Operating your Fesoiu Slushie Machine is straightforward:

3 Smart Preset Modes

Image: A visual guide illustrating the three simple steps to create a frozen drink: 1. Add Drinks, 2. Select a Program, 3. Wait for the Smoothie.

- 1. Prepare Ingredients:** Ensure your liquid mixture has a sugar content of at least 5%. For alcoholic slushies, maintain an alcohol by volume (ABV) between 2.8% and 16%. Stir your mixture thoroughly before pouring into the machine.
- 2. Add Liquid:** Pour your prepared liquid into the transparent barrel. Do not exceed the maximum liquid capacity of 62oz (1.8L). The total barrel capacity is 88oz (2.6L).
- 3. Select Program:** Plug in the machine. Use the control panel to select one of the 3 preset modes:
 - **Slush:** Ideal for classic slushies and frozen cocktails like margaritas.
 - **Milkshake:** Perfect for creamy, thick milkshakes.
 - **Frozen Juice:** For fruit smoothies and frozen juice drinks.
- 4. Adjust Texture:** The machine offers 10 levels of adjustable texture control. Select your desired thickness using the controls.
- 5. Start Operation:** Press the start button. The machine will begin the freezing and mixing process, which typically takes 15-45 minutes depending on the selected program and texture.

Important Tips for Best Results:

- **Sugar Content:** A minimum of 5% sugar content is crucial for proper freezing and texture. Sugar substitutes are not recommended as they may not freeze correctly and could damage the machine. If sugar content is too low, the machine may trigger an alarm.
- **Alcohol Content:** For alcoholic beverages, maintain an alcohol content between 2.8% and 16% ABV. Higher alcohol content can prevent proper freezing.
- **Stirring:** Always stir your mixture thoroughly before pouring it into the machine to ensure even consistency.
