MAINTENANCE

Proper maintenance will extend the life and appearance of your bunk bed.

- **Cleaning:** Wipe down metal surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the anti-rust powder coating.
- **Tightening Fasteners:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they remain tight. Loose fasteners can compromise the bed's stability and safety.
- **Inspection:** Regularly inspect the bed frame for any signs of wear, damage, or rust. Address any issues promptly.
- **Mattress Care:** Follow the mattress manufacturer's guidelines for cleaning and rotation to ensure proper support and hygiene.

TROUBLESHOOTING

If you encounter any issues with your bunk bed, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose fasteners or incorrect assembly.	Ensure all bolts and screws are fully tightened. Review assembly instructions to confirm all parts are correctly installed.
Squeaking noises.	Loose connections or friction between metal parts.	Tighten all fasteners. Apply a small amount of silicone spray or wax to contact points if squeaking persists (avoiding areas that could become slippery).
Ladder feels insecure.	Ladder not properly attached or fasteners are loose.	Verify the ladder is correctly hooked or bolted to the upper bunk frame. Tighten all ladder fasteners.
Missing parts after unboxing.	Packages may arrive separately.	Check if all packages have arrived. If parts are still missing, contact Bellemave customer support.
