If your toast isn't quite dark enough, the 'A Bit More' function allows you to add a short, additional toasting cycle without resetting the browning control.

1. After a toasting cycle has completed and the toast has risen, if you desire a darker shade, simply press the 'A Bit More' button.

- 2. The toaster will lower the toast for a short, additional period.
- 3. The toast will automatically rise when the 'A Bit More' cycle is complete.

Canceling Toasting

To stop the toasting cycle at any time, press the Cancel button. The toast will immediately rise.

Lift & Look Feature

The one-touch Lift & Look feature allows you to check the browning progress without interrupting the toasting cycle. Simply press the Lift & Look button (or gently lift the motorized carriage lever if applicable), and the toast will temporarily rise for inspection. Release the button/lever, and the toast will lower to continue toasting.

MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the life of your toaster.

- 1. **Unplug:** Always unplug the toaster from the power outlet and allow it to cool completely before cleaning.
- 2. **Clean Exterior:** Wipe the exterior of the toaster with a soft, damp cloth. Do not use abrasive cleaners, scouring pads, or harsh chemicals, as these can damage the finish.
- 3. **Empty Crumb Tray:** Pull out the crumb tray located at the bottom of the toaster. Empty crumbs into a waste bin. Wipe the tray clean with a damp cloth and dry thoroughly before reinserting. Ensure the crumb tray is fully pushed in before operating the toaster.
- 4. **Do Not Immerse:** Never immerse the toaster body, cord, or plug in water or any other liquid.
- 5. **Food Stuck:** If food becomes stuck in the toasting slots, unplug the toaster and allow it to cool. Carefully remove the food using non-metallic tongs or a wooden utensil. Do not use metal objects as they can damage the heating elements or cause electric shock.
