

SINO-SEAR GmbH Press On Nails (B0F2WN9JBL)

SINO-SEAR GmbH Press On Nails User Manual

Model: Press On Nails (B0F2WN9JBL)

1. INTRODUCTION

Thank you for choosing SINO-SEAR GmbH Press On Nails. This user manual provides comprehensive instructions for the proper application, care, and maintenance of your new coffin-shaped, glossy, full-cover acrylic false nails. Designed with elegant French tips and unique zebra strip designs, these artificial ballerina square fake nails offer a stylish and convenient alternative to traditional manicures. Please read this manual thoroughly before use to ensure optimal results and longevity of your press-on nails.

2. SAFETY INFORMATION

- **Keep out of reach of children:** Small parts may pose a choking hazard.
- **Avoid eye contact:** If adhesive comes into contact with eyes, flush immediately with water and seek medical attention.
- **Skin irritation:** Discontinue use if redness, itching, or irritation occurs around the nail area. Consult a dermatologist if symptoms persist.
- **Do not force removal:** Forcing removal can damage natural nails. Follow the removal instructions carefully.
- **Flammable:** Keep adhesive away from open flames or high heat.

3. PACKAGE CONTENTS

Your SINO-SEAR GmbH Press On Nails package typically includes:

- Assorted sizes of Press On Nails (Coffin Long Length, Glossy Full Cover Acrylic, French False Nails with Zebra Strips Designs)

- Nail adhesive (glue or adhesive tabs)
- Mini nail file/buffer
- Wooden cuticle stick
- Alcohol prep pad (for nail cleaning)

Note: Actual contents may vary slightly based on the specific product variant.

4. SETUP AND APPLICATION

Follow these steps for a flawless application:

1. Prepare Natural Nails:

- Clean your natural nails thoroughly with soap and water, then dry completely.
- Gently push back cuticles using the wooden cuticle stick.
- Lightly buff the surface of your natural nails with the provided mini nail file to create a rough texture for better adhesion.
- Wipe each nail with the alcohol prep pad to remove any oils or dust. Ensure nails are completely dry before proceeding.

2. Select Nail Sizes:

Lay out the press-on nails and select the correct size for each of your natural nails. The press-on nail should fit snugly from sidewall to sidewall without overlapping your skin or leaving gaps. If between sizes, choose the smaller size.

3. Apply Adhesive:

- **For Glue:** Apply a small drop of glue to the back of the press-on nail and a small drop to your natural nail. Do not over-apply.
- **For Adhesive Tabs:** Select the tab size that best fits your natural nail. Peel the tab and press it firmly onto your natural nail, then peel off the top protective film.

4. Attach Press On Nail:

Align the press-on nail with your cuticle, ensuring it is straight. Press down firmly from the cuticle towards the tip, holding for 20-30 seconds to ensure a strong bond. Apply one nail at a time.

Figure 4.1: Example of applied SINO-SEAR GmbH Press On Nails. The image shows a hand adorned with long, coffin-shaped press-on nails. Each nail features a natural nude base, transitioning into a vibrant blue tip, elegantly outlined with a thin gold line. The design gives a sophisticated and modern French manicure look. Various rings are worn on the fingers, complementing the nail aesthetic.

5. OPERATING AND DAILY CARE

To maximize the wear time and appearance of your press-on nails:

- **Avoid Water Exposure:** For the first hour after application, avoid prolonged exposure to water to allow the adhesive to fully cure.
- **Gentle Handling:** Be mindful of your nails when performing tasks that could cause impact or snagging. Avoid using your nails as tools.
- **Moisturize:** Keep your hands and cuticles moisturized, but avoid getting oil directly under the press-on nails, as this can weaken the adhesive.
- **Cleaning:** You can gently clean the surface of the nails with a soft cloth and mild soap if needed.

6. MAINTENANCE AND REMOVAL

Proper removal and maintenance can allow for reusability of your press-on nails.

6.1. Removal

To remove the nails without damage:

1. **Soak:** Soak your hands in warm, soapy water for 10-15 minutes. Adding a few drops of cuticle oil or olive oil can help loosen the adhesive.
2. **Gently Lift:** Using the wooden cuticle stick, gently pry up the edges of the press-on nail, starting from the cuticle area. Do not force it.
3. **Repeat Soaking:** If a nail is stubborn, soak for a few more minutes and try again.
4. **Clean Up:** Once removed, gently buff off any remaining adhesive from your natural nails and the back of the press-on nails. Moisturize your hands and nails.

6.2. Reusability and Storage

These nails are designed for multiple uses if cared for properly:

- After removal, ensure all old adhesive is cleaned off the back of the press-on nails.
- Store the nails in their original packaging or a small, clean container to prevent damage and loss.
- When reapplying, use fresh adhesive or tabs.

7. TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|--|--|--|
| Nails not sticking / falling off quickly | Natural nails not properly cleaned/prepped (oils, dust). Insufficient adhesive. Nail size mismatch. Exposure to water too soon after application. | Ensure nails are thoroughly cleaned and buffed before application. Use alcohol prep pad. Apply adequate amount of glue/adhesive tab. Select the correct nail size for a snug fit. Avoid water for at least one hour post-application. |
| Nails look unnatural or bulky | Incorrect nail size chosen. Improper alignment during application. | Carefully select the best fitting nail for each finger. Align the press-on nail precisely with your cuticle before pressing down. |
| Damage to natural nails upon removal | Forcing removal without proper soaking. | Always soak nails in warm, soapy water for 10-15 minutes before attempting removal. Gently lift with a wooden stick; do not pull or rip. |

8. SPECIFICATIONS

| | |
