Robot Vacuum Cleaner Dust Box User Manual

Model: daishengbaihuo524gs | Brand: FUDTYSVC

INTRODUCTION

This manual provides essential information for the proper installation, operation, and maintenance of your FUDTYSVC Robot Vacuum Cleaner Dust Box. This replacement part is designed to ensure continued optimal performance of your robot vacuum cleaner.

Compatibility: This dust box is specifically designed for EU-Reka NER J12 Ultra and Mid-ea V12 Robot Vacuum Cleaners.

PACKAGE CONTENTS

- 1 x Robot Vacuum Cleaner Dust Box

Note: No other accessories or tools are included unless explicitly stated.

SETUP AND INSTALLATION

Follow these steps to correctly install the replacement dust box into your robot vacuum cleaner.

1. **Power Off:** Ensure your robot vacuum cleaner is powered off and unplugged from its charging base before beginning installation.
2. **Remove Old Dust Box:** Locate the existing dust box on your robot vacuum cleaner. Typically, there is a release button or latch. Press or pull this mechanism to carefully remove the old dust box.
3. **Inspect New Dust Box:** Before installation, inspect the new FUDTYSVC dust box for any visible damage. Ensure all seals and filters (if pre-installed) are correctly seated.
4. **Insert New Dust Box:** Align the new dust box with the designated slot in your robot vacuum cleaner. Gently push it into place until you hear a click, indicating it is securely latched.
5. **Verify Installation:** Lightly tug on the dust box to confirm it is firmly in position and does not easily dislodge.

6. **Power On:** You may now power on your robot vacuum cleaner.

OPERATING INSTRUCTIONS

Once installed, the dust box operates as an integral part of your robot vacuum cleaner. Its primary function is to collect dust and debris during cleaning cycles.

- **Regular Use:** The dust box will automatically collect debris as your robot vacuum cleaner performs its cleaning tasks.
- **Monitoring:** Some robot vacuum models may provide notifications when the dust box is full. Refer to your robot vacuum cleaner's main manual for specific alerts.

MAINTENANCE AND CLEANING

Regular cleaning of the dust box is crucial for maintaining the suction power and efficiency of your robot vacuum cleaner.

1. **Remove Dust Box:** Power off the robot vacuum cleaner. Press the release button and carefully remove the dust box.
2. **Empty Debris:** Open the dust box lid (refer to Image 2 for typical opening mechanism) and empty all collected dust and debris into a waste bin.
3. **Clean Filter:** If your dust box includes a removable filter, gently tap it to dislodge dust. For washable filters, rinse under cool running water until clean. Ensure the filter is completely dry before reinserting.
4. **Rinse Dust Box:** The dust box itself can often be rinsed with water. Ensure it is thoroughly dried before reinstallation to prevent mold or damage to the vacuum cleaner.
5. **Reassemble and Reinstall:** Once all components are clean and dry, reassemble the filter (if removed) and reinstall the dust box into the robot vacuum cleaner.

TROUBLESHOOTING

If you encounter issues after installing the new dust box, consider the following:

- **Dust Box Not Fitting:**

- Ensure the dust box is correctly aligned with the vacuum cleaner's slot.
- Verify that your robot vacuum cleaner model (EU-Reka NER J12 Ultra or Mid-ea V12) is compatible with this replacement part.
- Check for any obstructions in the vacuum cleaner's dust box compartment.

- **Reduced Suction Power:**

- The dust box may be full and needs emptying.
- The filter inside the dust box might be clogged and requires cleaning or replacement.
- Ensure the dust box is securely latched, as a loose connection can cause suction loss.

- **Unusual Noises:**

- Confirm the dust box is properly seated and latched.
- Check for any foreign objects trapped within the dust box or its entry point.

SPECIFICATIONS

Product Dimensions and Details

Feature	Detail
Brand	FUDTYSVC
Model Name	daishengbaihuo524gs
Compatible Models	EU-Reka NER J12 Ultra, Mid-ea V12 Robot Vacuum Cleaners
Package Dimensions	1.18 x 0.79 x 0.39 inches

Feature	Detail
Item Weight	1.76 ounces (50 Grams)
