Hooke Road Aluminum JK Inner Fender Liners Instruction Manual

Model: Z.BXG.2113+2118

Brand: Hooke Road

1. PRODUCT OVERVIEW

The Hooke Road Aluminum JK Inner Fender Liners are designed to provide enhanced protection and a rugged aesthetic for 2007-2018 Jeep Wrangler JK and JKU 2/4 Door models, including Unlimited, Sports, Sahara, Freedom, Rubicon, and X variants. These liners shield your vehicle's wheel wells from environmental elements such as gravel, mud, and debris, while also offering a clean, finished appearance.

Crafted from durable 14-gauge (0.064-inch) aluminum sheet, these fender liners are lightweight yet robust. They feature a black powder-coated finish for excellent corrosion resistance and to prevent rusting. The design includes a distinctive star logo and a light gray plastic backing plate that can be customized with paint to match your vehicle's style.

These fender liners are engineered to integrate seamlessly with most aftermarket shock lift systems, providing ample clearance for larger tires and reserving space for modified accessories. The precision-cut shape ensures a perfect fit along the vehicle's body lines.

3. INSTALLATION GUIDE

3.1. Tools Required

- Basic Hand Tools
- Power Drill
- Self-drilling screws (provided)

3.2. General Installation Notes

Installation of the Hooke Road Inner Fender Liners is designed to be a simple bolt-on process. All necessary mounting hardware and clear instructions are included in the package. For the front inner fender installation, some drilling will be required, and self-drilling screws are provided to facilitate this step.

3.3. Front Inner Fender Liner Installation

The front inner fender liners are designed to fit precisely, enhancing the vehicle's appearance and protection.

Ensure proper alignment before securing. Drilling is required for these components.

4. USAGE AND BENEFITS

Once installed, your Hooke Road Inner Fender Liners provide several key benefits:

- **Enhanced Protection:** Effectively shields your wheel wells from gravel, mud, and debris encountered during on-road and off-road driving.
- **Clean Appearance:** Adds a finished and rugged look to your vehicle's wheel wells, covering exposed components.
- **Off-Road Compatibility:** Designed to work well with most aftermarket shock lift systems, ensuring proper clearance for larger tires and modified accessories.
- **Durability:** Constructed from 14-gauge aluminum with a black powder-coated finish for long-lasting performance and resistance to corrosion.

5. MAINTENANCE

To ensure the longevity and appearance of your Hooke Road Aluminum JK Inner Fender Liners, follow these simple maintenance guidelines:

- **Regular Cleaning:** Periodically clean the fender liners with mild soap and water to remove accumulated dirt, mud, and road grime. Rinse thoroughly.
- **Inspect for Damage:** After off-road excursions or significant impacts, inspect the liners for any signs of damage, such as dents, cracks, or loose fasteners.
- **Check Fasteners:** Ensure all mounting hardware remains tight. Re-tighten any loose bolts or screws as needed to prevent rattling or detachment.
- **Powder Coat Care:** The black powder-coated finish is durable, but avoid using abrasive cleaners or harsh chemicals that could damage the coating.

6. TROUBLESHOOTING

While these fender liners are designed for durability and ease of installation, minor issues may arise. Here are some common troubleshooting tips:

- **Rattling Noise:** If you hear rattling from the fender liners, check all mounting points. Loose fasteners are the most common cause. Tighten all bolts and screws securely.
- **Improper Fit:** If the liners do not seem to fit correctly, double-check that you have the correct liners for the front and rear, and for the correct side of the vehicle (left/right). Refer to the installation instructions to ensure all steps were followed precisely.
- **Damaged Finish:** Minor scratches on the powder coat can often be touched up with a suitable black automotive paint. For significant damage, consider professional re-coating.

If you encounter persistent issues not covered here, please contact Hooke Road customer support for assistance.

7. SPECIFICATIONS

Attribute	Detail
Model Number	Z.BXG.2113+2118
Compatibility	2007-2018 Jeep Wrangler JK & Unlimited 2/4 Doors
Material	14-gauge (0.064-inch) Aluminum Sheet
Finish	Black Powder-Coated
Color	Black
Auto Part Position	Front, Rear
