Jugeman Y66

Jugeman Smart Watch Y66 User Manual

Model: Y66 | Brand: Jugeman

INTRODUCTION

This manual provides comprehensive instructions for the operation, maintenance, and troubleshooting of your Jugeman Smart Watch Y66. Please read this manual carefully before using the device to ensure proper functionality and to extend the product's lifespan. The Jugeman Smart Watch Y66 is a versatile fitness activity tracker designed for both men and women, featuring a 1.96-inch HD display, Bluetooth call capabilities, message notifications, and IP68 waterproof rating.

WHAT'S IN THE BOX

Upon opening the package, please verify that all components are present and in good condition:

- Smart Watch (Y66) x 1
- User Manual x 1
- Charging Cable x 1

SETUP

1. Initial Charging

Before first use, fully charge your smart watch. Connect the magnetic charging cable to the charging points on the back of the watch and plug the USB end into a compatible power adapter (5V/1A recommended). A full charge typically takes approximately 2 hours.

2. App Installation and Pairing

1. Scan the QR code in the user manual or search for the official companion app (e.g., "Da Fit" or similar, as per the watch's specific app) on your smartphone's app store (Android or iOS).
2. Install the app and create an account if prompted.
3. Ensure Bluetooth is enabled on your smartphone.
4. Open the app and follow the on-screen instructions to add your device. The app will search for available smart watches. Select "Y66" or the corresponding device name.
5. Confirm the pairing request on both your phone and the smart watch.

3. Granting Permissions

For full functionality, grant necessary permissions to the app, including access to notifications, contacts, and location services. This is crucial for features like call answering, message reminders, and GPS tracking via smartphone.

OPERATING INSTRUCTIONS

1. Basic Navigation

- **Touch Screen:** Swipe left/right, up/down to navigate through menus and features. Tap to select.
- **Side Button:** Press to wake the screen, return to the home screen, or access the app list.
- **Wrist Flick:** Enable "Wrist Flick to Wake" in the app settings to automatically turn on the screen when you raise your wrist.

2. Bluetooth Call and Message Reminders

After successful Bluetooth connection with your phone:

- **Answering/Making Calls:** You can answer incoming calls directly from the watch or dial numbers using the integrated dial pad. Access your phone's contact list and call history through the watch interface.
- **Message Notifications:** The watch will vibrate and display notifications for incoming calls, SMS, and social media messages (Facebook, WhatsApp, Instagram, Twitter, etc.). Ensure app notifications are enabled in your phone's settings and the companion app.

3. Customizing Watch Faces

The 1.96-inch HD screen supports over 220 cloud-based watch faces. You can also upload your own photos to personalize the watch face through the companion app. Navigate to the "Dial Settings" or "Watch Face" section within the app to select or upload designs.

4. Fitness and Health Tracking

The smart watch includes various health monitoring features:

- **Heart Rate Monitor:** Access the heart rate function on the watch to measure your current heart rate. For continuous monitoring, enable the feature in the app.
- **Pedometer:** Tracks your daily steps, distance, and calories burned automatically.
- **Sleep Tracker:** Monitors your sleep patterns (deep sleep, light sleep, wake-up times). Wear the watch to bed for accurate data.
- **Sports Modes:** Supports 110+ sports modes. Select your activity from the watch's sports menu to track specific

workout data.

- **Sedentary Reminder:** Set reminders in the app to encourage movement after periods of inactivity.

5. Additional Features

- **Music Control:** Control music playback on your smartphone (play, pause, skip tracks) directly from the watch.
- **Remote Camera Control:** Use the watch as a remote shutter for your phone's camera.
- **Weather Forecast:** View real-time weather updates after syncing with the app.
- **Alarm Clock:** Set alarms through the app to vibrate on your watch.
- **Female Menstrual Period Prediction:** Track and predict menstrual cycles (configure in the app).

Figure 3: The smart watch interface showing call history and dial pad, demonstrating its communication features.

MAINTENANCE

- **Cleaning:** Regularly clean the watch screen and strap with a soft, dry cloth. If necessary, use a slightly damp cloth

and mild soap, then dry thoroughly. Avoid harsh chemicals.

- **Water Resistance:** The watch has an IP68 waterproof rating, meaning it is resistant to dust and can withstand immersion in water up to 1.5 meters for up to 30 minutes. It is suitable for daily use, hand washing, and light rain. Do not use it for hot showers, saunas, or diving, as steam and hot water can damage the seals.
- **Storage:** Store the watch in a cool, dry place when not in use. Avoid extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge it when the battery level is low.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not turning on	Low battery; System crash	Charge the watch for at least 30 minutes. If still unresponsive, press and hold the side button for 10-15 seconds to force a restart.
Cannot pair with phone	Bluetooth off; App not running; Watch not discoverable; Interference	Ensure Bluetooth is on for both devices. Restart the app and watch. Forget previous pairings on your phone. Move closer to the watch.
No notifications	App permissions not granted; Notifications disabled in app/phone settings; App not running in background	Check app permissions in phone settings. Enable notifications for the app and specific apps (e.g., WhatsApp) within the companion app. Ensure the app is allowed to run in the background.
Inaccurate health data	Improper fit; Movement during measurement; Not a medical device	Ensure the watch is worn snugly but comfortably on your wrist. Remain still during measurements. Note that this device is for general fitness and wellness purposes and not for medical diagnosis.
Short battery life	Frequent screen wake-ups; Continuous heart rate monitoring; High brightness	Reduce screen brightness. Disable "Wrist Flick to Wake" if not needed. Turn off continuous heart rate monitoring if not required.

If the problem persists, please contact customer support.
