

## Alltotive SD303

# Alltotive S1 Wireless CarPlay Adapter Instruction Manual

Model: SD303 | Brand: Alltotive

## 1. INTRODUCTION

The Alltotive S1 Wireless CarPlay Adapter converts your car's existing wired CarPlay system into a wireless one. This device allows for seamless integration of your iPhone with your vehicle's infotainment system, providing access to navigation, music streaming, hands-free calls, and Siri voice control without the need for a physical cable connection. Enjoy a clutter-free and enhanced driving experience.

## 2. IMPORTANT COMPATIBILITY INFORMATION

Before purchasing and using the Alltotive S1 Wireless CarPlay Adapter, please ensure your vehicle and phone meet the following requirements:

- Your vehicle must be equipped with original wired CarPlay and it must function correctly. Please verify this in your vehicle's menu (e.g., "Vehicle Menu" > "CarPlay Settings").
- Your phone must be compatible with CarPlay (iPhone 6 or higher, iOS 10 or higher).
- The adapter is compatible with OEM vehicles from 2016 onwards that support wired CarPlay.
- **Not compatible with BMW vehicles.**
- **Not compatible with modified vehicles.**
- **Not compatible with Android phones, Android Auto, or older iPhone versions.**

# Primero debe saber

**Por favor, asegúrese de que su coche sea compatible con CarPlay por cable. Puede verificarlo en el sitio web oficial de CarPlay o consultar con su concesionario.**

### Verifique su teléfono

Solo para iPhone 6 o superior y iOS 10 o superior.

### Verifique su coche

Solo para coches con CarPlay por cable.

**No compatible: teléfonos Android, Android Auto o versiones anteriores de iPhone. Nota: No compatible con BMW ni con vehículos modificados.**

### 3. SETUP GUIDE

---

Follow these steps for a quick and easy setup:

1. **Connect the Adapter:** Plug the Alltotive S1 Wireless CarPlay Adapter into the car's USB port that supports data transfer. This is typically indicated by a data symbol next to the port. Avoid using USB ports that are for charging only. This step is primarily for the initial setup.
2. **Wait for CarPlay Interface:** Allow your car's infotainment system to display the CarPlay interface. In some vehicles, you may need to manually select the CarPlay mode.
3. **Enable Bluetooth on iPhone:** On your iPhone, go to "Settings" and then "Bluetooth". Ensure Bluetooth is turned on.
4. **Pair with Adapter:** In the Bluetooth device list on your iPhone, look for a device name starting with "CLZ", "CarPlay", or "SmartBox". Tap on it to initiate the pairing process.
5. **Follow Prompts:** Your iPhone may display pairing requests, such as allowing contact and favorite sync. Accept these prompts to complete the connection.

Once these steps are completed, your iPhone should automatically connect to wireless CarPlay. You will not need to re-pair after the initial setup; the adapter will automatically reconnect via Bluetooth/WiFi when you start your vehicle.

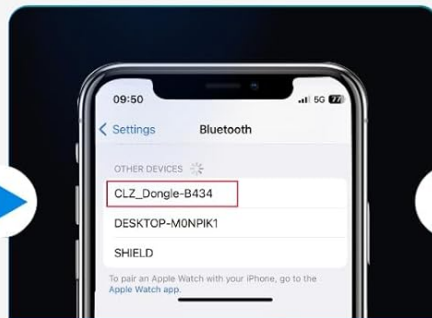

Your browser does not support the video tag.

## 4. OPERATING INSTRUCTIONS

After successful setup, the Alltotive S1 adapter provides a fully wireless CarPlay experience:

- **Automatic Connection:** The adapter will automatically connect to your iPhone via Bluetooth/WiFi each time you start your vehicle, eliminating the need for manual connection.
- **Full CarPlay Functionality:** Enjoy all standard CarPlay features wirelessly, including navigation, music streaming, making and receiving calls, sending messages, and accessing other compatible apps.
- **Retain Original Car Controls:** The adapter maintains compatibility with your car's original control methods. You can continue to use:
  - Steering wheel buttons
  - Touch screen interface
  - Rotary knob controls

- Siri voice commands (e.g., "Hey Siri")
- **Compact Design:** The ultra-compact size of the adapter ensures minimal visibility and avoids interference with your car's interior space, reducing cable clutter.

## 5. MAINTENANCE

To ensure the longevity and optimal performance of your Alltotive S1 Wireless CarPlay Adapter, consider the following maintenance tips:

- **Keep Clean:** Regularly wipe the adapter with a soft, dry cloth to remove dust and debris. Avoid using liquid cleaners directly on the device.
- **Avoid Extreme Temperatures:** Do not expose the adapter to extreme heat or cold, as this can affect its internal components.

- **Secure Connection:** Ensure the adapter is securely plugged into the USB port to prevent accidental disconnections or damage to the port.
- **Firmware Updates:** Periodically check for and install firmware updates to ensure compatibility with the latest iOS versions and car systems, and to improve performance.

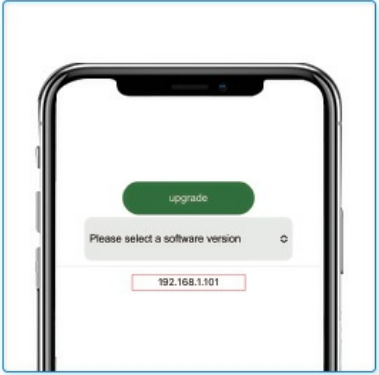

## Actualización OTA en línea

**1**

Conecta el iPhone a la red Wi-Fi "Bluetooth CLZ Dongle -\*\*\*\*" (Contraseña inicial: 12345678)

**2**

Ingresa la dirección IP 192.168.1.101 en la barra de direcciones del navegador Safari, accede a la página de actualización y haz clic en "upgrade".

**3**

Después de completar la actualización, podrás conectar y usar el dispositivo.
