

Techkey USB 3.0 Flash Drive 512GB

Techkey MFi Certified USB 3.0 Flash Drive 512GB User Manual

Model: USB 3.0 Flash Drive 512GB

1. INTRODUCTION

The Techkey MFi Certified USB 3.0 Flash Drive is a versatile external storage solution designed for seamless data transfer and backup across multiple devices. With a 512GB capacity, it provides ample space for photos, videos, and documents. This drive features a 3-in-1 interface, including Lightning, USB-C, and USB-A connectors, ensuring compatibility with iOS devices (iPhone, iPad), Android phones, and personal computers (Windows, Mac).

This device is MFi certified, ensuring compatibility and reliability with Apple products. Its robust metal construction provides dustproof, drop-proof, and anti-magnetic properties, safeguarding your data.

2. SETUP

2.1 Initial Connection

The Techkey Flash Drive offers plug-and-play functionality for most devices. Simply connect the appropriate connector to your device.

2.2 iOS Devices (iPhone/iPad)

For iOS devices running iOS 12.1 or above, you must download the "U-Disk" application from the Apple App Store. When you first connect the flash drive to your iPhone or iPad, a prompt to download the app may appear. If not, search for "U-Disk" in the App Store and install it manually. This app is essential for managing files, backing up data, and utilizing all features on iOS.

2.3 Android Devices

For OTG-compatible Android phones, no specific application download is required. The device should be

recognized as external storage, allowing you to manage files directly through your phone's file manager.

2.4 PC/Mac Devices

For Windows 7 and above, or Mac OS 10.6 and above, the flash drive functions as a standard USB storage device. No additional software is needed. Connect the USB-A connector to your computer's USB port, and the drive will appear in your file explorer or Finder.

3. OPERATING INSTRUCTIONS

3.1 Connecting the Drive

- **Lightning Connector:** For iPhone and iPad.
- **USB-C Connector:** For newer iPhone/iPad models, Android phones, and some laptops.
- **USB-A Connector:** For traditional computers and laptops.

3.2 Using the U-Disk App (iOS Only)

Once the "U-Disk" app is installed and the drive is connected:

1. **One-Click Backup:** The app allows you to back up photos, videos, and contacts from your iOS device to the flash drive with a single tap. This frees up internal storage on your device.
2. **Direct Sharing:** Share files stored on the flash drive directly to social media platforms (e.g., Facebook) through the app.
3. **In-App Camera:** Use the camera function within the U-Disk app to capture photos and videos, which are automatically saved directly to the flash drive, bypassing your device's internal storage.
4. **Automatic Storage:** All media captured via the in-app camera is automatically saved to designated folders on the U-Disk for easy organization and access.
5. **On-the-Go Playback:** Store movies and music on the flash drive and play them directly from the drive using the app, ideal for travel.

Image: The flash drive connected to an iPhone, highlighting its MFi certification and ability to transfer files between different devices.

3.3 File Management and Transfer

The flash drive supports various file formats for videos, music, pictures, and office documents. Transfer speeds are optimized for efficiency.

- **Videos:** MP4, MOV, RM, RMVB, M4V, FLV, WMV, AVI
- **Music:** MP3, AIF, WAV, AIFF, M4A, WMA, AAC, OGG, FLAC
- **Pictures:** BMP, JPG, GIF, ICO, TIFF, PNG, RAW, XBM

- **Office Documents:** PDF, WORD, EXCEL, RFT, PPT, HTM, HTML, TXT, NUM, BERS, CWR, PAGES

Supports Multiple Formats

Videos	MP4/MOV/RM/RMVB/M4V/FLV/WMV/AVI
Music	MP3/AIF/WAV/AIFF/M4A/WMA/AAC/OGG/FLAC
Picture	BMP/JPG/GIF/ICO/TIFF/PNG/RAW/XBM
Office documents	PDF/WORD/EXCEL/RFT/PPT/HTM/HTML/TXT/NUM/BERS/CWR/PAGES

3.4 Data Encryption

For enhanced security, the U-Disk app allows you to enable Touch ID or a passcode to encrypt the entire flash drive or specific files. This feature protects your sensitive data from unauthorized access.

4. MAINTENANCE

To ensure the longevity and optimal performance of your Techkey Flash Drive, follow these maintenance guidelines:

- **Physical Protection:** The drive is designed to be dustproof, drop-proof, and anti-magnetic. However, avoid exposing it to extreme physical shocks, excessive dust, or strong magnetic fields to prevent potential data loss or damage.
- **Connector Care:** Keep the connectors (Lightning, USB-C, USB-A) clean and free from debris. Avoid forcing connections, and ensure they are properly aligned before inserting into a port.
- **Storage:** When not in use, store the flash drive in a clean, dry environment, ideally using the provided caps to protect the connectors.
- **Safe Removal:** Always safely eject the flash drive from your computer or device before physically removing it to prevent data corruption.

5. TROUBLESHOOTING

If you encounter issues with your Techkey Flash Drive, consider the following troubleshooting steps:

- **Drive Not Recognized by PC/Mac:**
 - Ensure the USB-A connector is fully inserted into a working USB port.
 - Try a different USB port on your computer.
 - Restart your computer.
 - Check if the drive appears in Disk Management (Windows) or Disk Utility (Mac) to confirm it's detected but perhaps not assigned a drive letter or mounted.
- **Drive Not Recognized by iOS/Android Device:**
 - For iOS, ensure the "U-Disk" app is installed and open. Reconnect the drive.
 - For Android, ensure your device supports OTG (On-The-Go) functionality and that it's enabled in settings if required.
 - Ensure the Lightning or USB-C connector is fully and securely inserted.
- **Loose Connection:** If the drive feels loose in the port, gently adjust its position. If the issue persists across multiple devices, the connector on the drive may be damaged.
- **Data Transfer Errors:**
 - Ensure there is sufficient space on the flash drive.
 - Avoid disconnecting the drive during a transfer.
 - If your PC reports errors on the drive, allow the system to scan and fix them.
- **U-Disk App Issues (iOS):**
 - Ensure the app is updated to the latest version.
 - Restart the app or your iOS device.

6. SPECIFICATIONS

Brand	Techkey
Model	USB 3.0 Flash Drive
Memory Storage Capacity	512 GB
Connectivity Technology	USB, Lightning, USB Type C
Read Speed	Up to 40 MB/s
Write Speed	Up to 80 MB/s
Product Dimensions	0.07"D x 3.94"W x 0.07"H (5.43 x 3.94 x 0.04 inches)
Item Weight	2.39 ounces
Special Feature	Wear Resistant
UPC	641837950566

Less than 10z

3-in-1 compact and portable

Shopping, traveling and working can satisfy you at any time.
