MAINTENANCE

To ensure the longevity and appearance of your Klaxon Office Table, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the surfaces with a dry, soft cloth regularly to remove dust and dirt. For stubborn marks, use a slightly damp cloth and immediately dry the surface. Avoid abrasive cleaners, harsh chemicals, or excessive water, as these can damage the laminated finish.
- **Spills:** In case of liquid spills, wipe them immediately with a dry cloth to prevent moisture absorption and potential damage to the wood and finish.
- **Stability Check:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary to maintain the table's stability and structural integrity.
- **Environmental Conditions:** Avoid placing the table in direct sunlight or near heat sources, as prolonged exposure can cause warping, fading, or discoloration over time. Maintain a stable room temperature and

humidity.

TROUBLESHOOTING

Table is wobbly after assembly.

Ensure all screws and bolts are fully tightened. Check that the table is placed on a flat, even surface. If the floor is uneven, consider using furniture pads or shims to level the table.

Keyboard tray does not slide smoothly.

Check the alignment of the sliding rails. Ensure no debris or obstructions are present in the rails. A small amount of silicone lubricant can be applied to the rails if needed, but avoid oil-based lubricants.

Missing parts during assembly.

Double-check all packaging materials and the parts list. If parts are still missing, contact Klaxon customer support with your purchase details and the specific part numbers required.
