## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the Mini PC. Avoid liquid cleaners. Ensure ventilation openings are free from dust.
- **Ventilation:** Ensure the Mini PC is placed in a well-ventilated area to prevent overheating. Do not block the air vents.
- **Software Updates:** Regularly update your operating system and drivers to ensure optimal performance and security.

## TROUBLESHOOTING

- **No Power:**
  - Check if the power adapter is securely connected to both the Mini PC and the power outlet.
  - Ensure the power outlet is functional.
- **No Display:**
  - Verify that the display cable (HDMI, DP, USB4) is securely connected to both the Mini PC and the monitor.
  - Ensure the monitor is powered on and set to the correct input source.
  - Try a different display cable or monitor if available.
- **No Internet Connection:**
  - For wired connections, check the Ethernet cable and router status.
  - For wireless connections, ensure WiFi is enabled and connected to the correct network. Restart your router if necessary.
- **System Slowdown:**
  - Close unnecessary applications.
  - Check for background processes consuming high resources.
  - Ensure adequate ventilation to prevent thermal throttling.
