PeakPursuit 6x6 Ft Portable Outdoor Storage Shelter Shed

Model: euG3bM2zm9M8PgPDs7miQQwBal

Brand: PeakPursuit

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your PeakPursuit 6x6 Ft Portable Outdoor Storage Shelter Shed. Designed for versatility and durability, this shelter offers protection for motorcycles, ATVs, bicycles, small cars, firewood, and gardening tools. Please read this manual thoroughly before assembly and use to ensure proper setup and safe operation.

SAFETY INSTRUCTIONS

- Always secure the shelter to the ground using the provided stakes to prevent it from being blown away by strong winds.
- Avoid prolonged exposure to direct sunlight to minimize UV damage and extend the lifespan of the cover material.
- Ensure the assembly area is clear of obstructions and hazards.
- Do not use the shelter near open flames or heat sources.
- Regularly inspect the shelter for any signs of wear, damage, or loose connections. Address any issues promptly.
- Keep children and pets away from the assembly area.

PACKAGE CONTENTS

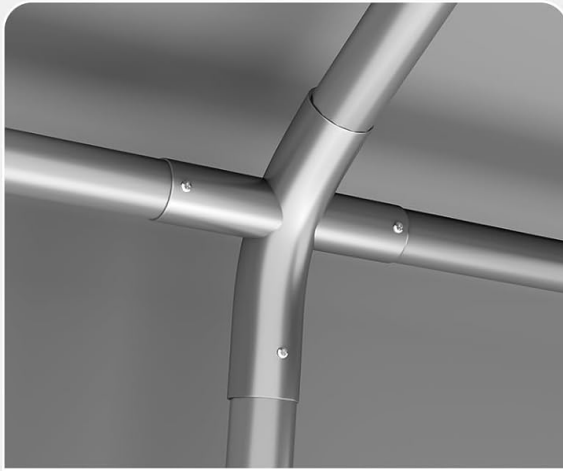

Verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- Galvanized Steel Frame Components (Pipes, Connectors)
- Waterproof PE Tarp Cover
- Ground Stakes and Elastic Ball Straps
- Assembly Hardware (Bolts, Nuts, etc.)

SETUP AND ASSEMBLY

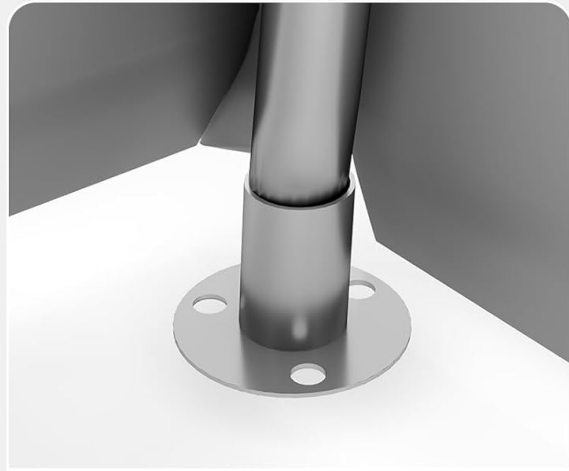

The PeakPursuit storage shelter features a tool-free frame design for fast and hassle-free installation. Assembly is easier with two people.

1. **Unpack Components:** Lay out all frame pipes, connectors, and the tarp cover on a clean, flat surface.
2. **Assemble Base Frame:** Connect the base pipes using the appropriate connectors. Ensure all connections are secure.
3. **Install Vertical Supports:** Attach the vertical pipes to the base frame, forming the upright structure.
4. **Construct Roof Frame:** Assemble the roof frame components, including the galvanized tee pipes and thick connectors, which increase installation efficiency.
5. **Attach Tarp Cover:** Drape the waterproof PE tarp cover over the assembled frame. Ensure it is centered and aligned correctly.
6. **Secure Cover to Frame:** Use the elastic ball straps to securely fasten the canopy to the frame. Ensure the tarp is taut to prevent water pooling.
7. **Anchor to Ground:** Utilize the included ground stakes to provide extra stability, especially in windy conditions. For cement floors, expansion screws are provided.

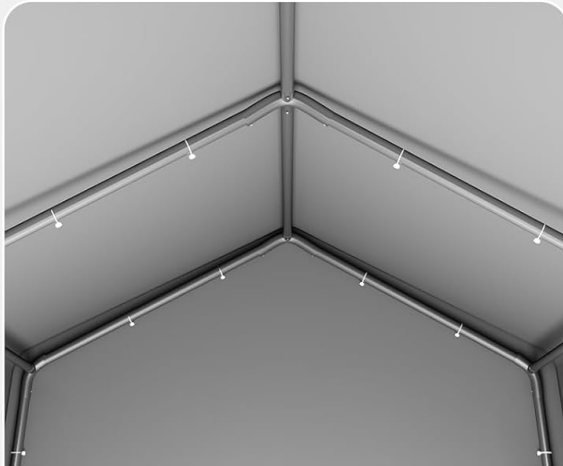

Galvanized Tee Pipe

Easily connect and disassemble the steel tubes

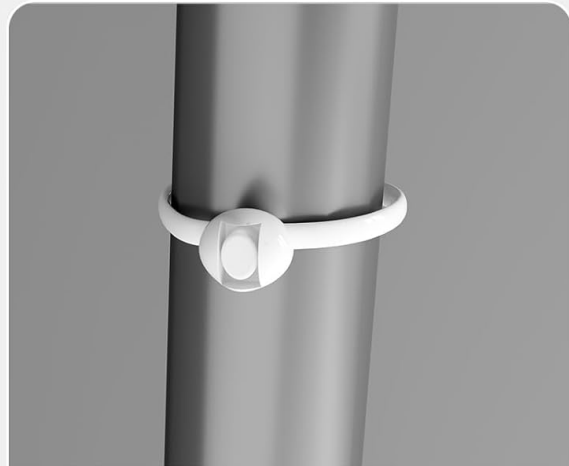

Triangular Structure

Offer sunparalleled stability

Thick connectors

Increase the installation efficiency by 20%

Fix Ground Nails

OPERATING INSTRUCTIONS

Your PeakPursuit storage shelter is designed for ease of use and versatility.

- **Access:** The front and back doors feature dual zippers and buckles. To open, unzip the doors and roll them up, securing them with the buckles for convenient entry and exit.
- **Ventilation:** The shelter is equipped with dual vents on each door. These vents promote airflow, reduce mist buildup, and prevent condensation caused by temperature changes or rain. Ensure vents are clear for optimal performance.
- **Storage:** This shelter is ideal for storing motorcycles, ATVs, bicycles, small cars, firewood, and various gardening tools. Arrange items to allow for proper air circulation and easy access.

MAINTENANCE

- **Regular Inspection:** Periodically check all frame connections, elastic straps, and ground anchors to ensure they are tight and secure.
- **Tarp Condition:** Inspect the tarp cover for any tears, punctures, or signs of wear. Repair small damages promptly to prevent them from worsening.
- **Cleaning:** Clean the tarp cover with mild soap and water. Avoid harsh chemicals that could damage the material. Rinse thoroughly and allow to air dry completely before closing or storing.
- **Snow Removal:** In areas with heavy snowfall, regularly remove accumulated snow from the roof to prevent structural damage.
- **UV Protection:** While the tarp is UV resistant, prolonged exposure to intense sunlight can degrade the material over time. Consider relocating the shelter or adding additional UV protection if possible.

TROUBLESHOOTING

- **Shelter Instability:** Ensure all frame connections are fully tightened and ground stakes are firmly anchored. Add additional anchoring if in a high-wind area.
- **Water Pooling on Roof:** Verify that the tarp is stretched tautly over the frame. Adjust elastic straps as needed to eliminate slack.
- **Condensation Inside:** Ensure the dual vents are open and clear to allow for proper airflow.
- **Zipper Malfunction:** Check for any debris caught in the zipper teeth. Apply a silicone-based lubricant if the zipper is stiff.

SPECIFICATIONS

Brand	PeakPursuit
Model Number	euG3bM2zm9M8PgPDs7miQQwBaI
Size	6' x 6' (36 Square Feet Floor Area)
Color	Gray
Material	Iron (Frame), PE (Tarp)
Frame Material	Iron
Water Resistance Level	Waterproof
Ultraviolet Light Protection	Yes
Item Weight	47.1 Pounds
Product Dimensions (Packed)	51.18"L x 11.93"W x 9.06"H
Assembly Required	Yes
