Tiny Love 3333166101

Tiny Love Round Magic Box Baby Footprint Kit

Model: 3333166101 | Brand: Tiny Love

1. INTRODUCTION

The Tiny Love Round Magic Box Baby Footprint Kit allows you to create a lasting keepsake of your baby's handprint or footprint. This kit includes all necessary materials to capture these precious early moments. The clay provided is dermatologically tested for safety.

2. SAFETY INFORMATION

- The clay included in this kit is dermatologically tested and non-toxic. However, it is not intended for consumption.
- Always supervise children during the creation process.
- Ensure the baby's skin is clean and dry before making an impression.
- Wash hands thoroughly after handling the clay.
- Keep all components out of reach of young children when not in use to prevent choking hazards.

3. PACKAGE CONTENTS

Your Tiny Love Round Magic Box Kit contains the following items:

- Round metal box (tinplate)
- Self-hardening clay bag
- Wooden roller

- Small stand for display
- Instruction manual

4. SETUP

Before beginning, ensure you have a clean, flat surface to work on. Prepare the clay as follows:

1. Remove the clay from its packaging.
2. Knead the clay thoroughly for 2-3 minutes until it is soft and pliable. This helps remove air bubbles and ensures a smooth consistency.
3. Place the kneaded clay into the bottom of the round metal box.
4. Use the wooden roller to gently flatten the clay evenly across the bottom of the box, ensuring it fills the space without overflowing. The surface should be smooth and free of cracks.

5. OPERATING INSTRUCTIONS: CREATING THE IMPRESSION

Follow these steps carefully to create a clear and lasting impression:

1. **Prepare the Baby:** Ensure your baby is calm and comfortable. Clean and dry the hand or foot you wish to imprint.
2. **Make the Impression:** Gently but firmly press your baby's hand or foot into the flattened clay. Apply even pressure across the entire surface to ensure a complete impression.

Little moments.
Timeless keepsake

Image 5.1: Demonstrating the process of pressing the baby's foot into the clay.

3. **Remove Gently:** Carefully lift the baby's hand or foot straight up from the clay to avoid smudging the impression.

Dermatologically
tested and safe to use

Image 5.2: A detailed view of a baby's foot making an impression in the clay.

4. **Refine (Optional):** If the impression is not satisfactory, you can re-knead the clay and repeat the process. The clay is moldable until it begins to dry.
5. **Drying:** Once satisfied with the impression, leave the clay in the metal box to air dry. The drying time can vary depending on humidity and temperature, typically taking 24-72 hours. Ensure the clay is completely dry and hardened before handling or displaying.

Includes everything
you need to create
a lasting keepsake

6. MAINTENANCE

Once the clay impression is fully dry and hardened, it requires minimal maintenance:

- Keep the keepsake in a dry environment to prevent moisture damage.
- Avoid direct sunlight or extreme temperatures, which could cause cracking or discoloration over time.
- To clean, gently dust with a soft, dry cloth. Do not use water or cleaning agents.

7. TROUBLESHOOTING

- **Clay is too stiff:** If the clay is difficult to knead, try warming it slightly in your hands or in a sealed bag placed in warm water for a few minutes.
- **Impression is not clear:** Ensure the clay is kneaded thoroughly and flattened evenly. Apply firm, even pressure when making the impression. You can re-knead and try again if needed.
- **Cracks appearing during drying:** This can occur if the clay dries too quickly. Ensure the drying environment is not excessively hot or dry. Small cracks are sometimes a natural characteristic of air-dry clay.

8. SPECIFICATIONS

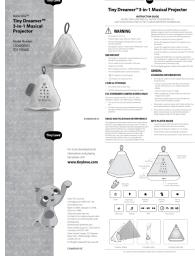

Feature	Detail
Package Dimensions	7.05 x 7.01 x 1.81 inches
Item Weight	4.6 ounces
Manufacturer	Dorel Juvenile
Item Model Number	3333166101
Main Materials	Paper/cardboard, Tinplate, PP, Clay, Pine wood
Clay Ingredients	Water 45-65%, Talc 7-10%, Corn Starch 6-8%, Polyvinyl Alcohol 4-9%, Chloride and Acrylonite Pulp 1-4%, Copolymer of Vinylidene 3-5%, Polycorboxilate surfactant type <1%
Batteries Required	No

9. WARRANTY AND SUPPORT
