1. INTRODUCTION

Thank you for choosing the WOPET W03 Lite Ceramic Cat Water Fountain. This automatic pet fountain is designed to provide fresh, filtered water for your cats and small dogs, encouraging healthy hydration. Please read this manual thoroughly before use to ensure proper setup, operation, and maintenance.

## **2. IMPORTANT SAFETY INSTRUCTIONS**

---

- Read all instructions before operating the appliance.
- Do not immerse the power adapter or electrical plug in water or other liquids.
- Supervise children when they are near the pet fountain.
- Do not operate the appliance if it has a damaged cord or plug, or if it malfunctions or has been damaged in any manner.
- Use only attachments recommended or sold by the manufacturer.
- Do not use the appliance for anything other than its intended use.
- Unplug the appliance from the outlet when not in use, before putting on or taking off parts, and before cleaning.
- Ensure the power cord is placed where it cannot be tripped over or damaged.
- For indoor use only.

## **3. PRODUCT COMPONENTS**

---

Familiarize yourself with the parts of your WOPET W03 Lite Ceramic Cat Water Fountain:

1. Ceramic Base (Water Reservoir)
2. Ceramic Top Lid
3. Flower Spout (optional)
4. Water Pump
5. Filter Tray
6. Filter (Sponge and Carbon Filter)
7. Power Adapter

# Fresh in Every Drop

6-layer filtration system keep drinking water fresher, healthier, better taste for your fur babies

## 4. SETUP GUIDE

Follow these steps to assemble and prepare your pet fountain for first use:

1. **Unpack Components:** Carefully remove all parts from the packaging.
2. **Clean Components:** Wash the ceramic base, ceramic top lid, and flower spout with warm soapy water. Rinse thoroughly. The ceramic parts are dishwasher-safe.
3. **Prepare Filter:** Rinse the filter under cold running water for several minutes to remove any loose carbon dust.
4. **Assemble Pump:** Attach the filter tray to the water pump. Ensure the sponge filter is placed correctly in the filter tray, followed by the carbon filter.

5. **Place Pump:** Position the assembled pump and filter tray into the designated area in the ceramic base.
6. **Fill Water Reservoir:** Fill the ceramic base with clean water up to the maximum fill line. Do not overfill. The fountain has a 3L (101oz) capacity.
7. **Place Top Lid:** Carefully place the ceramic top lid onto the base, ensuring it sits securely.
8. **Install Flower Spout (Optional):** If desired, insert the flower spout into the opening on the ceramic top lid for a bubbling water flow. For a gentle fountain flow, the flower spout can be omitted.
9. **Connect Power:** Connect the power adapter to the fountain's pump cable, then plug the adapter into a wall outlet.

## 5. OPERATING INSTRUCTIONS

---

Once assembled and plugged in, the WOPET W03 Lite Ceramic Cat Water Fountain will begin operating automatically, circulating and filtering water for your pet.

### 5.1 Water Flow Options

The fountain offers two distinct water flow designs:

- **Flower Waterfall:** Achieved by installing the flower spout. This provides a bubbling, multi-stream flow that many pets find appealing.
- **Gentle Fountain:** Achieved by removing the flower spout. Water gently bubbles up from the center, creating a calm surface flow.

# Two Flow Designs

## 5.2 Water Level Monitoring

Regularly check the water level to ensure the pump is always submerged. The 3L capacity can provide hydration for up to 5 days, but this may vary based on pet size, number of pets, and environmental factors. Refill as needed to prevent the pump from running dry, which can shorten its lifespan.

## 5.3 Ultra-Quiet Operation

The W03 Lite features an ultra-quiet pump designed to operate at approximately 30dB, minimizing noise disturbance for both pets and owners.

Image 5.2: A cat drinking from the fountain while a person sleeps nearby, highlighting the ultra-quiet operation.

## 6. MAINTENANCE AND CLEANING

Regular cleaning and filter replacement are crucial for maintaining water quality and extending the life of your fountain. It is recommended to clean the pump and replace filters every 2 weeks.

### 6.1 Disassembly for Cleaning

1. Unplug the fountain from the power outlet.
2. Remove the ceramic top lid and flower spout.

3. Remove the filter tray and filter.
4. Carefully remove the water pump from the ceramic base.
5. Empty any remaining water from the ceramic base.

## 6.2 Cleaning the Fountain Components

- **Ceramic Parts:** The ceramic base and top lid are dishwasher-safe. Alternatively, wash them with warm soapy water and rinse thoroughly.
- **Pump:** Disassemble the pump by removing the front cover and impeller. Clean all parts with a small brush to remove any hair or debris. Rinse thoroughly.
- **Filter Tray & Spout:** Wash with warm soapy water and rinse.

# Easy-to-Clean

*Image 6.1: The ceramic components of the WOPET W03 Lite fountain are dishwasher-safe for easy cleaning.*

## 6.3 Filter Replacement

Replace the filter every 2 weeks, or more frequently if you have multiple pets or notice reduced water flow. Always rinse new filters before use.

## Keep the Water Clean and Fresh Remove large

- ✓ Food scraps and hair
- ✓ Coconut Shell Activated
- ✓ Carbon can filter out odors and chlorine
- ✓ Microporous Cotton
- ✓ Filter can filter out large residue hair and debris

Image 6.2: The multi-layer filtration system, including sponge and carbon filters, ensures clean and fresh water.

### 6.4 Preventing Chin Acne

The WOPET W03 Lite is made of high-quality ceramic, which is beneficial for pets prone to chin acne or sensitivities, as it is less porous than plastic and easier to keep clean.

# No More Black Chin for Your Kitty

Made of food-grade ceramic  
and easy to clean

Image 6.3: The smooth, non-porous ceramic surface helps prevent chin acne in sensitive pets.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Fountain not dispensing water.	Pump is clogged with debris or hair. Water level is too low. Power adapter is not connected or faulty.	Clean the pump thoroughly, including the impeller. Refill the water reservoir to the appropriate level. Check power connections; try a different outlet.

Problem	Possible Cause	Solution
Water flow is weak.	Filter is dirty or clogged.	Replace the filter.
	Pump is partially clogged.	Clean the pump and impeller.
Fountain is noisy.	Water level is too low.	Add water to the reservoir.
	Pump is dirty or vibrating against the base.	Clean the pump and ensure it is properly seated.
	Impeller is damaged.	Contact customer support if the impeller is damaged.
Water tastes or smells bad.	Filter needs replacement.	Replace the filter.
	Fountain components need cleaning.	Thoroughly clean all fountain components.
