6. Maintenance

To ensure the longevity and appearance of your nanoblock model:

- **Cleaning:** Dust regularly with a soft brush or a can of compressed air. For stubborn dirt, gently wipe with a damp cloth and mild soap, then dry thoroughly. Avoid harsh chemicals.
- **Storage:** Store the model in a stable location away from direct sunlight, extreme temperatures, and high humidity to prevent discoloration or warping of the plastic.
- **Handling:** Handle the model carefully, especially when moving it, to avoid accidental disassembly of small parts.

7. Troubleshooting

While nanoblock kits are generally straightforward, you might encounter minor issues:

- **Missing Pieces:** If you find any pieces missing, first double-check your workspace and packaging. If still missing, contact KAWADA customer support (refer to their official website for contact information).
- **Difficulty Connecting Pieces:** Ensure pieces are correctly oriented and aligned. Apply gentle, even pressure. Do not force pieces, as this can damage them.
- **Model Instability:** Re-examine the connections in the affected area. Ensure all blocks are fully pressed together. Sometimes, a small misalignment can affect overall stability.

- **Assembly Errors:** If you realize you've made an error several steps back, carefully backtrack through the online instructions to identify and correct the mistake.
