WeCool FW-6020-5

WeCool Fairwhale Automatic Mechanical Watch

Model: FW-6020-5

INTRODUCTION

Thank you for choosing the WeCool Fairwhale Automatic Mechanical Watch. This timepiece combines precision engineering with elegant design, featuring a skeleton dial, automatic movement, and robust construction. This manual provides essential information for the proper setup, operation, and maintenance of your watch to ensure its longevity and accurate performance.

SETUP

Initial Winding

Your WeCool Fairwhale watch is powered by an automatic mechanical movement, which means it winds itself with the motion of your wrist. However, for the first use or after the watch has stopped, it requires manual winding to build up an initial power reserve.

1. Ensure the crown is in position 1 (fully pushed in towards the watch case).

2. Turn the crown clockwise approximately 15-20 times. This will initiate the movement and provide enough power for the watch to start running.
3. Once the watch starts ticking, wearing it regularly will keep it wound. If worn daily for 8-10 hours, manual winding may not be necessary.

OPERATING INSTRUCTIONS

Setting the Time and Features

The crown on your watch has multiple positions to adjust various functions:

- **Position 1 (Pushed In):** Normal operating position. Used for manual winding (turn clockwise).
- **Position 2 (Pulled Out One Click):** Adjusts the Moon Phase and Dual Time Zone.
- **Position 3 (Pulled Out Two Clicks):** Adjusts the main time (hours and minutes).

To Set the Main Time:

1. Gently pull the crown out to Position 3.

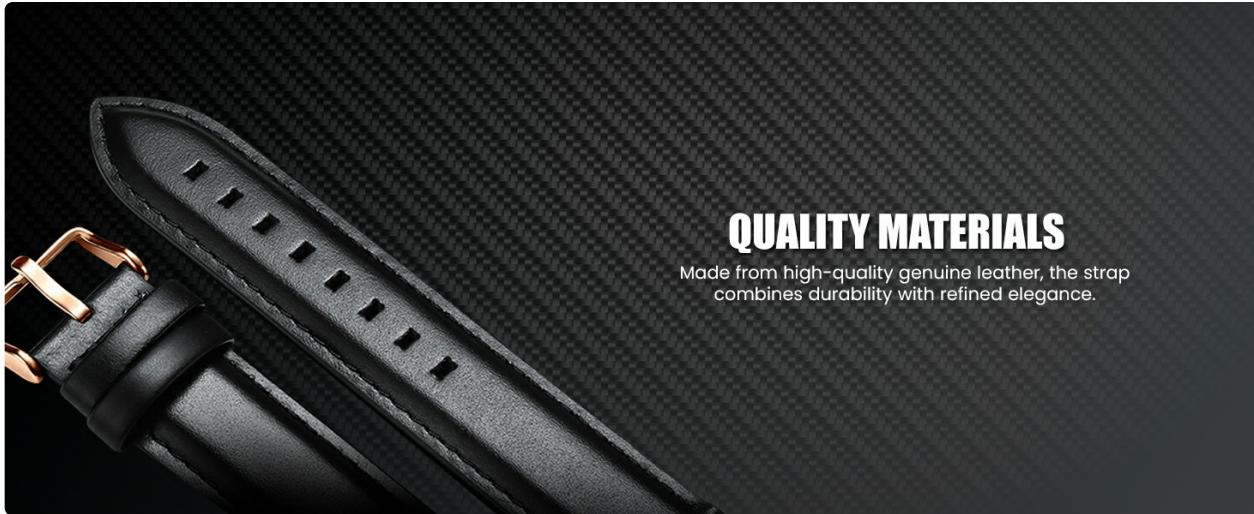

2. Turn the crown clockwise or counter-clockwise to set the hour and minute hands to the desired time.
3. Once set, push the crown back into Position 1.

To Set the Dual Time Zone and Moon Phase:

1. Gently pull the crown out to Position 2.
2. Turn the crown to adjust the small dial for the dual time zone and the moon phase indicator. The moon phase window changes with the sun and moon in 24 hours.
3. Once set, push the crown back into Position 1.

QUALITY MATERIALS

Made from high-quality genuine leather, the strap combines durability with refined elegance.

MAINTENANCE

Water Resistance (50M)

Your WeCool Fairwhale watch is water-resistant up to 50 meters (5 ATM). This means it is suitable for daily use, including splashes, rain, and brief immersion in cold water, such as hand washing. It is **not** suitable for swimming, diving, or hot water activities (e.g., hot showers, saunas), as steam and temperature changes can compromise the seals.

- Always ensure the crown is fully pushed in before any contact with water.
- Do not operate the crown or pushers when the watch is wet or submerged.
- After contact with saltwater, rinse the watch with fresh water and dry it thoroughly with a soft cloth.

SUPER-LUMINOUS
Cool & Easy to Read in the Dark
Glow continually after absorbing light

Image: The watch demonstrating its 50M water resistance.

SCRATCH RESISTANT
Features a 9-Mohs hardness sapphire crystal (anti-reflective, 4x tougher than standard glass)

Cleaning and Care

- Wipe the watch case and crystal regularly with a soft, dry, lint-free cloth.

- For the genuine leather strap, avoid prolonged exposure to water, direct sunlight, and extreme temperatures to prevent damage and discoloration. Clean with a damp cloth and mild soap if necessary, then dry thoroughly.
- Avoid contact with chemicals, solvents, and perfumes, as these can damage the watch's components and strap.

Luminous Feature

The hands and markers of your watch feature A-Level Super Luminous material, allowing you to read the time in low light conditions. This material absorbs light (from natural or artificial sources) and then emits it in the dark. Exposure to light for a few minutes will charge the luminous elements, which can glow for up to 6 hours.

GIVE A GIFT

MAY TIME GIVE YOU

More family, love and friendship

Send yourself
Men should be nice to themselves

Send to your lover
Let love become more permanent

Send to good friends
Make your friendship stronger

For elders
Express your respect and admiration

Image: Demonstrating the watch's ability to glow in the dark for easy time reading.

TROUBLESHOOTING

If you encounter any issues with your WeCool Fairwhale watch, please refer to the table below for common problems and their solutions.

Problem	Possible Cause	Solution
Watch stops or runs inaccurately.	Insufficient power reserve.	Manually wind the watch by turning the crown clockwise 15-20 times. Wear the watch regularly to keep it wound.
Hands do not move when setting time.	Crown not pulled out to correct position.	Ensure the crown is pulled out to Position 3 for main time adjustment.
Water inside the watch or fogging under crystal.	Crown not fully pushed in, or exposure to extreme water conditions.	Immediately take the watch to a qualified watch repair professional. Do not attempt to open it yourself.
Luminous feature is dim.	Insufficient light exposure.	Expose the watch dial to a bright light source (natural or artificial) for a few minutes to charge the luminous material.

SPECIFICATIONS

Detailed specifications for the WeCool Fairwhale Automatic Mechanical Watch (Model FW-6020-5):

Feature	Detail
Model Number	FW-6020-5
Movement Type	Automatic Mechanical
Case Material	Stainless Steel
