3. SETUP

3.1 Placement

Position the projector on a stable, flat surface. The 270° rotatable stand allows for flexible projection angles, including walls, ceilings, or tables. Ensure there is adequate ventilation around the projector.

Image 3.1: The projector's flexible stand allows for projection at various angles, from 0° to 180°.

3.2 Power Connection

Connect the power adapter to the projector's power input port, then plug the adapter into a standard electrical outlet.

3.3 Initial Adjustments

- **Manual Focus:** Rotate the focus ring on the projector lens until the image appears sharp and clear.
- **Automatic Keystone Correction:** The projector features automatic keystone correction to adjust the image shape if the projector is not perfectly perpendicular to the screen.

Effortless Setup - Instant Projection

4. OPERATION

4.1 Powering On/Off

- **Power On:** Press the power button on the projector or the remote control.
- **Power Off:** Press the power button again. The projector will initiate a shutdown sequence.

4.2 Connecting Devices

The projector supports various wired connections:

- **HDMI Port:** Connect TV sticks, gaming consoles, laptops, or other HDMI-enabled devices using an HDMI cable.
- **USB Port:** Connect smartphones, tablets, or laptops using a compatible USB cable for direct mirroring.
- **AUX Port:** Use a 3.5mm audio cable to connect external speakers or headphones.

4.3 Source Selection

After connecting a device, use the remote control or the projector's control panel to select the appropriate

input source (HDMI, USB).

4.4 Adjusting Projection

- **Projection Size:** The projector can display images from 50 to 200 inches. Adjust the distance from the projection surface to change the screen size.
- **Focus:** Fine-tune the focus using the manual focus ring if the image appears blurry.

Image 4.1: The projector can achieve a screen size of up to 200 inches, depending on placement distance.

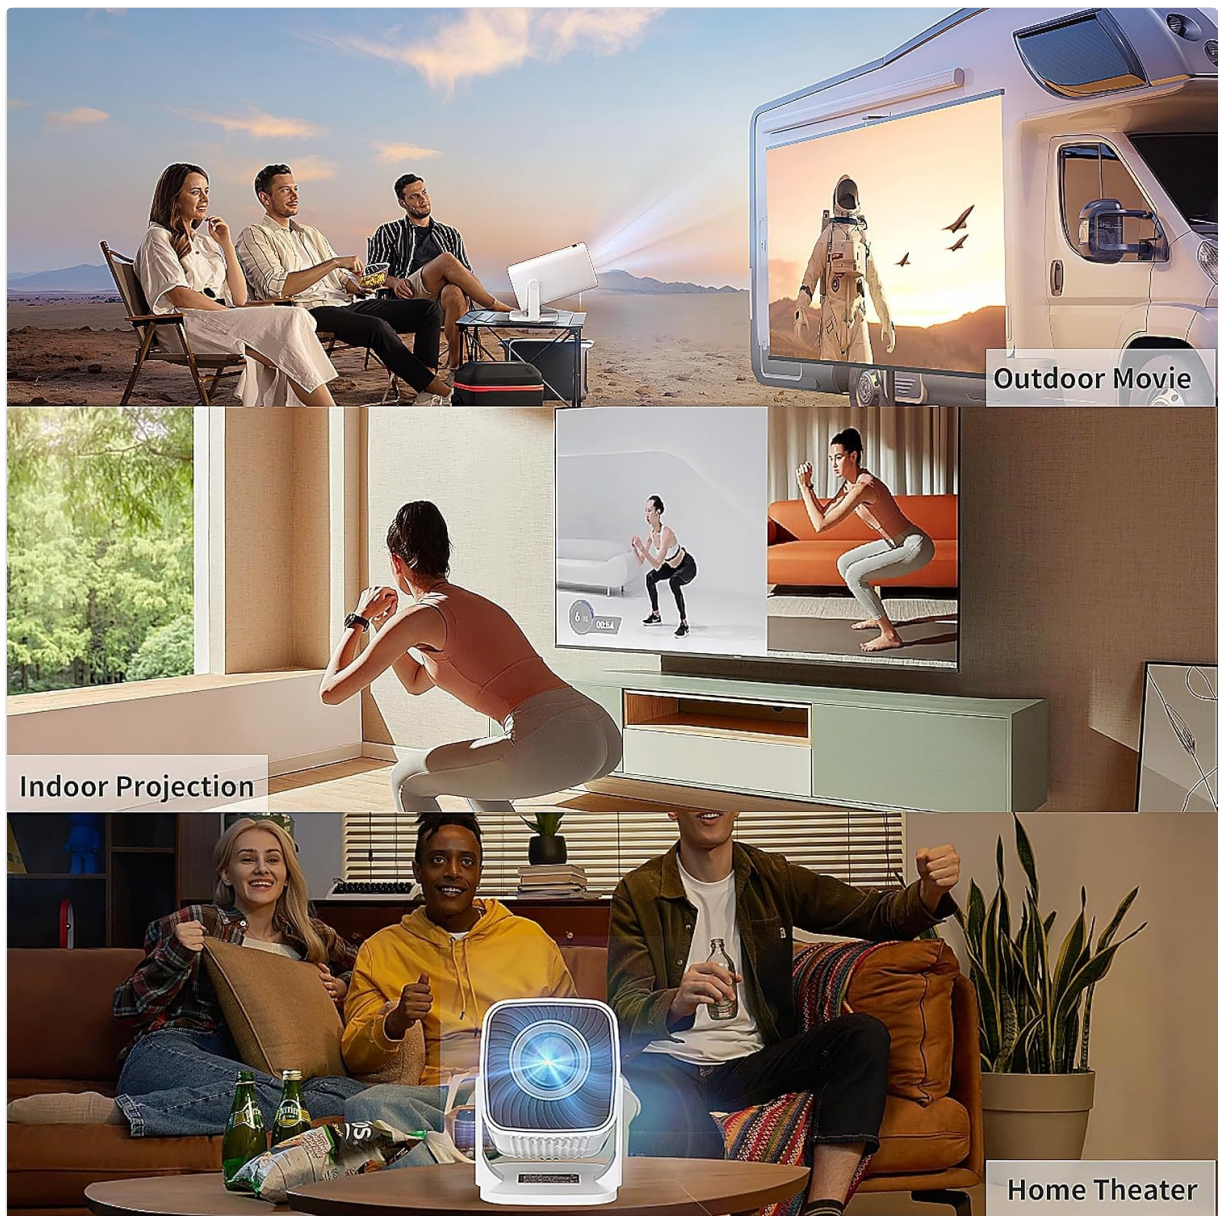

Image 4.2: The projector is suitable for various environments, including outdoor, indoor, and home theater use.

5. MAINTENANCE

5.1 Cleaning the Lens

Use a soft, lint-free cloth specifically designed for optical lenses to gently wipe the projector lens. Avoid using abrasive cleaners or excessive force.

5.2 Cleaning Air Vents

Regularly check and clean the air vents to prevent dust buildup, which can affect performance and lead to overheating. Use a soft brush or compressed air to remove dust.

5.3 Storage

When not in use, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures. Use the original packaging or a protective case to prevent dust and damage.

6. TROUBLESHOOTING

6.1 No Power

- Ensure the power cable is securely connected to both the projector and the power outlet.
- Verify the power outlet is functional.

6.2 No Image

- Check that the input source selected on the projector matches the connected device (e.g., HDMI 1, USB).
- Ensure the connected device is powered on and outputting a signal.
- Verify the connection cables are securely plugged in.

6.3 Blurry Image

- Adjust the manual focus ring on the lens until the image is clear.
- Ensure the projector is placed at an appropriate distance from the screen.

6.4 No Sound

- Check the volume settings on both the projector and the connected device.
- If using external speakers, ensure they are properly connected to the AUX port and powered on.

6.5 Remote Control Not Working

- Replace the batteries in the remote control.
- Ensure there are no obstructions between the remote and the projector's IR receiver.
