1. Product Overview

The Vente-unique LINCI II Double Sliding Door System is designed to optimize space in smaller areas while maintaining luminosity and privacy. This system includes two sliding doors made of aluminum and smoked tempered glass, along with an aluminum rail system for easy installation.

Key features include:

- Double sliding door configuration.
- Constructed from durable aluminum and 4mm smoked tempered glass.
- Equipped with a Soft Close system for smooth and quiet operation.
- Reversible opening direction (left or right).
- Includes handles and all necessary hardware for installation.

2. Specifications

Product Dimensions and Materials

Feature	Description
Brand	Vente-unique
Model	LINCI II
Color	Black
Material (Doors)	Tempered Glass, Aluminum
Glass Thickness	4 mm
Metal Thickness (Doors)	40 mm
Finish (Doors)	Smoked
Door Type	Double Sliding Door
Opening System	Sliding with Soft Close
Included Equipment	Handles, Screws
Opening Direction	Reversible (Left or Right)

Feature	Description
Usage	Interior
Door Dimensions (each)	Length: 63 cm, Height: 205 cm, Depth: 4 cm
Rail Material	Steel
Rail Thickness	2 mm
Rail Dimensions	Length: 186 cm, Height: 8 cm, Depth: 12.5 cm
Total Product Weight	53.85 Kilograms

3. Setup & Installation

The LINCI II Double Sliding Door System requires assembly. Follow these general steps for installation. It is recommended to have at least two people for assembly due to the size and weight of the components.

1. **Unpack and Verify Components:** Carefully unpack all parts and compare them against the included parts list. Ensure all components are present and undamaged.

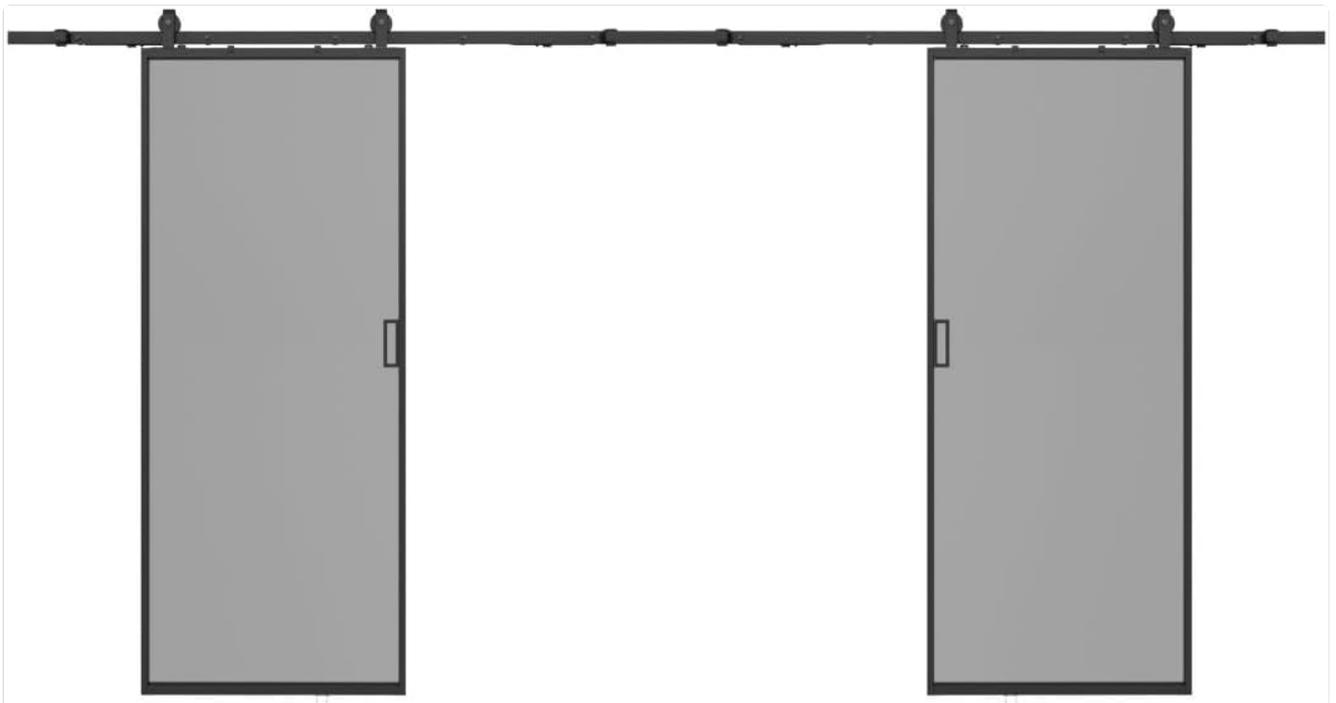

Figure 2: Exploded view of the LINCI II Double Sliding Door System, showing the two doors and the overhead rail system.

2. **Prepare the Installation Area:** Ensure the wall where the rail will be mounted is structurally sound and clear of obstructions. Mark the desired height for the rail, considering the door height and floor clearance.
3. **Install the Rail System:** Mount the aluminum rail (LEZAMA) securely to the wall using the provided screws. For a double door system, ensure the rail connector is properly aligned and secured to join the two rail sections. The rail should be perfectly level.

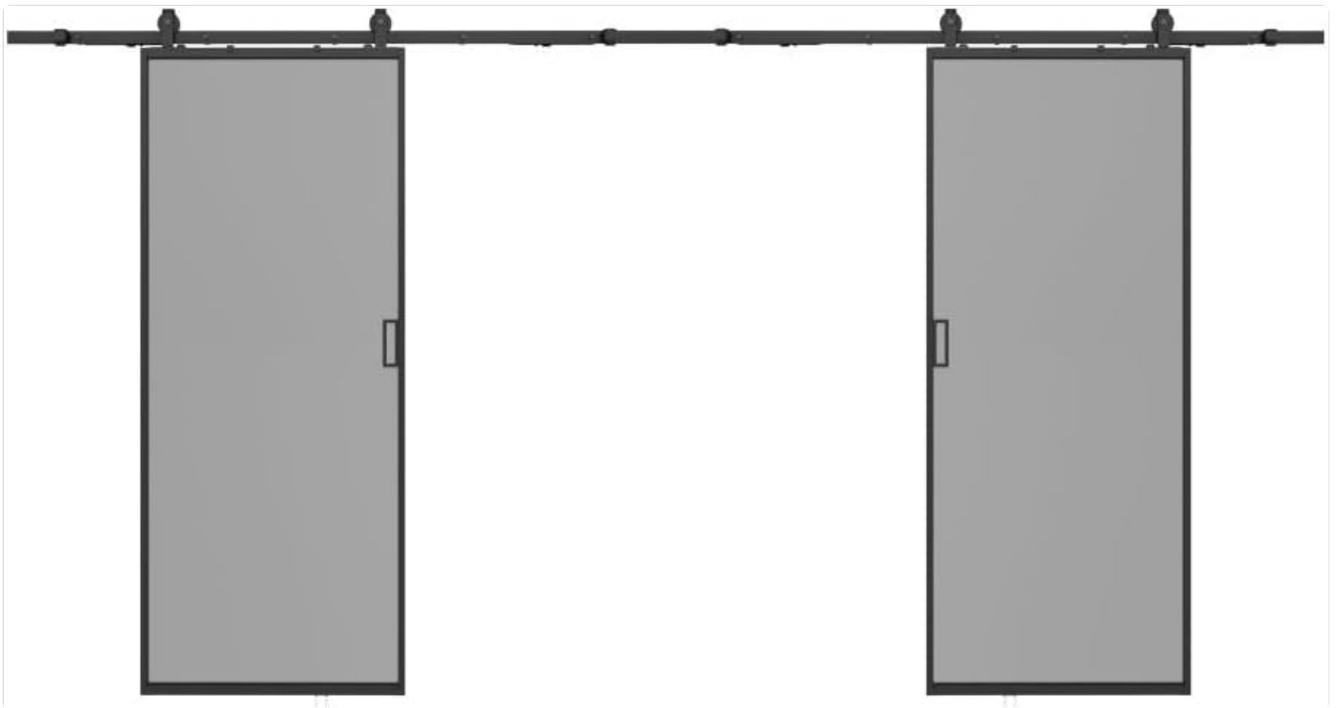

Figure 3: Detail of the top rail and roller mechanism, illustrating how the door hangs and slides along the track.

4. **Attach Rollers to Doors:** Secure the roller mechanisms to the top edge of each LINCI door panel. Ensure they are firmly attached and aligned.
5. **Hang the Doors:** Carefully lift each door panel and hook the rollers onto the installed rail. Ensure the doors hang freely and can slide along the rail.
6. **Install Floor Guides:** Position and secure the floor guides (as shown in Figure 4) to prevent the bottom of the doors from swinging. These guides ensure smooth linear movement.

Figure 4: Detail of the bottom guide, which keeps the door aligned and prevents lateral movement.

7. **Install Handles:** Attach the provided handles to each door panel according to your preference for opening direction (reversible).
8. **Test Operation:** Gently slide both doors back and forth to ensure smooth movement and proper engagement of the Soft Close system. Adjust any components as necessary.

4. Operating Instructions

The LINCI II Double Sliding Door System is designed for simple and quiet operation.

- **Opening the Doors:** Grasp the handle and gently push the door panel in the desired direction (left or right) along the rail.
- **Closing the Doors:** Pull the door panel along the rail until it reaches its closed position. The integrated Soft Close system will engage as the door approaches the end of its travel, slowing it down for a gentle and quiet closure.
- **Reversible Opening:** The doors can be configured to slide open to either the left or right, depending on your installation and preference.

Figure 5: The LINCI II Double Sliding Door System in its closed position, demonstrating how the two panels meet.

5. Maintenance

Regular maintenance will ensure the longevity and smooth operation of your LINCI II Double Sliding Door System.

- **Cleaning Glass Panels:** Use a soft, lint-free cloth and a non-abrasive glass cleaner to clean the tempered glass panels. Avoid harsh chemicals or abrasive materials that could scratch the glass or damage the smoked finish.
- **Cleaning Aluminum Frame:** Wipe the aluminum frame with a soft, damp cloth. For stubborn marks, a mild soap

solution can be used, followed by drying with a clean cloth.

- **Rail and Roller Maintenance:** Periodically inspect the top rail and rollers for any dust or debris accumulation. Clean the track with a dry cloth or a soft brush. Avoid applying lubricants unless specifically recommended by the manufacturer, as this can attract more dust.
- **Floor Guide Maintenance:** Keep the floor guides clean and free of obstructions to ensure smooth door movement.
- **Hardware Check:** Annually check all screws and fasteners to ensure they are tight. Retighten if necessary to maintain stability and safety.

6. Troubleshooting

If you encounter issues with your LINCI II Double Sliding Door System, refer to the following common problems and solutions:

Common Issues and Solutions

Problem	Possible Cause	Solution
Door is difficult to slide or sticks.	Debris in the rail or floor guide; misaligned rollers; loose hardware.	Clean the top rail and bottom guide. Check that rollers are properly seated and aligned. Tighten any loose screws on the rollers or door frame.
Soft Close system not engaging or working properly.	Obstruction in the soft close mechanism; mechanism out of alignment.	Inspect the soft close mechanism for any foreign objects. Ensure the door is properly aligned on the track. If the issue persists, contact customer support.
Door wobbles or feels unstable.	Loose hardware; improper installation of floor guides or rail.	Check and tighten all screws on the door, rollers, and rail. Verify that the floor guides are securely installed and properly positioned. Ensure the main rail is firmly mounted to the wall.
Scratches or damage to glass/frame.	Accidental impact; abrasive cleaning materials.	Minor scratches on the frame may be touched up with appropriate paint. For glass damage, replacement may be necessary. Note that spare parts availability is not guaranteed.

7. Warranty and Support

For any questions, concerns, or technical assistance regarding your Vente-unique LINCI II Double Sliding Door System, please contact Vente-unique customer support.

- **Customer Service:** Refer to the contact information provided at the point of purchase or on the official Vente-unique website.
- **Online Resources:** Visit the official Vente-unique brand store for additional product information and support: [Vente-unique Brand Store](#).
- **Spare Parts:** Information regarding the availability of spare parts for this product is currently unavailable.
