Samsonite 49539

Samsonite S'Cure Spinner S User Manual

Model: 49539

INTRODUCTION

The Samsonite S'Cure Spinner S is a lightweight, robust, and reliable carry-on luggage designed for efficient travel. Featuring a secure 3-point locking system and smooth-rolling spinner wheels, it ensures your belongings are protected and your journey is effortless. This manual provides essential information for setting up, operating, maintaining, and troubleshooting your luggage.

SETUP

1. Unpacking

Carefully remove your Samsonite S'Cure Spinner S luggage from its packaging. Inspect the luggage for any signs of damage that may have occurred during transit. Retain all packaging materials for future storage or if the product needs to be returned.

2. Setting the TSA Combination Lock

Your Samsonite S'Cure luggage is equipped with an integrated TSA combination lock for enhanced security. The initial combination is typically set to **0-0-0**.

1. Open the lock by sliding the button (A) in the direction of the arrow.
2. With the lock open, push the reset button (B) firmly with a pen or pointed object until you hear a 'click'.
3. Set your desired 3-digit combination by turning the dials (C). Choose a memorable combination.
4. Slide the button (A) in the direction of the arrow again. The reset button (B) will return to its original position with a 'click'. Your new combination is now set.

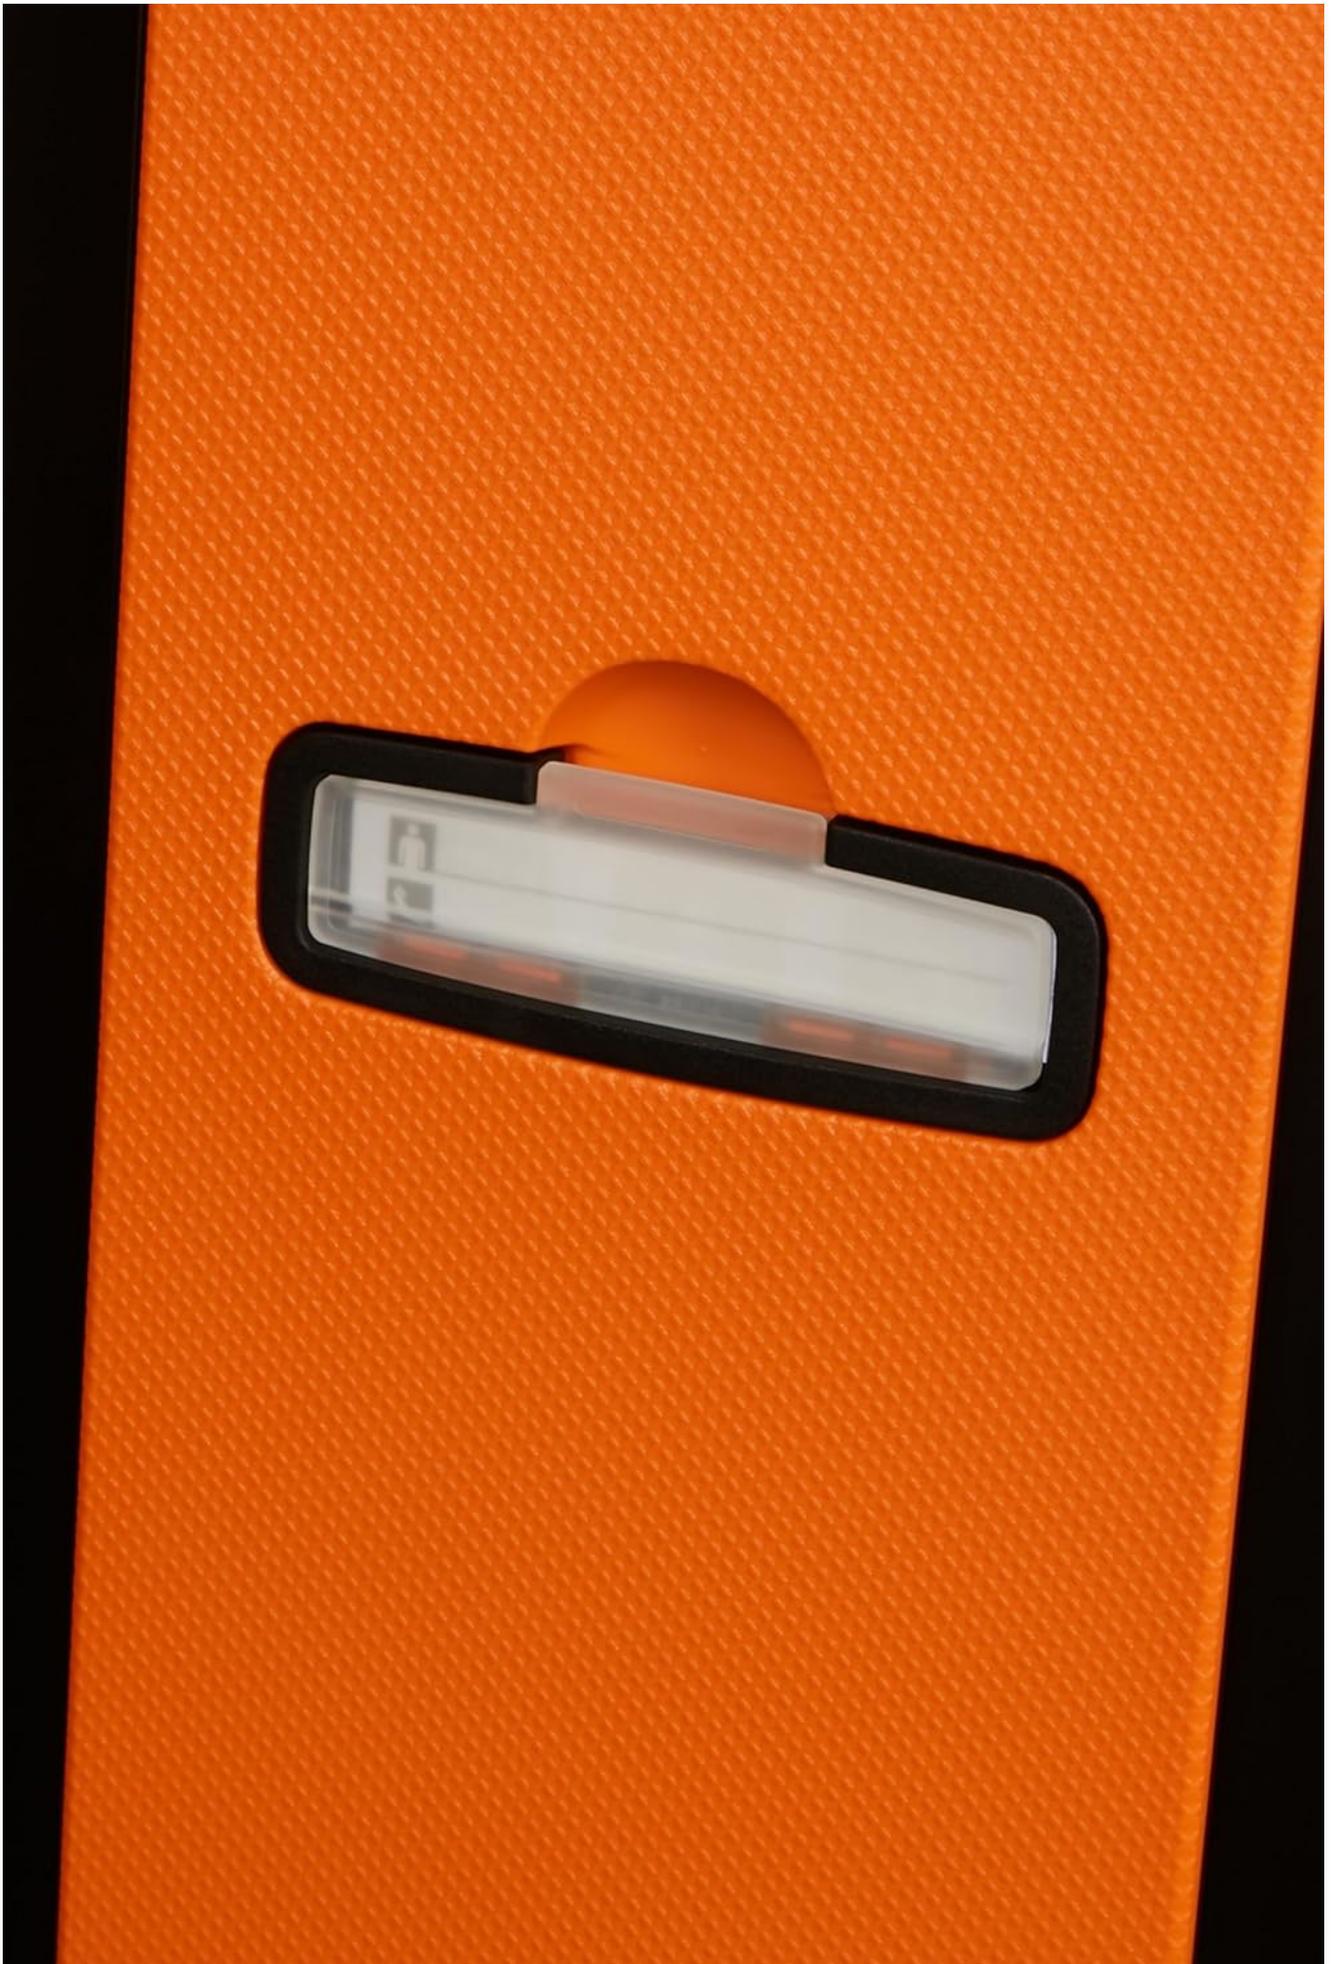

Remember your combination. If you forget it, you will need to contact Samsonite customer support for assistance.

3. Using the Integrated ID Tag

Locate the integrated identification tag on the back of your luggage. Pull it out to write your contact information. This helps in case your luggage is misplaced.

OPERATING INSTRUCTIONS

1. Opening and Closing the 3-Point Locking System

The S'Cure luggage features a robust 3-point locking system for secure closure without zippers. To open, ensure the TSA lock is set to your combination, then slide the main lock button. The two side latches will release automatically. To close, align the two halves of the shell and press firmly until all three locking points click into place.

2. Using the Telescopic Handle

The double telescopic handle is adjustable to multiple lengths for comfortable pulling. Press the button on the handle grip and extend or retract the handle to your desired height. Ensure the handle is fully extended or retracted before moving the luggage to prevent damage.

3. Maneuvering with Spinner Wheels

Your S'Cure luggage is equipped with four double spinner wheels that allow for 360-degree rotation. This enables

effortless gliding in any direction, reducing strain on your arm and shoulder. For optimal movement, push the luggage upright on all four wheels.

4. Packing Your Luggage

The interior of the S'Cure Spinner S is designed for efficient packing. It features cross-ribbons in the main

compartment to secure your clothes and a zippered divider pad in the top compartment for organized storage. Utilize these features to maximize space and prevent items from shifting during transit.

MAINTENANCE

1. Cleaning the Exterior

To clean the exterior of your S'Cure luggage, wipe it with a soft cloth dampened with mild soap and water. Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the surface finish. Dry thoroughly with a clean, soft cloth.

2. Wheel Care

Periodically check the wheels for any debris (e.g., hair, lint) that may have accumulated. Remove any obstructions to ensure smooth rolling. If the wheels become stiff, a small amount of silicone spray can be applied to the axle, avoiding contact with the wheel tread.

3. Lock Maintenance

Keep the lock mechanism clean and free of dirt. Do not force the lock if it feels stiff. If needed, a small amount of graphite powder or a silicone-based lubricant can be applied to the moving parts of the lock.

4. Storage

When not in use, store your luggage in a cool, dry place away from direct sunlight. If storing for extended periods, consider placing a desiccant packet inside to absorb moisture.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lock will not open	Incorrect combination; dials not aligned; mechanism jammed.	Ensure dials are precisely on your combination. Try resetting the lock to 0-0-0 (if you remember the reset procedure). If still stuck, contact Samsonite support.
Wheels are stiff or not rolling smoothly	Debris caught in wheels; lack of lubrication.	Remove any visible debris. Apply a small amount of silicone spray to the wheel axles.
Telescopic handle is stuck or wobbly	Button not fully depressed; bent handle tubes; excessive weight.	Ensure the release button is fully pressed. Avoid overloading the luggage. If bent, seek professional repair.
Side latches not closing properly	Luggage overloaded; misalignment of shells.	Reduce contents if overloaded. Ensure the two halves of the luggage shell are perfectly aligned before attempting to close.
