SETUP

Initial Charging

Before first use, fully charge your Skullcandy Method 360 ANC XT earbuds and their charging case. Connect the provided USB-C cable to the charging port on the case and plug the other end into a compatible USB power source. The LED indicator on the case will show charging status. A full charge provides approximately 32 hours of total listening time with the case, and up to 8 hours on the earbuds with Active Noise Cancellation (ANC) enabled.

Bluetooth Pairing

1. Ensure the earbuds are in the charging case and the case has sufficient charge.
2. Open the charging case. The earbuds will automatically enter pairing mode.
3. On your device (smartphone, tablet, etc.), enable Bluetooth.
4. Search for available Bluetooth devices and select "Skullcandy Method 360 ANC XT" from the list.
5. Once connected, you will hear an audio prompt confirming successful pairing.

The earbuds support Bluetooth 5.3 for a stable connection. For optimal performance, ensure your device is within the recommended Bluetooth range.

Skull-iQ App Installation

For enhanced control and customization, download the Skull-iQ App from your device's app store. The app allows you to:

- Adjust hearing modes (ANC, Stay-Aware).
- Customize button settings and gestures.
- Access equalizer presets (Music, Bass Boost, Podcast) or create a custom 5-band EQ.
- Enable Low Latency Audio mode for gaming or video.
- Manage multipoint pairing.

OPERATING INSTRUCTIONS

Touch Controls

The Skullcandy Method 360 ANC XT features intuitive touch controls on each earbud. These controls are customizable via the Skull-iQ App. Default functions typically include:

- **Single Tap:** Play/Pause music, Answer/End call.
- **Double Tap:** Skip track forward (Right earbud), Skip track backward (Left earbud).
- **Triple Tap:** Adjust ANC settings (cycle through ANC On, Stay-Aware, ANC Off).
- **Press and Hold:** Volume up (Right earbud), Volume down (Left earbud).

Hearing Modes

Your earbuds offer three distinct hearing modes:

- **Active Noise Cancellation (ANC):** Reduces ambient noise for an immersive listening experience.

- **Stay-Aware Mode:** Amplifies external sounds, allowing you to hear your surroundings without removing the earbuds.
- **ANC Off:** Disables noise cancellation and transparency.

The intensity of both ANC and Stay-Aware modes can be adjusted within the Skull-iQ App.

Audio Quality

The Skullcandy Method 360 ANC XT earbuds are engineered with "Sound by Bose," providing a rich audio experience. They feature a pronounced sub-bass emphasis, particularly below 60 Hz, which delivers a powerful, felt bass response. While the mids are slightly under-emphasized, the overall V-shaped sound signature is designed to be appealing for a wide range of music genres.

Microphone Performance

For phone calls, the integrated microphones provide clear voice transmission, though the audio may sound somewhat compressed or thin to the recipient. This performance is generally considered adequate for typical call usage.

MAINTENANCE

To ensure the longevity and optimal performance of your earbuds, follow these maintenance guidelines:

- Regularly clean the earbuds and charging case with a soft, dry cloth.
- Remove ear tips and clean any earwax or debris from the earbud nozzles.
- Avoid exposing the earbuds to extreme temperatures, humidity, or liquids. While they are IPX4 sweat and water resistant, they are not fully waterproof.
- Store the earbuds in their charging case when not in use to protect them and keep them charged.

TROUBLESHOOTING

Connection Issues

If you experience issues with one or both earbuds losing connection or failing to sync, try the following steps:

1. **Resync Earbuds:** Refer to the Skullcandy support website for specific instructions on how to resync your earbuds. This often involves placing them back in the case and performing a specific button sequence.
2. **Factory Reset:** If resyncing does not resolve the issue, a factory reset may be necessary. Instructions for factory resetting both earbuds can also be found on the Skullcandy support website. Be aware that this will clear all previous pairings and settings.

Persistent issues may indicate a hardware problem, and you should contact Skullcandy customer support.
