> JurwheeR Replacement HEPA Filter User Manual for TROUVER SOLO 10 and TROUVER POWER 11 Pro, 11, 12, 12 Pro Handheld Cordless Vacuum Cleaners

## **JurwheeR HEPA Activated Carbon 2-in-1 Filter (Compatible with TROUVER SOLO 10, TROUVER POWER 11 Pro/11/12/12 Pro)**

# **JurwheeR Replacement HEPA Filter User Manual**

Compatible with TROUVER SOLO 10 and TROUVER POWER 11 Pro, 11, 12, 12 Pro Handheld Cordless Vacuum Cleaners

### **1. INTRODUCTION AND OVERVIEW**

This manual provides essential information for the proper installation, operation, and maintenance of your JurwheeR Replacement HEPA Filter. Designed for compatibility with TROUVER SOLO 10 and TROUVER POWER 11 Pro, 11, 12, and 12 Pro handheld cordless vacuum cleaners, this filter is crucial for maintaining optimal air quality and vacuum performance.

The filter features an efficient 2-in-1 HEPA and activated carbon design, effectively trapping fine dust particles and odors. It is constructed from robust ABS material and high-quality HEPA filter cloth, ensuring durability and consistent filtration efficiency over time. Its user-friendly design facilitates easy installation and replacement.

## 2. SETUP AND INSTALLATION

Follow these general steps to replace the filter in your compatible TROUVER vacuum cleaner. For detailed, model-specific instructions, always refer to your vacuum cleaner's original user manual.

1. **Power Off:** Ensure your vacuum cleaner is turned off and unplugged from any charging source before beginning the replacement process.
2. **Locate Filter Compartment:** Identify the filter compartment on your TROUVER vacuum cleaner. This is typically located near the dustbin.
3. **Remove Old Filter:** Carefully open the filter compartment and remove the old, used filter. Dispose of the old filter responsibly.
4. **Insert New Filter:** Place the new JurwheeR HEPA filter into the compartment. Ensure it is seated correctly and securely. The filter is designed for a precise fit.

5. **Close Compartment:** Close the filter compartment securely. Ensure all latches or covers are properly fastened to prevent air leaks.

### 3. OPERATING INSTRUCTIONS

The JurwheeR Replacement HEPA Filter operates passively within your vacuum cleaner. Once correctly installed, it functions automatically to filter dust and particles from the air as the vacuum operates. No specific user interaction is required for its operation beyond proper installation.

Ensure the filter is always clean and properly seated to maintain optimal suction power and filtration efficiency of your vacuum cleaner.

### 4. MAINTENANCE

Regular maintenance of your HEPA filter is essential for prolonging the life of your vacuum cleaner and ensuring effective

air filtration.

#### 4.1 Cleaning the Filter

While some filters can be washed, HEPA filters are generally not designed for wet cleaning as this can damage the delicate filter media and reduce their effectiveness. For optimal performance, it is recommended to:

- Gently tap the filter over a waste bin to dislodge accumulated dust and debris.
- Use a soft brush or a separate vacuum cleaner (on a low setting) to carefully remove surface dust from the pleated sections.
- Do not wash the HEPA filter with water or cleaning solutions.

#### 4.2 Filter Replacement

The lifespan of a HEPA filter depends on usage frequency and the environment. It is generally recommended to replace the filter every 3 to 6 months, or sooner if you notice a decrease in suction power, persistent odors, or visible damage to

the filter material. Regular replacement ensures maximum filtration efficiency and protects your vacuum's motor.

## 5. TROUBLESHOOTING

If you encounter issues related to your vacuum cleaner's performance after installing the new filter, consider the following:

- **Reduced Suction Power:**
  - Ensure the filter is installed correctly and securely in its compartment.
  - Check if the filter is clogged with excessive dust or debris. If so, clean or replace it.
  - Verify that the dustbin is empty and other parts of the vacuum (hoses, nozzles) are not blocked.
- **Unusual Odors:**
  - If unpleasant odors persist, the activated carbon component of the filter may be saturated. Replace the filter with a new one.
- **Filter Does Not Fit:**
  - Double-check the compatibility of the filter with your specific TROUVER vacuum model (SOLO 10, POWER 11 Pro, 11, 12, or 12 Pro).

## 6. SPECIFICATIONS

Feature	Detail
Product Name	Replacement HEPA Filter
Brand	JurwheeR
Material	ABS and HEPA filter cloth
Filter Type	HEPA Activated Carbon 2-in-1
Compatibility	TROUVER SOLO 10, TROUVER POWER 11 Pro, TROUVER POWER 11, TROUVER POWER 12, TROUVER POWER 12 Pro Handheld Cordless Vacuum Cleaners
Item Weight	2.12 ounces (approx. per filter)
Product Dimensions	Approximately 5.91 x 3.94 x 1.97 inches
