## Step 2: Assemble the Base Frame

Connect the lower vertical support bars to the base horizontal bars using the provided screws. Do not fully tighten screws until all components are in place.

### Step 3: Attach Lower Mesh Shelves

Slide the metal mesh shelves into the designated slots on the lower frame. Ensure they are seated correctly and then partially tighten the frame screws.

### Step 4: Install the Main Worktop

Place the large wooden worktop onto the middle section of the frame. Secure it with screws from underneath. This forms the primary surface for your microwave or coffee bar.

**Figure 3:** The spacious main worktop, measuring approximately 13.4"D x 20.4"W, designed to accommodate kitchen appliances like microwaves or toasters.

### Step 5: Integrate the Pull-Out Basket

Install the pull-out mesh basket into the runners located directly beneath the main worktop. Ensure the stopper mechanism is correctly aligned to prevent the basket from falling out when extended.

## Step 7: Install Hooks

Attach the five utility hooks to the designated bars on the upper frame. These hooks are ideal for hanging kitchen utensils, mugs, or towels.

## Step 8: Final Tightening and Stability Check

Once all components are in place, fully tighten all screws. Gently shake the assembled rack to ensure it is stable and level. Adjust if necessary.

## MAINTENANCE

- **Cleaning:** Wipe down all surfaces with a soft, damp cloth. For stubborn stains, use a mild soap solution and dry immediately. Avoid abrasive cleaners or harsh chemicals.
- **Hardware Check:** Periodically inspect all screws and connections to ensure they remain tight. Re-tighten any loose hardware to maintain stability.
- **Avoid Moisture:** While the rack is designed for kitchen use, prolonged exposure to excessive moisture should be avoided to prevent damage to the wooden surfaces and metal components.

## TROUBLESHOOTING

---

- **Rack is Wobbly:**

Ensure all screws are fully tightened. Check that the rack is placed on a level surface. If the floor is uneven, consider using furniture pads or shims under the feet.

- **Difficulty Assembling:**

Review the assembly instructions carefully. Ensure you are using the correct hardware for each step. Do not force parts together; if they don't fit, re-check the orientation or part identification.

- **Basket Does Not Slide Smoothly:**
