

Homey HOMEY-PRO-MINI-US-01

Homey Pro mini Smart Home Hub User Manual

Brand: Homey | **Model:** HOMEY-PRO-MINI-US-01

INTRODUCTION

The Homey Pro mini is a powerful smart home hub designed to unify and manage all your smart devices from a single platform. It allows you to control and automate your devices, monitor real-time and historical energy usage, and receive sensor alerts. With advanced features like Homey Flow, Energy, Dashboards, and Insights, the Homey Pro mini provides comprehensive control and automation for your smart home ecosystem.

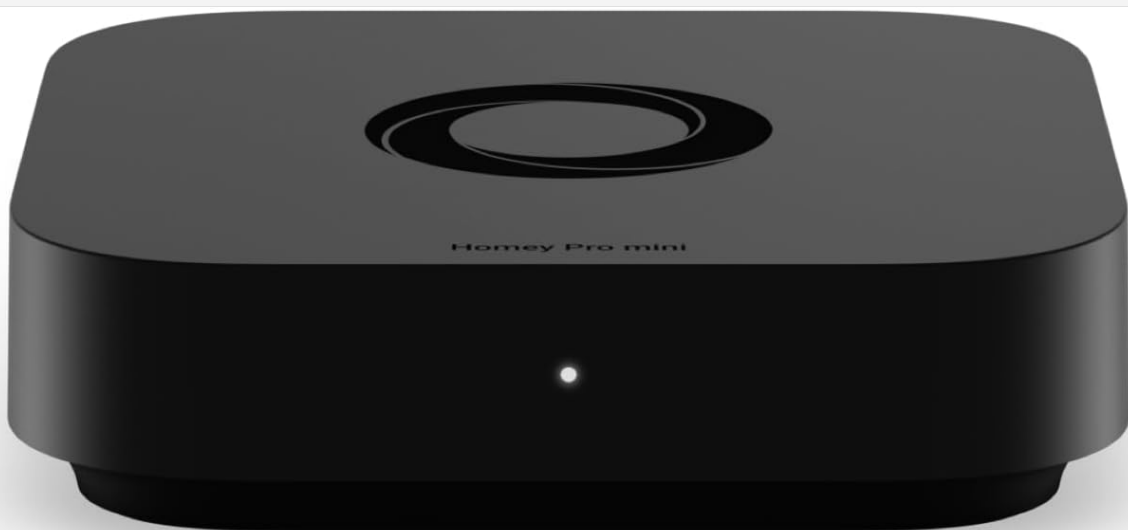

Figure 1: The Homey Pro mini device, showcasing its compact design and front LED indicator.

KEY FEATURES

- **Effortless & Local Smart Home Control:** Automate and manage all your smart devices from one place. Monitor energy usage, receive real-time alerts, and enjoy local data processing for enhanced privacy and reliability, even when the internet is down.
- **Automate Your Life with Homey Flow:** Create personalized routines. Turn off all devices with one tap, play music when you get home, or build advanced workflows with the Homey desktop app for full customization.
- **Works with 1000+ Brands:** Seamlessly integrates with popular smart home brands like Sonos, Philips Hue, Ecobee, LG, Yale, Govee, TP-Link, and more. Access an expanding library of official and community-developed

Homey Apps.

- **Multi-Protocol Compatibility:** Supports Zigbee, Matter, Thread, and Ethernet out of the box.
- **No Subscription Required:** Enjoy unlimited access to all Homey features, including cloud services like remote access and voice assistant integrations (Alexa, Google Assistant, Siri), without a monthly fee.
- **Privacy First with Secure Backups:** Back up your Homey locally or to the cloud to protect settings and automations, with easy restoration.

Easy-to-use interfaces for controlling your devices.

Effortlessly control your smart home from anywhere using your smartphone, tablet, or computer.

Figure 2: Homey's user-friendly interfaces across various devices, demonstrating control and automation capabilities.

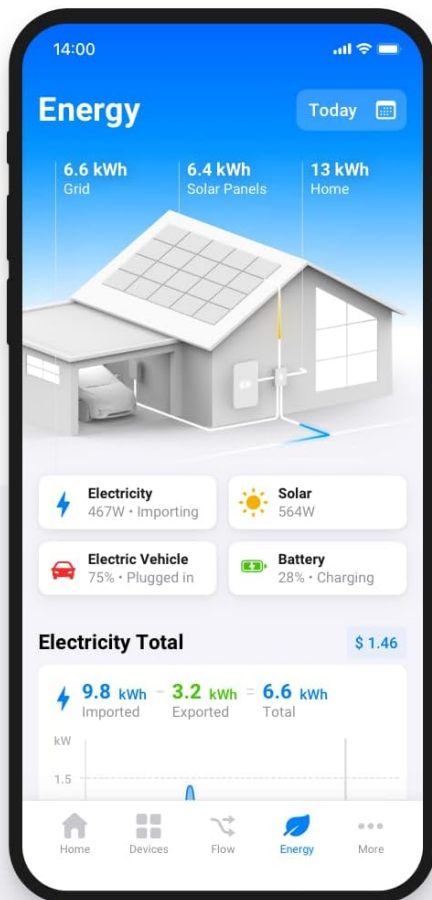

Compatible with the brands you love.

Homey Pro mini is compatible with over 1,000 brands,
including Aqara, IKEA, Sonos, Hue, Yale, TP-Link,
Lutron, ThirdReality, and many more.

Figure 3: Homey Pro mini's broad compatibility with over 1,000 smart home brands.

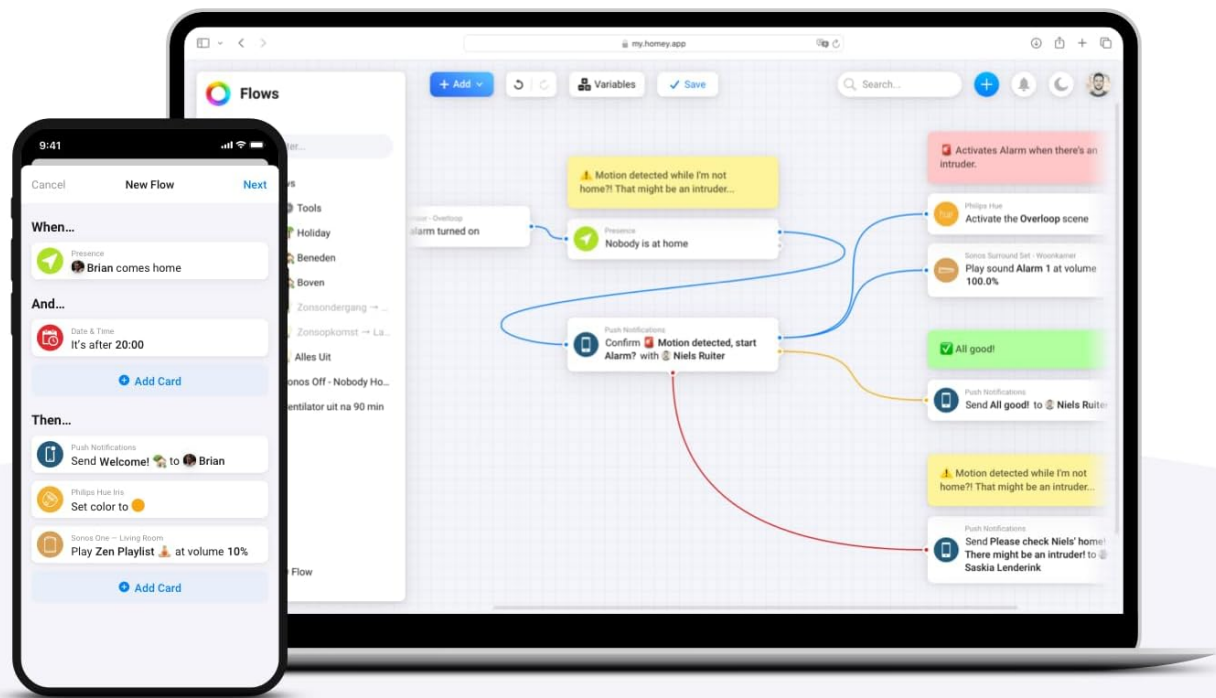

Save on your bill with Homey Energy.

Gain insights into your energy usage and automate savings with Flows. For example, charge your EV when energy prices are at their lowest.

Figure 4: The Homey Energy feature, providing insights into energy consumption and potential savings.

Automate your smart home with Flow.

Let your smart devices work together. Automate your home with Flows on your smartphone or Advanced Flow on your computer.

Figure 5: Automating smart home devices using Homey Flow on mobile and desktop applications.

Compatible with your favorite **voice assistant**.

 Hey Alexa, start movie time!

 Hey Google, close the curtains.

Supercharge your voice assistant by connecting it to Homey Pro mini. Control devices and start Flows directly with your voice.

SETUP GUIDE

What's in the Box

Upon opening your Homey Pro mini package, please ensure all the following components are present:

- Homey Pro mini device
- Power Adapter
- USB-C to USB-C cable
- Ethernet Cable (Cat5e)
- User Manual (this document)

Initial Setup

1. **Power Connection:** Connect the provided USB-C to USB-C cable to the Homey Pro mini and then connect it to the power adapter. Plug the power adapter into a wall outlet. The LED indicator on the Homey Pro mini will illuminate.

2. **Network Connection:** Connect one end of the Ethernet Cable (Cat5e) to the Ethernet port on the Homey Pro mini and the other end to an available LAN port on your internet router or network switch.
3. **Download Homey App:** Download the official Homey app from your smartphone's app store (available for iOS and Android).
4. **Account Creation/Login:** Open the Homey app and follow the on-screen instructions to create a new Homey account or log in with an existing one.
5. **Pairing Homey Pro mini:** The app will guide you through the process of discovering and pairing with your new Homey Pro mini. Ensure your smartphone is connected to the same local network as your Homey Pro mini during this step.
6. **Initial Configuration:** Once paired, the app will prompt you to configure basic settings, such as your home's location and time zone.
7. **Install Apps:** From the Homey app, navigate to the "Apps" section to install apps for the smart devices and brands you wish to connect (e.g., Philips Hue, Sonos, etc.).

OPERATING INSTRUCTIONS

Connecting Smart Devices

After installing the relevant apps for your smart devices, follow the in-app instructions to add and pair each device with your Homey Pro mini. Homey supports various protocols including Zigbee, Matter, and Thread directly. For Z-Wave, Bluetooth, and Infrared devices, a Homey Bridge (sold separately) is required.

Using Homey Flow for Automation

Homey Flow allows you to create powerful automations. Access the "Flows" section in the Homey app or desktop application. Flows are built using "When," "And," and "Then" cards:

- **When:** Triggers for the flow (e.g., "Motion detected," "Time is 7 PM," "Door opens").
- **And:** Conditions that must also be true for the flow to run (e.g., "It's dark outside," "Nobody is home").
- **Then:** Actions Homey performs when the trigger and conditions are met (e.g., "Turn on lights," "Play music," "Send notification").

You can create simple one-tap scenes or complex multi-device automations.

Monitoring Energy with Homey Energy

The Homey Energy feature provides detailed insights into your home's energy consumption and generation. Access it via the "Energy" tab in the Homey app. You can view real-time data, historical trends, and identify opportunities to save energy by integrating energy-monitoring devices and creating energy-aware Flows.

Voice Control Integration

Homey Pro mini integrates with popular voice assistants like Amazon Alexa, Google Assistant, and Apple Siri. To enable voice control:

1. Ensure your Homey Pro mini is connected to the internet.
2. Open the Homey app and navigate to "Settings" > "Integrations."
3. Select your preferred voice assistant and follow the instructions to link your Homey account.
4. Once linked, you can use voice commands to control your devices and activate Homey Flows.

MAINTENANCE

Software Updates

Homey Pro mini receives regular software updates to improve performance, add new features, and enhance security. Ensure your device is connected to the internet to receive these updates automatically. You can check for updates manually in the Homey app under "Settings" > "System."

Cleaning

To clean your Homey Pro mini, gently wipe the exterior with a soft, dry, lint-free cloth. Do not use liquid cleaners, aerosols, or abrasive materials, as these can damage the device.

Secure Backups

Regularly back up your Homey configuration to protect your settings and automations. Homey offers both local and cloud backup options. Access backup settings in the Homey app to schedule or perform manual backups. This ensures you can easily restore your smart home setup in case of an issue.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Homey Pro mini not powering on.	Power adapter not connected or faulty outlet.	Ensure the power adapter is securely connected to the device and a working power outlet. Try a different outlet.
Cannot connect to Homey Pro mini via app.	Network issue, incorrect Wi-Fi/Ethernet connection, or app glitch.	<ul style="list-style-type: none">• Ensure your phone is on the same Wi-Fi network as Homey.• Verify the Ethernet cable is securely connected to both Homey and your router.• Restart your router and Homey Pro mini.• Try restarting the Homey app on your phone.
Smart device not responding.	Device not paired, out of range, or app not installed.	<ul style="list-style-type: none">• Ensure the specific device's app is installed on Homey.• Check if the device is within range of Homey Pro mini.• Try re-pairing the device according to its manufacturer's instructions and Homey app guidance.• Verify the device itself is powered on and functioning.
Flows are not executing.	Incorrect Flow logic, device offline, or conflicting automations.	<ul style="list-style-type: none">• Review the "When," "And," and "Then" cards in your Flow for accuracy.• Check if all devices involved in the Flow are online and responsive.• Temporarily disable other Flows that might conflict.• Check Homey's Insights for any error logs related to the Flow.

SPECIFICATIONS

Attribute	Detail
Model Number	HOMEY-PRO-MINI-US-01
Manufacturer	Athom B.V.
Dimensions (L x W x H)	3.9 x 3.9 x 1 inches
Item Weight	1.19 pounds
Color	Black
Connectivity	Zigbee, Matter, Thread, Ethernet (Z-Wave, Bluetooth, Infrared via Homey Bridge)
