3. **Attach Side Rails to Footboard:** Repeat the process from Step 2 to attach the other ends of the side rails to the footboard. Ensure all connections are aligned.
4. **Tighten All Connections:** Once all four corners are connected, carefully tighten all bolts using the Allen wrench. Ensure the frame is stable and square.
5. **Install Center Support Beam:** Place the center support beam along the length of the bed frame, connecting it to the headboard and footboard brackets. Attach the support legs to the center beam and adjust their height so they firmly touch the floor.
6. **Place Wooden Slats:** Lay the wooden slats across the side rails, ensuring they are evenly spaced and secured into any pre-drilled holes or plastic caps. The slats provide direct support for your mattress, eliminating the need for a box spring.
