Shark WV410WH

Shark WANDVAC Power PET Cordless Hand Vacuum

MODEL: WV410WH

User Manual

Introduction

The Shark WANDVAC Power PET Cordless Handheld Vacuum, model WV410WH, is designed for quick clean-ups and tackling pet hair with powerful suction in a compact, ultra-lightweight design. This manual provides essential information for the safe and efficient use, maintenance, and troubleshooting of your new vacuum.

Important Safety Instructions

Please read all instructions carefully before using your Shark WANDVAC Power PET Cordless Hand Vacuum. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Always ensure the vacuum is turned OFF before attaching or detaching accessories, or before charging.
- Do not use the vacuum to pick up flammable or combustible liquids, or anything that is burning or smoking.
- Keep hair, loose clothing, fingers, and all parts of the body away from openings and moving parts.
- Use only as described in this manual. Use only manufacturer's recommended attachments.
- Do not immerse the vacuum or charger in water or other liquids.
- Store the appliance indoors. After use, store the appliance in a suitable place to prevent accidents.

What's in the Box

Your Shark WANDVAC Power PET Cordless Hand Vacuum package includes the following components:

- Shark WANDVAC Handheld Vacuum
- NEW FurFins Tool
- Duster Crevice Tool
- ION Charging Dock
- Dual Onboard Accessory Storage

Image: All components included with the Shark WANDVAC Power PET, showing the main unit, FurFins tool, Duster Crevice Tool, and the charging dock with integrated accessory storage.

Setup

1. **Charge the Vacuum:** Place the Shark WANDVAC onto the ION Charging Dock. Connect the charging cord to the dock and plug it into a power outlet. The LED power light on the vacuum will indicate charging status. A full charge takes approximately 3.5 hours.
2. **Attach Accessories:** Select the desired cleaning tool (FurFins Tool or Duster Crevice Tool) and firmly push it onto the nozzle of the handheld vacuum until it clicks into place. The charging dock also provides convenient onboard storage for these accessories.

Ready When You Are.

Quick access.
Fast charging.
Sleek storage.

Image: The Shark WANDVAC Power PET handheld vacuum resting in its sleek charging dock, with the power adapter plugged into a wall outlet. The dock also holds the included cleaning accessories, ensuring they are always ready for quick access.

Operating the Vacuum

1. **Power On/Off:** Press the power button located on the handle to turn the vacuum on or off.
2. **Standard Cleaning:** For everyday debris and light messes, use the vacuum in its standard mode.
3. **Boost Mode:** For extra powerful suction to tackle large particles and heavy debris, press the Boost button. This mode provides increased suction power for tougher messes.
4. **Using the FurFins Tool:** Attach the NEW FurFins Tool to effectively lift and remove stubborn pet hair from upholstery, carpets, and other surfaces. Its non-tangle, hair grip fins are designed for optimal pet hair pickup.
5. **Using the Duster Crevice Tool:** Utilize the Duster Crevice Tool to clean hard-to-reach areas, tight spaces in cars, corners, and crevices.

Maintenance

1. **Emptying the Dust Cup:** The dust cup is detachable for easy maintenance. Press the release button to open the dust cup and empty debris into a trash receptacle.
2. **Cleaning the Filter:** The filter housing is easily removable. Remove the filter and tap it gently to dislodge dust and debris. For a more thorough cleaning, rinse the filter with water. Ensure the filter is completely dry before reinserting it into the vacuum. Regular cleaning ensures lasting performance.

Mess-Free, Hygienic Emptying

with a single touch.

Troubleshooting

Problem	Possible Cause	Solution
Vacuum not turning on	Battery is depleted	Charge the vacuum fully (approx. 3.5 hours).
Reduced suction power	Dust cup is full or filter is dirty	Empty the dust cup and clean the filter. Ensure filter is dry before reinserting.
Attachments not staying on	Attachment not properly secured	Ensure the attachment is pushed firmly onto the nozzle until it clicks.
