MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your air conditioner.

Filter Cleaning

The unit features a reusable and washable filter. Clean the filter regularly (e.g., every two weeks) to maintain air quality and cooling efficiency.

1. Unplug the air conditioner from the power outlet.
2. Locate and remove the air filter from the back of the unit.
3. Wash the filter under running water with a mild detergent.
4. Allow the filter to air dry completely before reinserting it into the unit.

Figure 9: Reusable and Washable Filter

This image illustrates the process of removing the air filter from the unit and cleaning it under running water, emphasizing its reusability.

Draining Water

The unit collects condensation during operation, especially in dehumidify mode. It may require draining. Refer to the specific drainage ports on your unit. Some models may have a self-evaporative system, but manual draining might still be necessary in high humidity conditions.

Figure 10: Dehumidification Capacity

This image highlights the unit's ability to remove excess moisture, with a capacity of up to 75 pints per day, contributing to a more comfortable environment.

Storage

Before storing the unit for an extended period, ensure it is completely drained of water and the filter is clean and dry. Store in a cool, dry place.

TROUBLESHOOTING

Before contacting customer support, please refer to the following common issues and their solutions:

Problem	Possible Cause	Solution
Unit does not turn on	No power, plug loose, circuit breaker tripped.	Check power cord, wall outlet, and circuit breaker.
Insufficient cooling	Air filter dirty, exhaust hose blocked/leaking, room too large, windows/doors open.	Clean air filter, check hose connection, ensure room size is within specifications, close windows/doors.
"LC" error code	Low condensate level or drainage issue.	Check drainage ports. If the unit is not draining properly, ensure it is on a level surface and the drain plug is open if manual draining is required. If the issue persists, contact support.
Unit is noisy	Unit not on a level surface, fan obstruction.	Place unit on a flat, stable surface. Check for any obstructions in the fan area.
Remote control not working	Batteries dead, obstruction between remote and unit.	Replace batteries. Ensure no obstructions and point remote directly at the unit's receiver.
