## 7. TROUBLESHOOTING

Here are some common issues and their potential solutions:

Issue	Possible Cause	Solution
Cat tree feels unstable or wobbly.	Loose connections; not secured to wall; uneven surface.	Ensure all screws and bolts are tightened. Use the anti-tipping strap to secure to a wall. Place on a flat, level surface.
Cats are not using the scratching posts.	Preference for other scratching surfaces; unfamiliarity.	Encourage use by rubbing catnip on the sisal posts. Gently guide your cat's paws to the posts. Ensure other scratching options are less appealing.
Cats are not using the condos or perches.	Unfamiliarity; preference for other resting spots.	Place favorite toys or treats on the perches and inside the condos. Use catnip spray. Ensure the location is quiet and feels safe for your cat.
Sisal rope on posts is fraying excessively.	Normal wear and tear; aggressive scratching.	Some fraying is normal. If excessive, consider replacing the post if possible, or monitor for sharp edges. Ensure cats have other appropriate scratching outlets.
