## 5. OPERATING INSTRUCTIONS

---

The BedsPick Queen Size Bed Frame is designed for direct mattress placement, eliminating the need for a box spring.

- **Mattress Placement:** Place your queen-size mattress directly onto the steel slats. The frame is compatible with mattresses between 8 to 10 inches in thickness. The embedded design helps prevent mattress movement.
- **Weight Capacity:** The bed frame is engineered to support a maximum weight of 1000 lbs (including mattress and occupants). Do not exceed this limit.
- **Under-bed Storage:** The frame provides approximately 12.4 inches of clearance, offering ample space for under-bed storage containers.
- **Noise Reduction:** The integrated EVA mute foam and noise-dampening strips on the steel slats are designed to minimize noise and provide a quiet sleep environment.

## 6. MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your bed frame.

- **Cleaning the Frame:** Wipe the metal frame components with a dry cloth to remove dust. Avoid abrasive cleaners.
- **Cleaning the Headboard:** The PU leather headboard is water-resistant and easy to clean. Use a soft, damp cloth to wipe away spills or dirt. For tougher stains, a mild soap solution can be used, followed by wiping with a clean, damp cloth and then drying thoroughly.
- **Hardware Check:** Periodically inspect all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.

## 7. TROUBLESHOOTING

If you encounter any issues with your BedsPick bed frame, refer to the following common solutions:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all bolts and screws, especially those connecting the side rails to the headboard and footboard, and the support legs. Ensure slats are properly seated.
- **Instability/Wobbling:** Check that all frame components are correctly assembled and all hardware is fully tightened. Ensure the bed is on a level surface.
- **Mattress Sliding:** The frame features an embedded design to minimize mattress movement. If your mattress still slides, ensure it is correctly positioned within the frame's edges.
- **Missing Parts:** If any parts are missing upon delivery, contact customer support immediately.
