Yizosh Metal Storage Cabinet (47"H, White) - Instruction Manual

Model: 47"H | Brand: Yizosh

1. INTRODUCTION

Thank you for choosing the Yizosh Metal Storage Cabinet. This manual provides essential information for the safe assembly, operation, and maintenance of your new 47-inch white metal storage cabinet. Please read these instructions carefully before beginning assembly and retain them for future reference.

2. SAFETY INFORMATION

Important Safety Precautions:

- Always assemble the cabinet on a stable, level surface.
- Do not overload the shelves. Each shelf has a maximum load capacity of 180 lbs.
- Keep the cabinet away from heat sources.
- Never use the cabinet as a climbing aid, especially for children.
- Always use appropriate safety gear (e.g., gloves) when assembling or disassembling the cabinet to prevent injury.
- Secure the cabinet to the wall using the included anti-tipping screws to prevent accidental tipping, especially in households with children or pets.

Anti-tipping Design

It can be secured to the wall with the included screws to prevent tipping.

3. PACKAGE CONTENTS

Before assembly, please ensure all parts are present and undamaged. If any parts are missing or damaged, contact customer support.

- Cabinet Panels (Top, Bottom, Sides, Back, Doors)
- 3 Adjustable Shelves
- Adjustable Feet/Legs
- Assembly Hardware (screws, bolts, hinge pins, magnetic catches)
- Anti-tipping Kit (screws, wall anchors)
- Assembly Instructions Manual

4. ASSEMBLY INSTRUCTIONS

The Yizosh Metal Storage Cabinet features a knock-down structure and requires assembly. It is recommended to have a second person for easier assembly, though it can be assembled by one person. A power drill may assist with screw installation.

4.1. Preparation

- Clear a spacious, flat, and clean area for assembly.
- Unpack all components and verify against the package contents list.
- Gather necessary tools: Phillips head screwdriver (or power drill), hammer (optional, for hinge pins), and a small washer (optional, for door alignment).

4.2. Step-by-Step Assembly

1. **Assemble the Base:** Attach the bottom panel to the side panels using the provided screws. Ensure all connections are secure.
2. **Install Adjustable Feet:** Screw the adjustable feet into the designated holes on the bottom of the cabinet. Adjust them later to level the cabinet.
3. **Attach Back Panel:** Secure the back panel to the assembled frame.
4. **Attach Top Panel:** Fasten the top panel to complete the main cabinet structure.
5. **Install Doors:**
 - Insert the top hinge pins into the top panel and the door.
 - For the bottom hinge pin, bend the tab on the door edge with a flat screwdriver and insert the spring end of the pin. Ensure it seats correctly and does not fall into the door channel.
 - If doors rub, a small washer can be placed on the bottom hinge pin before hanging the door to adjust alignment.
6. **Install Magnetic Catches:** Attach the magnetic catches to the cabinet frame and the corresponding plates to the inside of the doors to ensure they close securely.
7. **Insert Shelves:** Place the adjustable shelves into the desired positions. Refer to the "Operating Instructions" section for details on adjusting shelves.
8. **Secure to Wall (Anti-Tipping):** Using the anti-tipping kit, secure the cabinet to a wall. Mark the desired location, drill pilot holes, insert wall anchors (if necessary), and fasten the bracket to the wall and cabinet.

5. OPERATING INSTRUCTIONS

5.1. Adjusting Shelves

The cabinet features 3 adjustable shelves, allowing you to customize storage space for various item sizes. To adjust a shelf:

1. Empty the shelf of all contents.
2. Carefully lift the shelf and remove it from its current position.
3. Re-insert the shelf into the desired slots on the side panels, ensuring it is level and securely seated on all four support points.

6. MAINTENANCE

To ensure the longevity and appearance of your Yizosh Metal Storage Cabinet, follow these maintenance guidelines:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. For stubborn marks, use a mild soap solution and dry immediately with a clean cloth. Avoid abrasive cleaners or harsh chemicals, which can damage the powder coating.
- **Inspection:** Periodically check all screws and connections to ensure they remain tight. Re-tighten if necessary.
- **Load Capacity:** Adhere to the 180 lbs per shelf weight limit to prevent structural damage or deformation.
- **Environment:** While the cabinet is moisture-proof and rust-resistant, avoid prolonged exposure to excessive humidity or

direct water contact.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Doors do not close properly or rub.	Misaligned hinges or uneven cabinet.	Check hinge pins for proper seating. Adjust cabinet feet to ensure it is level. A small washer on the bottom hinge pin can help align doors.
Cabinet feels wobbly or unstable.	Uneven floor surface or loose connections.	Adjust the cabinet's feet to level it on uneven ground. Ensure all assembly screws are tightened. Secure the cabinet to the wall using the anti-tipping kit.

Problem	Possible Cause	Solution
Shelves are difficult to insert or remove.	Shelf is not aligned with slots or cabinet is slightly warped.	Ensure the shelf is perfectly horizontal when inserting. If the cabinet is slightly warped, try gently adjusting the frame while inserting the shelf.
Magnetic door catches are weak.	Magnets or plates are misaligned or damaged.	Check alignment of magnetic catches and plates. Ensure they are securely fastened. If damaged, contact customer support for replacements.
