### 3. COMPATIBILITY

This autoradio is designed for specific vehicle models. It is compatible with FIAT Ducato 3, Peugeot Boxer, and Citroen Jumper models from 2011 to 2022.

**Important:** Before purchase and installation, verify compatibility by comparing your car's central console with the provided images. If your console matches 'Model A' in the image below, it is compatible. If it matches 'Model B', it is not compatible. Contact customer service if you are unsure.

## CAR MODELS ATTENTION

Please confirm your original car center console before purchase. Our product only supports Model A, not Model B. If you wish to purchase Model B, please contact customer service for recommendations.

## CAR MODELS Attention

Please check your car's center console before making a purchase. Our product is only compatible with the car center console shown in Figure A below. If your car's center console is as shown in Figure B, then it is not compatible. Please contact our customer service for recommendations on suitable products.

## 4. INSTALLATION

Installation of the autoradio requires basic automotive electrical knowledge. If you are not confident in performing the installation yourself, it is recommended to seek professional assistance.

## 4.1. Wiring Connections

Ensure all wiring connections are secure and correctly matched to your vehicle's electrical system. Refer to the wiring diagram for specific connections.

## 7. MAINTENANCE

### 7.1. Cleaning

Regularly clean the screen and exterior of the autoradio with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials that could damage the display or finish.

### 7.2. Software Updates

Check for available software updates periodically to ensure optimal performance and access to the latest features. Follow the on-screen instructions for any updates.

## 8. TROUBLESHOOTING

If you encounter any issues with your autoradio, refer to the following common problems and solutions:

- **Device Fails to Power On:** Ensure all power cables are correctly connected. If the device fails to power on despite correct wiring, disconnect the red wire from the current setup and connect it directly to your vehicle's ACC wire (ignition-switched power source).
- **Unit Does Not Shut Down with Engine Off:** Check if the red ACC wire at the end of the Canbus is energized. If it is, pull out the red wire separately and connect it to your original ACC cable.
- **No Sound:** Verify speaker connections and audio settings (volume, balance, fader). Check if the mute function is active.
- **GPS Signal Loss:** Ensure the GPS antenna is properly installed and has a clear view of the sky.
- **Bluetooth Connection Issues:** Ensure Bluetooth is enabled on both the autoradio and your smartphone. Try unpairing and re-pairing the devices.
