Hayabusa T360

Hayabusa T360 Boxing Gloves Instruction Manual

MODEL: T360

INTRODUCTION

The Hayabusa T360 Boxing Gloves represent a significant advancement in combat sports equipment. Developed through extensive research and fighter feedback, these gloves are designed to provide comfort, protection, and enhanced performance during training, sparring, and heavy bag workouts. This manual provides essential information for the proper use and care of your T360 Boxing Gloves.

Key Features:

- **Advanced Ergonomics:** A revolutionary inner pocket naturally aligns your knuckles for optimal punch positioning.
- **Empowering Wrist Support:** Three padded splints provide stability and wrist-to-knuckle alignment, reducing injury risk.
- **Customizable Fit:** Features a unique dual-strap closure system with removable inner straps for adjustable support.
- **Durable Construction:** Crafted with a rich matte exterior, cooling fabric, and enhanced knuckle protection.

SETUP: ACHIEVING THE OPTIMAL FIT

Proper fit is crucial for both protection and performance. The T360 gloves feature a dynamic dual-strap system allowing for personalized adjustment.

1. **Insert Hand:** Slide your hand into the glove, ensuring your fingers are fully extended into the finger compartment and your thumb is comfortably positioned. The revolutionary inner pocket is designed to naturally align your knuckles.
2. **Adjust Inner Strap (Optional):** The T360 gloves come with a removable inner wrist strap. For maximum support, keep both straps engaged. If you prefer a more traditional single-strap fit or less restrictive support, you can remove the inner strap.
3. **Secure Outer Strap:** Wrap the main outer strap firmly around your wrist and secure it using the hook-

and-loop closure. Ensure it is snug but not overly tight, allowing for comfortable movement while providing robust wrist stabilization.

Figure 1: Dynamic Dual Strap Fit. The removable inner strap allows for customizable wrist support.

Figure 2: Interlocking wrist straps and triple splint support for empowering wrist stabilization.

OPERATING: USING YOUR T360 BOXING GLOVES

The T360 gloves are engineered for various boxing and combat sports activities, providing protection and comfort across different training intensities.

Recommended Usage:

- **Heavy Bag Training:** The multi-density protection and prime impact positioning (Figure 3) are ideal for absorbing powerful strikes on heavy bags, protecting your knuckles and wrists.
- **Pad Work:** The ergonomic design ensures your hand forms a natural fist, providing excellent feedback and protection during pad work with a coach.
- **Sparring:** The comprehensive padding and wrist support offer enhanced safety for both you and your sparring partner.

INNOVATIVE WEDGE PADDING

ANGLED GRIP BAR

PRIME IMPACT POSITIONING

The innovative wedge design and angled grip bar naturally position your fist for impact.

Figure 3: Prime Impact Positioning. Innovative wedge padding and an angled grip bar naturally position your fist for impact.

MAINTENANCE AND CARE

Proper care will extend the lifespan and maintain the hygiene of your Hayabusa T360 Boxing Gloves.

- **Cleaning:** After each use, wipe down the exterior of the gloves with a damp cloth. For the interior, use a clean, dry cloth to absorb moisture. You may use a mild disinfectant spray designed for sports equipment to prevent odor and bacteria buildup.
- **Drying:** Always allow gloves to air dry completely in a well-ventilated area. Avoid direct sunlight or heat sources, as this can damage the materials (Faux Leather, Polyester). Do not machine wash or tumble dry.
- **Storage:** Store gloves in a cool, dry place. Avoid leaving them in sealed bags or confined spaces where moisture can accumulate.
- **Odor Control:** Consider using glove deodorizers or cedar inserts to help absorb moisture and maintain

freshness.

TROUBLESHOOTING

Here are solutions to common issues you might encounter with your boxing gloves:

- **Issue: Gloves develop an odor.**

Solution: Ensure gloves are thoroughly air-dried after every use. Use glove deodorizers or stuff them with newspaper to absorb moisture and odors. Regular cleaning of the interior with a mild disinfectant can also help.

- **Issue: Discomfort or improper hand positioning.**

Solution: Re-evaluate your hand wraps to ensure they are applied correctly and not too bulky. Adjust the dual-strap closure system to find the optimal balance of support and comfort. The inner pocket is designed for natural alignment, but individual hand shapes may require slight adjustments to how the glove is worn.

- **Issue: Straps not holding securely.**

Solution: Check if the hook-and-loop fasteners are clean and free of debris. Clean them with a stiff brush if necessary to restore their grip. Ensure the straps are pulled taut before securing.

SPECIFICATIONS

Detailed technical specifications for the Hayabusa T360 Boxing Gloves.

| Feature | Detail |
|--------------------------|---|
| Model Name | Hayabusa T360 Boxing Gloves |
| Brand | Hayabusa |
