2. SAFETY INFORMATION

- Always follow the provided manual and video tutorials for safe assembly.
- Secure the gazebo to a stable foundation to prevent tipping in high winds or heavy snow.
- Do not attempt to assemble or disassemble the gazebo in adverse weather conditions.
- Ensure adequate clearance around the gazebo for safe use and maintenance.

3. PACKAGE CONTENTS

Your AECOJOY gazebo will be shipped in two separate parcels, which may arrive at different times. Please ensure both packages have arrived before starting the installation process.

Refer to the detailed packing list included with your product to verify that all components are present and undamaged. If

any parts are missing or damaged, please contact AECOJOY customer support immediately.

AVAILABLE IN A VARIETY OF SIZES TO MEET YOUR NEED.

To offer the better support ,comfortable shipping.

4. SETUP AND ASSEMBLY INSTRUCTIONS

The AECOJOY gazebo is designed for lean-to installation, attaching securely to an existing wall. Follow these guidelines for a successful setup:

- 1. Preparation:** Clear the assembly area. Ensure you have a rubber mallet and a power drill, which are essential tools for assembly.
- 2. Frame Assembly:** Assemble the main frame components according to the provided diagrams. Pay close attention to the orientation of screw holes.
- 3. Roof Panel Installation:** For easier installation, it is recommended to assemble the back and front roof panel sections with their middle brackets on the ground first. Then, carefully slide the entire unit into place. This method helps prevent splitting of the panels. Use a flathead screwdriver to gently widen brackets if needed, and a rubber mallet to tap panels into place.
- 4. Wall Attachment:** The gazebo easily attaches to your wall using the provided accessories. Ensure the structure is securely fixed and stabilized on the ground as instructed. Four pre-drilled holes are available on the stable frame legs for easy attachment to any type of floor.
- 5. Stability Features:** The triangular structure and crisscrossing aluminum tubes provide strong support and enhance stability.

For detailed visual guidance, refer to the step-by-step video tutorials available on the product page or contact our technical team for remote assistance.

2 PARCELS WILL BE SHIPPED

possibly arriving at different time

TRIANGLE STURCTURE

The triangular structure makes the hardtop gazebo much stable and sturdy.

STABLE FRAME LEG

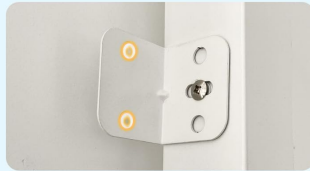

With 4 pre-drilled holes for easy attachment of any type of floor and secure mouting.

MULTI-FRAME SUPPORT

Crisscrossing aluminum tubes offer the strong support for the top panel, never rust.

METOPE FIXED

Four screws are used to connect to the wall to improve stability and can be used in harsh environments.

5. OPERATING INSTRUCTIONS

Your AECOJOY Hard Top Lean-to Gazebo is designed to enhance your outdoor living space with reliable protection:

- **Weather Protection:** The heavily tinted roof panels block harmful UV rays (UPF 50+ and 99% UV protection) and provide shade. The inclined design and meticulous detailing ensure complete water resistance.
- **Snow Load Capacity:** The hard top roof is engineered to withstand significant snow loads, up to 6 lbs/sq.ft, equivalent to approximately 7 inches of heavy snow.
- **Wind Resistance:** When securely fixed and stabilized as instructed, the gazebo can confidently withstand winds of around 70 mph.

6. MAINTENANCE

To ensure the longevity and optimal performance of your gazebo, regular maintenance is recommended:

- **Cleaning:** Clean the roof panels and frame periodically with mild soap and water. Avoid using abrasive cleaners or harsh chemicals that could damage the materials.
- **Fastener Check:** Regularly inspect all bolts, screws, and connections to ensure they remain tight and secure. Tighten any loose fasteners as needed.
- **Panel Inspection:** Check roof panels for any signs of wear, cracks, or damage. Address any issues promptly to maintain waterproof performance.
- **Snow Removal:** While designed for snow load, it is advisable to clear excessive snow accumulation from the roof to prevent potential damage, especially during prolonged heavy snowfall.

7. TROUBLESHOOTING

If you encounter any issues with your AECOJOY gazebo, consider the following:

- **Roof Panels Not Fitting:** If roof panels are difficult to slide or do not fit correctly, re-check the alignment of all frame components. Ensure the frame is square and level. A rubber mallet can be used to gently tap panels into place.
- **Instability:** If the gazebo feels unstable after assembly, verify that all wall attachments and ground anchors are securely fastened. Ensure the gazebo is fixed to a solid, level surface.
- **Water Leakage:** Check for any gaps or misaligned roof panels. Ensure all seals and connections are properly seated. The inclined design is crucial for proper drainage.

For persistent issues or problems not covered here, please contact AECOJOY customer support for expert assistance.

8. SPECIFICATIONS

Feature	Detail
Brand	AECOJOY
Material	Aluminum, Metal, Sun Panels
Product Dimensions (L x W x H)	192" x 96" x 96" (16' x 8' x 8')
Item Weight	170 Pounds
