaning sprays, or abrasive materials.

- **Storage:** When not in use, store the earbuds in their charging case to protect them from dust, dirt, and physical damage. Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Water Exposure:** These earbuds are not waterproof. Avoid exposing them to water, sweat, or high humidity.
- **Charging Port:** Keep the USB-C charging port free of debris.

TROUBLESHOOTING

If you encounter any issues with your Piluyaa M51-WHITE Sleep Earbuds, please refer to the following common solutions:

Problem	Possible Cause	Solution
Earbuds not pairing/connecting.	Incorrect pairing procedure, Bluetooth interference.	Follow the "Bluetooth Pairing" steps carefully. Turn off and on Bluetooth on your device. Ensure earbuds are fully charged.
Only one earbud working.	Earbuds not properly paired with each other.	Place both earbuds back in the charging case, close the lid, wait a few seconds, then take them out again to re-establish connection. Refer to "Bluetooth Pairing" step 1.
Low volume or poor sound quality.	Earbuds not properly seated, low battery, audio source issue.	Adjust earbuds for a snug fit. Charge earbuds fully. Check volume on both earbuds and connected device. Try a different audio source.
Earbuds not charging.	Charging cable issue, dirty charging contacts, faulty power source.	Ensure USB-C cable is securely connected. Clean charging contacts on earbuds and case. Try a different USB-C cable or power adapter.
Touch controls unresponsive.	Temporary software glitch, dirty touch surface.	Place earbuds back in case and take them out again. Clean the touch sensitive area on the earbuds.

If the issue persists after trying these solutions, please contact Piluyaa customer support for further assistance.
