ARK DESIGN Dog Door for Sliding Glass Doors - Model LINJ-DD-1015-7781 Instruction Manual

Brand: ARK DESIGN | Model: LINJ-DD-1015-7781

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your ARK DESIGN Dog Door for Sliding Glass Doors. This product is designed to offer a convenient and secure passage for your large dog through a sliding glass patio door.

Key features include an adjustable height range of 76 1/8"-80 7/8" to fit various sliding door tracks, a pre-assembled design for easier setup, and a 10" wide x 15" high flap suitable for pets up to 90 pounds. The door features a durable aluminum frame, tempered glass, a magnetic sealing flap, and a windproof strip for weather resistance and insulation. Enhanced security is provided by an included lock kit.

SETUP AND INSTALLATION

1. Pre-Installation Checks

Before beginning installation, ensure your sliding glass door track meets the minimum width requirement and measure your pet to confirm the flap size is appropriate.

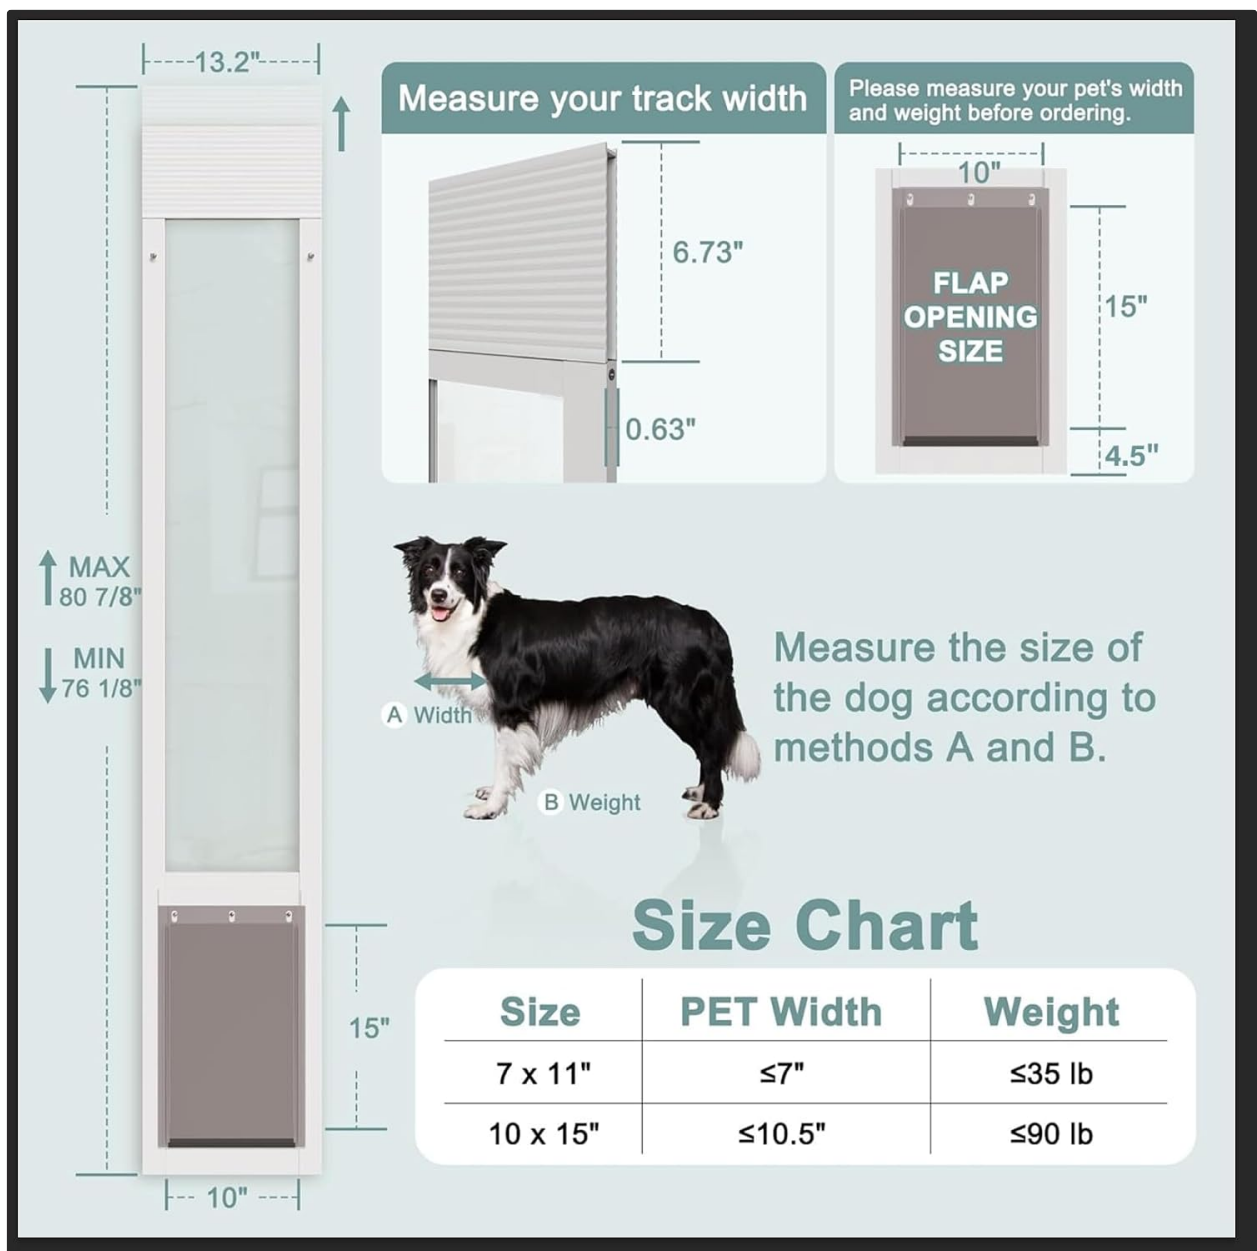

Image 1: Measuring Guide and Size Chart. This diagram illustrates how to accurately measure your pet's width and weight to ensure they fit through the 10" x 15" flap. It also shows how to measure your sliding door track width and the overall height of the dog door insert. A size chart is provided to match pet dimensions with appropriate flap sizes.

Image 2: Installation Overview and Track Requirements. This image provides an overview of the pet door insert installed in a sliding glass door. It highlights the adjustable height range of 76 1/8" - 80 7/8" and notes that the sliding glass door track needs to be at least 7/8" wide for proper installation. It also shows the placement of weather stripping.

2. Unpacking and Components

Carefully unpack all components. Verify that all parts listed below are present.

Image 3: Included Components and Accessories. This image displays all the parts included with your dog door: the preassembled patio panel, a baffle, glass sweep, two rolls of weather stripping, top and bottom anchors with screws, a patio lock with screws, and a pet door lock with screws. Note that some reinforcement accessories may require drilling.

3. Installing the Pet Door Insert

1. Place the pre-assembled pet door insert into the track of your sliding glass door. The spring-loaded design allows it to slide easily.
2. Adjust the height by releasing the knobs on the spring mechanism. The upper frame will extend. Align the upper frame to the top of your patio door frame. Ensure the door and panel sit level on the threshold.

Image 4: Adjusting the Spring Mechanism. This visual guide demonstrates how to adjust the height of the pet door insert. By releasing the knobs, the upper frame extends upwards. The user should align this extended frame with the top of the patio door frame, ensuring the entire unit is level and stable on the threshold.

3. Once the height is set, tighten the screws against the edge of the track to secure the pet door insert.

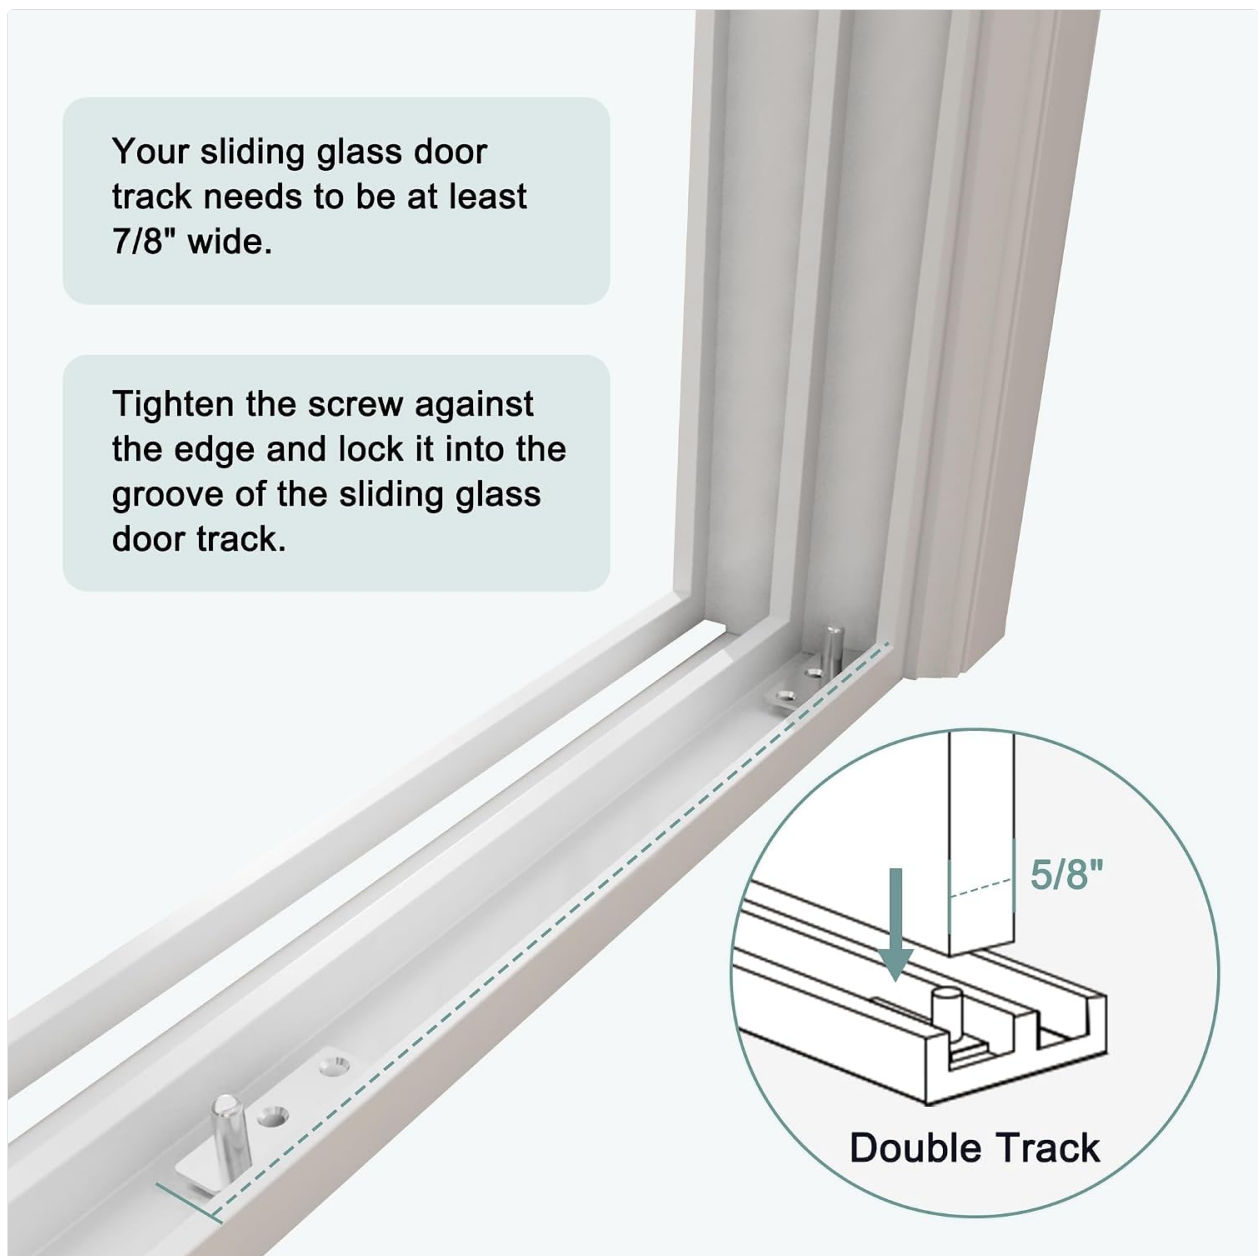

Image 5: Securing the Door in the Track. This close-up view shows the bottom track of the sliding door. It illustrates how to tighten a screw against the edge and lock it into the groove of the sliding glass door track, providing stability and security for the pet door insert.

4. Installing Security Locks

Install the provided patio lock and pet door lock to enhance security. Follow the instructions included with the lock kit for proper placement and attachment. Some installations may require drilling.

SECURE LOCKABLE DESIGN

Image 6: Secure Lockable Design. This image highlights the security features of the dog door. It shows the pet door insert installed in a sliding glass door, with close-ups of the two types of security locks provided: a patio lock and a pet door lock, both with accompanying screws. These locks ensure double stable locking and tiered safety protection.

5. Applying Weather Stripping and Glass Sweep

Apply the weather stripping to the edges of the pet door insert and the sliding glass door to create a tight seal, preventing drafts and insects. Install the glass sweep to protect the gap of your sliding glass door.

Image 7: Product Features. This image highlights key features of the dog door: **Tempered Glass** for high temperature resistance and breakage resistance; **Added Security** through the matching door lock kit; and **Rough Edges** on the flap to make it less likely to blow open, contributing to weatherproofing.

Installation Video Guide

Your browser does not support the video tag.

Video 1: How to Install Patio Pet Door. This official video from Arkdesign provides a visual step-by-step guide on installing the patio pet door. It demonstrates the process from preparing the sliding door track to securing the pet door insert and installing the locks, offering a clear demonstration of the installation procedure.

OPERATING INSTRUCTIONS

1. Using the Pet Flap

The pet flap is designed for easy access for your dog. It features a magnetic seal to help it close securely after your pet passes through, minimizing drafts.

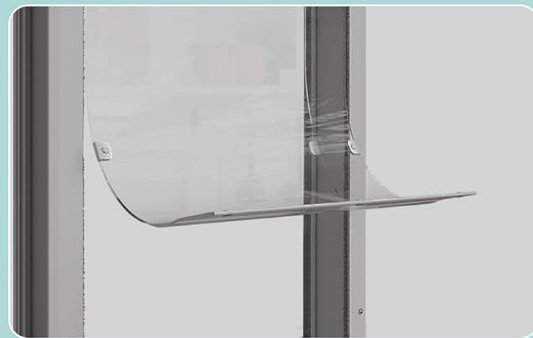

HIGH QUALITY BROWN SINGLE FLAP - NEW UPGRADE

Enhanced durability, protection & privacy for your furry friend's daily use.

✓ Subtle View Obscuring

✓ Tear/Heat Resistant

✗ Thin & Prone to Damage
✗ Full Visibility (No Coverage)

Image 8: Flap Design and Durability. This image details the high-quality brown single flap, highlighting its enhanced durability, protection, and privacy features. It specifically points out that the flap offers subtle view obscuring and is tear/heat resistant, contrasting it with a less durable, fully transparent flap.

2. Using the Sliding Closure Panel

A sliding closure panel is included to restrict access through the pet door when needed. Simply slide the panel into the designated grooves to block the flap opening. Remove the panel to allow pet access.

3. Engaging Security Locks

Utilize the installed patio lock and pet door lock to secure your sliding glass door and the pet door insert. Always engage these locks when you need to ensure the highest level of home security, especially overnight or when away from home.

MAINTENANCE

1. Cleaning the Frame and Glass

Clean the aluminum frame and tempered glass with a mild soap and water solution. Use a soft cloth to avoid scratching. Rinse thoroughly and dry.

2. Cleaning the Pet Flap

The pet flap can be wiped clean with a damp cloth. For deeper cleaning, it may be removed according to the installation instructions in reverse. Ensure it is dry before re-installing.

3. Checking Weather Stripping

Periodically inspect the weather stripping for wear or damage. Replace any worn stripping to maintain optimal insulation and weatherproofing.

TROUBLESHOOTING

- Issue: Drafts or poor seal.**
Solution: Check the weather stripping around the pet door and the sliding glass door. Ensure it is properly installed and not damaged. Replace if necessary. Verify the magnetic seal on the flap is functioning correctly.
- Issue: Pet flap not closing completely.**
Solution: Inspect the flap for any obstructions or debris. Clean the flap and its hinges. Ensure the magnetic strips are clean and aligned.
- Issue: Pet door insert feels loose in the track.**
Solution: Re-check the tension of the spring mechanism and ensure the securing screws in the bottom track are tightened firmly.
- Issue: Sliding glass door does not lock properly after installation.**
Solution: Ensure the patio lock and pet door lock are correctly installed and aligned. Adjust their position if needed to allow for proper engagement with the sliding door frame.

SPECIFICATIONS

Feature	Detail
Model Number	LINJ-DD-1015-7781
Adjustable Height Range	76 1/8" - 80 7/8"
Flap Opening Size	10" (W) x 15" (H)
Maximum Pet Weight	90 lbs
Maximum Pet Width	10.5"
Material	Aluminum Frame, Tempered Glass
